

Top 10 best web browsers 2024

When was the last time you tried a new browser? Please read this article and choose for yourself the most suitable web browser!

Most of us tend to choose one web browser and stick with it for many years. It's hard to escape this "rut", especially when you're so familiar with it and use it every day. However, trying a new browser can help you improve your web experience, and most likely it will also take you to more "sublimated" levels when surfing the internet.

It can be said that there is no "best" browser, only "best suited" to the user's needs. What do you care about when browsing online: beautiful interface, good performance, many auxiliary features, or the freedom to customize as required? This article will introduce the leading names in the browser "village". Read and consider, maybe you will find the right web browser for your needs.

first . Best overall browser: Mozilla Firefox

Compatible with operating systems: Windows, macOS, Android, iOS.

Suitable for: Users who care about security and safety.

Advantage

1. Precise malware warnings and blocking.
2. Navigate the web quickly.
3. Lots of extensions.

Defect

1. The version update process is not smart.
2. Landing page has many ads.
3. Scrolling is not as smooth as other browsers.

Mozilla Firefox is one of the fastest Internet browsers today in website navigation and full page load tests. Mozilla Firefox also proves its safety by excelling at overcoming malware with danger warnings and timely blocking features.

Mozilla Firefox is known for its fast speed. Although the Firefox browser requires a lot of memory to operate effectively, this can limit many computer tasks. However, it provides better network security. It has advanced security options that help protect your system from spyware and malware. Firefox has authentication protocols that make the browser safe from potential attackers using any malicious code. Further to enhance security, users can use advanced security options such as NoScript and Flashblock. They allow users to execute advanced code so that some new features can make the browser smarter.

Firefox has a very user-friendly interface and users can use several add-ons for further customization. With more than 6000 extensions, users can customize the browser with more than 500 themes. Mozilla offers a Tabbed Browsing feature that allows users to open unlimited tabs in a single window. Firefox also has embedded memory that provides the ability to remember pages, in case your system is shut down by mistake, you can quickly retrieve all open pages.

Firefox is a safe browser when it comes to protecting personal data. It offers browsing freedom and protection like no other browser. Behind Firefox is a non-profit organization, meaning it has no intention of profiting from collecting users' personal browsing information. Firefox has an open source project that allows anyone to look at the code and see how it works. And it doesn't share any information about users with third-party partners.

Firefox is available on Windows, Mac, Linux, iOS and Android, allowing you to synchronize passwords, bookmark websites, and set browser settings through the use of a free Firefox account. The browser versions also support a very diverse and useful library of extensions.

Mozilla is also very hard-working, regularly updating bug fixes, improving speed, enhancing security and diligently adding new features. However, updates are often annoying when they start automatically when you open the app and then take several minutes to download and install.

2. Most versatile browser: Google Chrome

Compatible with operating systems: Windows, macOS, Android, iOS.

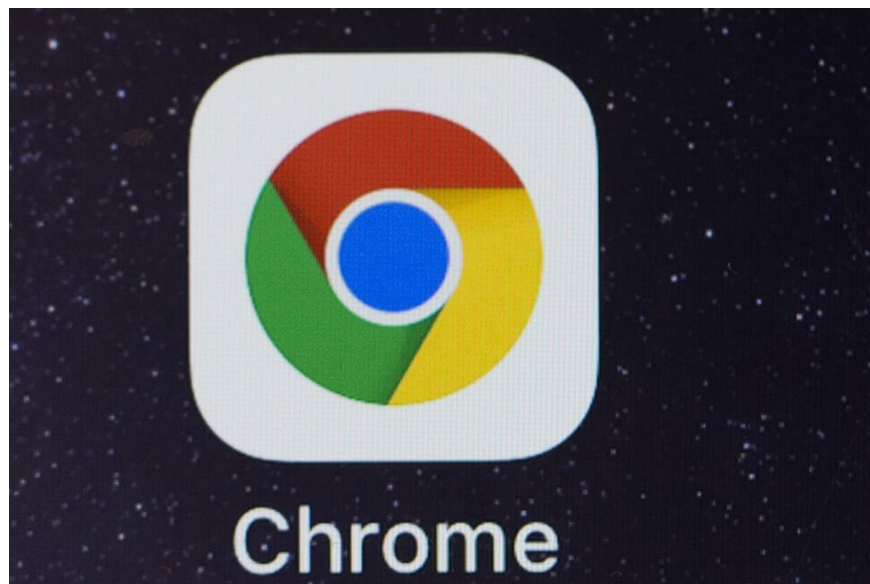

Good for: Users who love extensions.

