

Top 10 'fake' laptops

The counterfeit versions from China all have fake models of famous models while the price is much cheaper

The counterfeit versions from China all have fake models of famous models while the price is much cheaper .

Here are 10 laptops that are said to be the "reluctant copy" by *Micgadget* .

This fake version called X31 was inspired by Acer's first 10-inch screen netbook, the Aspire One D150. This model is equipped with Atom N270 processor, 1GB RAM, 120GB hard drive, 250GB hard drive, 10.2 inch screen 1,024 x 600 pixel resolution and costs only about 249 USD in China. An interesting thing is that the buyer can add 3 USD to add the Acer logo to the phone.

Many people talk about defects without the netbook's CD drive. This desire has been made by laptop makers to become a reality with a compact model like the image, using Atom N270 processor, 1GB of RAM, 160GB hard

drive, 11-inch screen with resolution resolution 1,366 x 768 pixels, especially with a CD / DVD drive for only \$ 380.

This can be considered as one of the first versions of the "supermodel" Vaio P on the market. This model has 10.1 inch screen with 1024 x 600 pixel resolution, Atom N280 processor with 1.66 GHz speed, 1GB RAM, 160GB hard drive, 3 cell battery, 3G connection and is available only about \$ 249.

This is really a pretty "star" version of the MSI X340 while being as thin as the MacBook Air and weighing 1.36kg. The "fake" version uses Intel's low-voltage chip at 1.2 GHz, 1GB of RAM, a 160GB hard drive or 250GB and a 13-inch screen with a resolution of 1,366 x 768 pixels. It sells for about 350 USD.

This copycat version of one of Dell's slimmest models even includes an Intel ULV or Atom low-voltage processor option. It comes with Intel GMA X4500 graphics chip and costs about 278 USD.

This is another clone version of Vaio P with aluminum housing and a better design than the above version. This model has a 10 inch screen with 1024 x 600 pixel resolution, Atom Z530 1.6 GHz chip, 1GB RAM, 160GB hard drive and is priced at 359 USD.

Shortly after the HP Mini 5102 appeared, its "reluctant" brother was born. This model is almost identical in shape to the Pine Trail platform with an Atom N450 processor of 1.66 GHz, Intel GMA 315 graphics chip. It has an 11 inch screen with a resolution of 1366 x 768 pixels and has Price is about 293 USD. Users can add 3 USD to add HP logo to the device.

The model is almost identical to the MacBook, including the "apple bite" logo, but as compact as a netbook. It sells for about 256 USD.

Although this version doesn't have an "Apple" logo on the tablet, the rest of the design is almost identical to the unibody style of the MacBook Pro. Machine equipped with 14-inch screen resolution of 1366 x 768 pixels, Atom D510 processor speed of 1.66 GHz, 1GB RAM, 160 GB hard drive, even Nvidia's ION 2 graphics platform. The "Pro" MacBook Pro costs \$ 480.

This can be considered the best version of the imitation with the ultra-thin shape like MacBook Air, including the logo on the top. It also has a relatively low price, only \$ 299 for the configuration version, including Aton N450 processor, 1GB RAM, 160GB hard drive, and 4cell battery.
