

Top 10 soundbar speakers and best soundbase 2019

Soundbar and soundbase speakers provide better, bigger sound for your TV, but unlike other dedicated speaker systems it doesn't take much space.

Listening to the built-in speaker on the TV is like using the headset that comes with the phone. At first they seem fine, but over time you will see the sound they provide is not enough to meet your requirements.

That is why you should use soundbar speakers or sound speakers and soundbase speakers or base speakers to upgrade the sound for the TV. These speakers provide better, louder sound for your TV, but unlike other specialized speaker systems it doesn't take up much space. They 'sit' discreetly, quietly continuing to provide great sound without making noise.

1. The reason why should buy soundbar speakers for TV

If you need to buy a speaker for TV, you should remind you to choose a soundbar or soundbase speaker. These two loudspeakers are often confused by the nearly identical design, but the soundbase is designed to be able to put the TV on it to save space. So if you have a wall TV, you should choose a soundbar speaker.

Bluetooth is a handy feature, because it allows soundbar speakers, soundbase to play music wirelessly from the phone. Some speakers support other wireless technologies like Apple Airplay. And a few work with smart assistants like Amazon Alexa and Google Assistant.

You should also consider the remote control, the ability to connect widely and of course the most important is the sound quality. If you're going to buy a soundbase, check that it matches your TV weight.

Note: The prices of the speakers in this article are for reference only at the time of writing, subject to change. You should contact the seller to get the most accurate price.

The soundbase speakers and the best soundbar

1. JVC TH-W513B (1.9 million VND)
2. Sonos Beam (VND 9.2 million)
3. Q Acoustics M2 (nearly 7 million VND)
4. Yamaha YAS-207 (nearly 7 million VND)
5. JBL Bar Studio (VND 3.5 million)
6. Canton DM 55 (8.8 million VND)
7. Acoustic Energy Aego Soundbar (5.1 million VND)
8. Cambridge Audio TV5 v2 (11, 5 million VND)
9. Cambridge Audio TVB2 (8.1 million VND)

10. 10. Acoustics M3 Q (VND 7.5 million)

1. JVC TH-W513B (1.9 million VND)

Specifications:

1. **Connection port** : 1 optical port, 1 coaxial port, 1 3.5mm aux port, 1 port line-in aux
2. **Remote control** : Yes
3. **Technology does not work** : Bluetooth
4. **Size (HWD)**: 62 x 800 x 93mm
5. **Weight** : 220g

Advantages:

1. Rugged design
2. Loud

Defect:

1. Lack of bass
2. No digital optical cable
3. The sound is a little dazzling when loud

For nearly 2 million VND, this is one of the best cheap soundbar speakers. The speaker is ruggedly designed, with connectivity ports and Bluetooth features for wireless streaming from phones or tablets. You will have no trouble setting up this speaker and can choose four different modes suitable for each type of sound.

2. Sonos Beam (VND 9.2 million)

Specifications:

1. **Connection port**: 1 HDMI port, 1 optical port, 1 Ethernet port
2. **Remote control** : No
3. **Wireless technology** : AirPlay
4. **Size (HWD)** : 68.5 x 651 x 100mm
5. **Weight** : 280g

Advantages:

1. Compact and stylish design
2. Great streaming ability

Defect:

1. Harsh sound (too much power at low treble)
2. Less HDMI input

This is Sonos' smaller, cheaper soundbar, but it's equally impressive. This speaker is Amazon Alexa, Google Assistant and Apple Siri, so you are spoiled for voice control.

It can also play all kinds of streaming services, including Spotify, Tidal, Apple Music, Amazon, Deezer and Google Play Music. And Beam can work with other Sonos speakers, creating a multi-room sound system. When combined with a TV, it will deliver much better sound quality than integrated speakers.

3. Q Acoustics M2 (nearly 7 million VND)

Specifications:

1. **Connection port:** 1 RCA phono port, 1 optical port, 1 HDMI port, 1 3.5mm headphone jack
2. **Remote control :** Yes
3. **Wireless technology:** Bluetooth
4. **Size (HWD) :** 93 x 550 x 338mm
5. **Weight :** 580g

Advantages:

1. Sound crisp, strong, detailed
2. Easy to use
3. The design is solid, not sophisticated

Defect:

1. The remote control is not very nice

This is a soundbase speaker, not a soundbar, so you can put it on it. This speaker provides excellent sound quality, with impressive voice expression and good separation of space. You can use Bluetooth to play music from your phone, use it as a music speaker. It can tolerate TVs up to 25kg, the weight of most 65-inch TVs. You can fine tune the sound using the switches around the back.