Advantage

1. Compatible with all platforms and devices.
2. Search quickly from the address bar.
3. Settings sync is available on all devices.
4. Fast performance.
5. Diverse extensions.

Defect

1. Large program files, use more system resources than other browsers.
2. Incognito mode does not completely hide user activity.

Google Chrome is a free web browser developed by Google, used to access websites on the Internet. As of March 2022, it is the most popular web browser of choice worldwide, with over 62% of the web browser market share.

Google Chrome is also a cross-platform browser, which means several versions work on different computers, mobile devices, and operating systems.

Google Chrome comes standard on most mobile devices, so it's a good choice for cell phones and tablets. Tests show that Chrome performs slightly better than Firefox on Android devices. According to Statista, Google Chrome for Android is the most used version, accounting for more than 36% of the global web browser market share as of January 2022.

This is also a great choice for Windows and Mac computers with stable features, takes up little space on the screen and is the browser with the best interface.

Perhaps the biggest draw to Google Chrome is its raw performance. Web pages can be opened and loaded extremely quickly - even when browsing multiple pages with heavy graphics, ads or video content. The interface is clean and easy to use, even for beginners, and updates are deployed regularly and automatically to keep

security in check.

When you use Chrome with your Google account, you can sync all your bookmarks, history, passwords, autofill, etc. This means your settings will remain consistent and up to date. Updated whenever you use Chrome through your Google account on any other computer or device.

Google Chrome extensions are available for many favorite web services, from Dropbox and Evernote to Pocket and Pinterest. They can be searched and downloaded from the Chrome Web Store.

However, also in tests, Chrome was rated lower in terms of safety. Google's home browser doesn't identify as many phishing attacks as Firefox, but it also prevents malicious files like ransomware and Trojans from infecting users' computers.

In addition, if you use the browser on multiple devices, you will easily synchronize Chrome to review your access history, bookmarks, saved passwords. However, Chrome is one of the browsers heaviest, consumes a lot of resources especially on machines with limited RAM.

3 . Best browser for Windows 10: Microsoft Edge

Recently, Edge was reborn with a new smart coat based on Chromium and received a lot of positive feedback from users.

Compatible with operating systems: Windows, macOS, Android, iOS.

Advantage

1. Doesn't consume RAM like Chrome.
2. Compatible with most platforms.
3. Supports extensions similar to Chrome.
4. Integrated reading mode

Defect

1. The browser may freeze on pages with too many ads.
2. Loading embedded videos is very slow.
3. Only a powerful computer can open many tabs.

Download Microsoft Edge

Edge was quite warmly received when it first launched with Windows 10 - replacing the old Internet Explorer, but recently, this browser experienced a revival in early 2019 when Microsoft cooperated with Google to develop releases a new version of Edge based on Chromium (the engine used with Chrome).

The newly improved Edge is considered quite impressive as it inherits most of the advantages of Chrome without taking up a lot of system resources. Best of all, Edge is no longer limited to Windows 10 PCs but is available in full versions for Android, Linux, iOS and even macOS.

Edge has a significantly cleaner look than IE 10 or IE 11 and fits well with the overall aesthetic of Windows 11. In November 2019, Microsoft released the biggest update to its Edge browser yet. since moving to Chromium source code in 2018. This update includes an attractive new logo and a series of more business-focused features that help with intranet connectivity and Internet search.

With this update, corporate intranet folders can be accessed in the Edge browser, simply by typing the name in the Edge search bar. Search based on previous interactions. This also includes natural language search to find job titles, team names, office locations, and a variety of internal company information.

Other features include drag-and-drop search, which allows employees to drag and drop items from search results into a shareable list that includes all relevant images and data for that item. This information can also be exported to Excel.

One of the standout benefits of Edge is that it is now a pre-installed browser that comes with Windows 11. The obvious advantage here is that you don't need to install any third-party software to get started. web browser. Edge isn't simply an add-on for the Windows 11 browser. It's pretty well integrated into the entire platform. Edge is an interesting web browsing experience, worthy of being a new generation browser that is worth your attention.

4. Best browser for Apple users: Safari

Compatible with operating systems: MacOS, iOS.

Suitable for: MacOS and iOS users.

Advantage

1. Available on all Mac computers, iPhone, iPad, iPod touch and Apple Watch.
2. Bookmarks and browsing history are synced across devices with the same Apple ID.
3. Load websites quickly

Defect

1. Toolbar cannot be customized.
2. Voice interaction only works with mobile devices.
3. Not compatible with Windows and Android operating systems.

Download Apple Safari

Safari is a web browser developed by Apple for devices running the OS X operating system. Safari is the default browser installed on devices running iOS, such as iPhone, iPod or iPad, and Macs. It is based on the open source WebKit engine. Safari was first introduced in 2003 on desktop devices. Currently, there is no version for Windows – the version compatible with this operating software only runs from 2007 to 2012.

This browser has been in development for many years so it now offers a lot of great features. Its users especially appreciate the ability to sync to the cloud, launch a private browsing mode, and use a download manager. There is also the ability to customize Safari and add more features by installing free extensions.

The number of users of this browser worldwide is increasing every year. According to Statcounter, in December 2020, Safari was the second most popular web browser in the world, with a 19.25% market share.

5. Web browser for Vietnamese: Coc Coc

This prestigious title was awarded to Coc Coc - a free web browser exclusively for the Vietnamese market.

Compatible with operating systems: Windows, MacOS, Android, iOS.

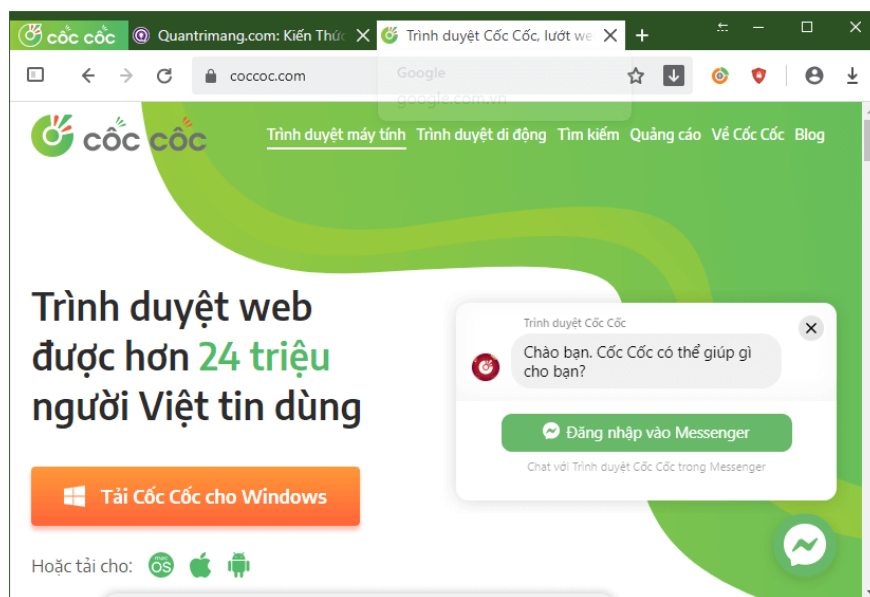

Good for: Users who love extensions.

Advantage

1. Fast download speed.
2. Domain name resolution capacity is always improved and enhanced.
3. Features to filter news, filter ads, and read newspapers quickly.
4. Load websites quickly.
5. Integrates many convenient personal utilities: spell check, English - Vietnamese dictionary.

Defect

1. Consumes too much system resources.
2. Page loading speed is slow.
3. Slow search, poor search for foreign websites.

Download Coc Coc

Coc Coc is highly appreciated in the eyes of Vietnamese people thanks to the features that serve users' small needs: fast Facebook access, superior download speed, fast newspaper reading, ad filtering, and best of all, the ability to understand Vietnamese people with the Vietnamese search function and locations in Vietnam are always optimized.

However, Coc Coc still faces many difficulties on its way to the number one position in Vietnam because it often encounters plugin errors, slow page loading speed, and difficulty searching with uncommon and important keywords. The important thing is that the browser consumes too much system resources, making it impossible for weakly configured devices to use it.

6 . Most diverse browser: Opera

Compatible with operating systems: Windows, macOS, Linux, Android, iOS.

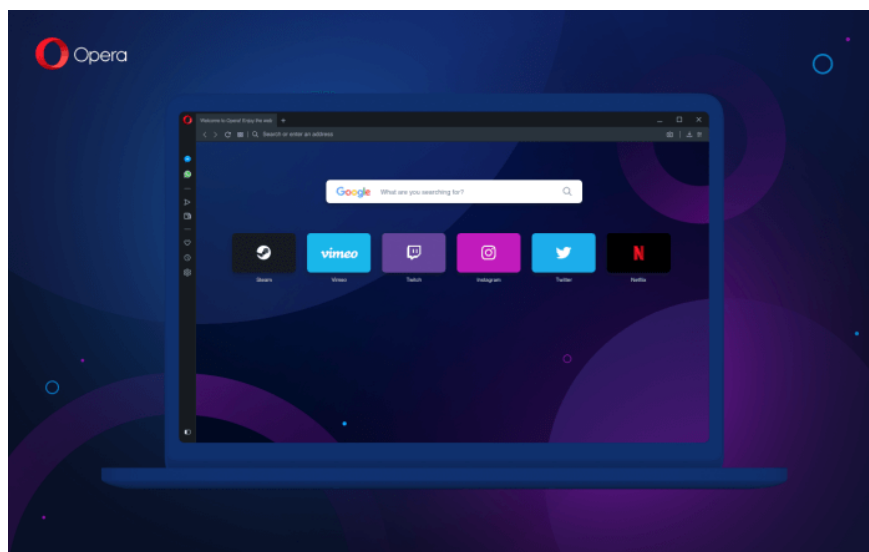

Good for: Users who love extensions.

Advantage

1. Use the same basic program as Google Chrome.
2. Allows customization of browser interface.
3. Built-in ad blocker.
4. Strong security features.

Defect

1. Fewer plugins than competitors.
2. Do not visit websites that are too old.

Download Opera Browser

Opera is a free Internet browser for mobile phones and computers. The Opera browser is available for Windows, macOS, and Linux, and has mobile apps on both Android and iOS.

The Opera web browser was originally released in 1995, as a result of a research project by a Norwegian telecommunications company. Since that time, the browser has received countless updates to accommodate new innovations and to keep up with new technological trends. Opera has a fast development cycle and tests new features and updates every 2 weeks.

Opera has many outstanding features, but one of the best is its battery saving technology. According to Opera's tests, the browser "runs up to 35% longer with battery saver enabled, compared to other browsers like Google Chrome and Microsoft Edge". Depending on your laptop's type and specifications, this advantage can get you an extra hour of battery life. On mobile devices, Opera compresses content so pages load quickly, even on slow Internet connections, meaning less time spent waiting for pages to load.

One of the reasons the Opera browser works so well is because of the built-in ad blocker that prevents pop-up ads while browsing. Free ad blocker, no special add-ons, downloads or plugins required, works on desktop version and for mobile devices.

It's sad that Opera only accounts for about 1% of the web browser market, because it really is a quality browser. Opera is fast to access, the user interface is clean, and it can do everything the competition can do with a few extra features.

The main reason you should install Opera alongside your browser is the Opera Turbo feature. This feature allows web traffic to be compressed, routing it through Opera's servers, which makes a big difference to browsing speeds if you're stuck with dial-up access. or limited broadband connection.

Opera reduces the amount of data transferred, which is handy when using a cellular connection, and rerouting also avoids content restrictions that ISPs may place on the browser. There's also an ad blocker built into the browser and a battery saving mode that helps extend laptop battery life longer.

7. Fastest and most secure browser: Brave

Compatible with operating systems : Windows, macOS, Android, iOS.

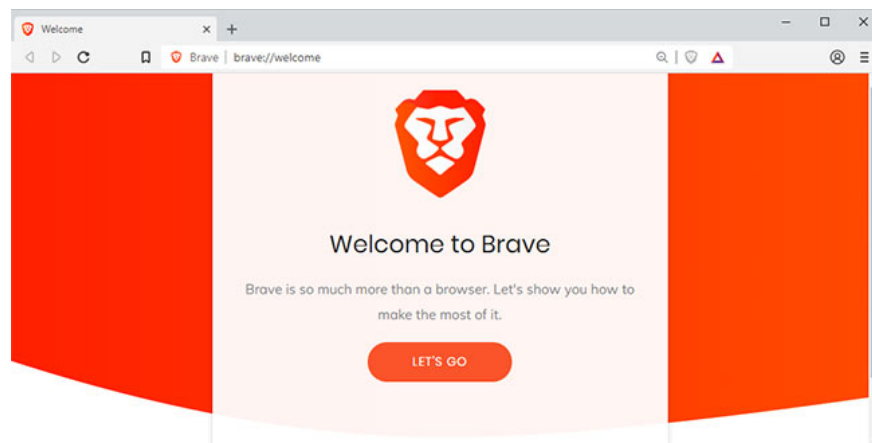

Good for : People interested in browsing the web quickly and safely while making money.

Advantage

1. Load web pages faster than most browsers
2. High focus on user privacy and blocking tracker
3. Compatible with many Chrome extensions

Defect

1. There are many features you may not need

Download Brave

Brave is a more or less standard browser that allows users to navigate to websites, run web applications, and display online content. Like other browsers, it is free to download and use, remembers website credentials, and can block online ads from appearing on websites.

The browser's maker, Brave Software, is one of the newer players in the browser world (Brave launched in January 2016, Google's Chrome launched in September 2008, and Microsoft's Edge launched in July 2015). The

company was founded by JavaScript creator and Mozilla co-founder Brendan Eich after he put the browser vendor under pressure for supporting California's 2008 Proposition 8, a Vote to ban same-sex marriage.

Brave is built on top of Chromium, the open source project that Google and others maintain. The back-end technologies that power Chrome - including the Blink rendering engine and the V8 JavaScript engine - also support Brave. Other browsers that depend on Chromium include Edge, Opera, Vivaldi and Qihoo 360, one of the most popular Chinese-made browsers.

On iOS, Brave instead relies on WebKit, the open source platform that powers Apple's Safari browser. WebKit is used as the backbone for any third-party browser submitted to Apple's App Store.

8. Browser suitable for working on multiple tabs at the same time: Vivaldi

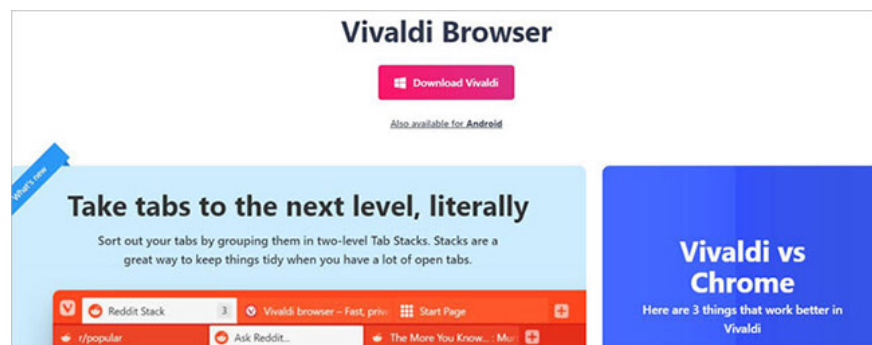

Compatible with operating systems : Windows, macOS, Android, Linux.

Suitable for : People who often have to work with multiple tabs at the same time.

If you spend a lot of time on your browser, it needs to do everything you need it to do right away.

Vivaldi is a PC browser that has a number of unique features and provides a fast and secure browsing experience to users by blocking ads and trackers. Vivaldi comes with built-in features like notes, screenshots, image properties, etc. This browser is available for Android, Mac, Linux, and Windows. Vivaldi also has support for 53 languages.

Vivaldi offers a lot of options. You choose how Vivaldi works, what features you use, and feel free to customize its look and feel. How the browser works is up to you. There are many ways to access and control almost everything in Vivaldi. Try and find what works for you. Vivaldi was created to explore, tweak, and discover what a browser can do.

Download Vivaldi

Vivaldi's main features include:

Group tabs in a stack.

1. Built-in ad and tracker blocker.
2. Customizable keyboard shortcuts for everything.

3. Add any website as a web dashboard.
4. Many colorful themes to choose from.
5. Provides note-taking tools
6. Screen capture
7. View multiple pages at once without switching tabs.
8. The most informative browsing history.

Vivaldi has a positive aspect in that it is lightweight, consuming little RAM when compared to other browsers.

9. Best browser for privacy: DuckDuckGo

Compatible with operating systems : Windows, macOS, Android, iOS.

Suitable for : People who are especially concerned about protecting their privacy

Advantage

1. Delivers results that are hard to find on other websites
2. Suggestions for new very creative topics
3. Don't have to see the same results over and over again

Defect

1. If you can't find something on Google, you won't find it with DuckDuckGo
2. Some of the suggestions seem very random
3. No specific/personal recommendations

Download DuckDuckGo

DuckDuckGo web browser claims that it has never collected or stored users' personal information. It has some very interesting features to attract users and earned an outstanding rating of 4.4/5.

DuckDuckGo's main features include:

1. Calculate
2. Display flight information.
3. Currency conversion
4. Allows you to search for IDs on social networks in simple steps without having to open that specific website.
5. Search the app store for alternatives to the app.
6. Shorten and expand links.
7. Quick stopwatch
8. Change capitalization/lowercase and check character count.
9. Check weather websites
10. Calendar
11. Loan calculator
12. Learn about the zodiac
13. Anagram solver tool to solve crossword puzzles
14. Blood type compatibility

DuckDuckGo offers some very unique and interesting features for users, making it one of the top 10 browsers today, However, some users claim that sometimes DuckDuckGo displays wrong browsing history , this can be very dangerous.

10. Browser that hides information from trackers: Epic

Compatible with operating systems : Android, iOS

Good for : People who want maximum privacy from hidden information trackers.

Advantage

1. Advanced security
2. Block tracking attempts
3. Free VPN server
4. Huge database of web addresses

Defect

1. Connection speed is slow
2. Limited VPN servers

Download Epic

Epic is a free browser where you can stay anonymous to surf privately, it blocks unauthorized websites from tracking user data so you can have a safe and high-quality browsing experience. So, Epic proves to be one of the best browsers for people with special concerns related to privacy and security.

Epic's main features include:

1. Works as a privacy leak blocker.
2. Comes with VPN servers.
3. Continuously works in incognito mode.
4. Maintain backups of certain data.
5. Epic's built-in encrypted proxy encrypts data, hides your location, and lets you access blocked sites like Pandora from anywhere in the world.
6. See who is following you in other browsers

Users have complained that some websites do not work well with the Epic browser and this proves to be a major drawback, but it is a great platform for those who care a lot about privacy.

Above are the browsers you should try on your computers and mobile devices. Don't hesitate to try choosing an application that suits your needs and preferences, maybe you will find a new "truth" to browse the web more satisfactorily.