4. Yamaha YAS-207 (nearly 7 million VND)

Specifications:

1. **Connection port:** 1 HDMI port, 1 optical port, 1 3.5mm headphone jack
2. **Remote control :** Yes
3. **Wireless technology:** Bluetooth
4. **Size (HWD) :** 60 x 930 x 108mm
5. **Weight :** 790g

Advantages:

1. The sound is crisp, lively
2. Impressive performance
3. Slim, practical design

Defect:

1. Treble sound is not very good

This Yamaha speaker delivers a surround sound system, suitable for most home cinemas. The sound field is wide and there are no fewer than seven sound modes to choose from, so you need to find a mode that suits your

room and the content being viewed.

You also get a dedicated subwoofer (subwoofer) for bass. This is a good performance soundbar you should consider.

5. JBL Bar Studio (VND 3.5 million)

Specifications:

1. **Connection** port: 1 HDMI port, 1 optical port, 1 aux port, 1 USB port
2. **Remote control** : Yes
3. **Wireless technology** : Bluetooth
4. **Size (HWD)** : 58 x 614 x 86mm
5. **Weight** : 1.4kg

Advantages:

1. Sound sure, strong
2. Many bass
3. Many good features

Defect:

1. Sound hard with high volume

Like Yamaha speaker products, this affordable soundbar speaker is designed to simulate the sound from surround sound systems, it is worth the money. The JBL Bar Studio has rich and powerful bass and detail in the mid range. This is really a TV audio booster, not a hi-fi living room speaker.

1. Which JBL Soundbar Speaker is best to buy?

6. Canton DM 55 (8.8 million VND)

Specifications:

1. **Connection** port: 1 optical port, 1 coaxial port, 2 RCA ports, 1 subwoofer output

2. **Remote control** : Yes
3. **Wireless** : Bluetooth
4. **Size (HWD)** : 68 x 545 x 300mm
5. **Weight** : 5.3kg

Advantages:

1. Rich sound, expanded
2. Rugged design, beautiful appearance
3. Easy to use

Disadvantages :

1. No HDMI port

This soundbase speaker offers rich sound with deep bass. But that's not all, it boasts exquisite design that goes far beyond its competitors. The speaker is well built, with a glossy glass top on the top. And it can withstand TVs weighing up to 40kg.

7. Acoustic Energy Aego Soundbar (5.1 million VND)

Specifications:

1. Bluetooth aptX
2. Optical input
3. Remote controller

Advantages:

1. The sound is wide, sure
2. Small size and attractive price
3. Easy to use

Defect:

1. Need to be more refined and dynamic
2. Not suitable for playing music

Do you have a small room, a small TV and a small budget but want a loud sound? Very easy, choose Acoustic Energy Aego Soundbar.

Aego Soundbar has a compact audio speaker and a wired subwoofer. Despite this price, the Aegon system does not offer any cheap feel and its size (only 50cm and 7cm long) is suitable for small computers or even desktop computers. not obstructing the screen.

8. Cambridge Audio TV5 v2 (11, 5 million VND)

Specifications:

1. **Size (HWD)** : 10 x 73 x 34cm
2. **Weight** : 8,14kg
3. 3.5mm jack

Advantages:

1. Great bass sound
2. HDMI connection

Defect:

1. Screen is missing
2. Remote is not very good

This 70cm soundbase offers great sound even without a screen, it feels a bit like Hal 9000. This may make many people excited or scared (if you remember the movie) but about ergonomics, You don't need to bother with the volume or setting of this soundbase.

9. Cambridge Audio TVB2 (8.1 million VND)

Specifications:

1. **Size (DWD)** : Soundbar speaker: 88 x 7.5 x 4.6cm; Subwoofer: 18 x 36.4 x 27.8cm
2. **Weight** : Soundbar speaker: 1.63kg; subwoofer: 4.9kg
3. **Connection port**: 3 HDMI ports with 1.4c input, 1 HDMI port with 1.4c output with ARC, a TOSLINK 3.5mm optical port

Advantages:

1. Deep bass
2. Mid clear
3. Great integration
4. Luxury design, practical, compact size

Defect:

1. Not the biggest sound

The task assigned to Cambridge Audio engineers is to produce one of the most 'discreet' soundbar on the market, but without losing sound quality and performance.

TVB2 is a sleek soundbar, including two fourth-generation BMR drivers and a compact wireless subwoofer, suitable for laying in the corner with down-firing woofer speakers (woofer with loudspeaker facing down to the floor) 16.5cm .

It saves space and is suitable for use with TVs with extra audio systems. This 88cm long soundbar loudspeaker fits 42 inch TV and is only 7cm tall so it doesn't block the screen if sitting in front of it.

10. Acoustics M3 Q (VND 7.5 million)

Specifications:

1. **Size (DWD)** : 100 x 9 x 12.5cm
2. **Weight** : 4kg
3. Gateways: DMI ARC, Bluetooth aptX, 2 RCA ports, optical input, 1 3.5mm port

Advantages:

1. The sound is clear, detailed and heavy
2. Design smart updates
3. Easy to use

Defect:

1. The booming bass

There are many things to like with this Q Acoustics soundbar, available with an original RRP for VND 8.6 million. This soundbar has 2 sub-speakers that use BMR technology to bring the middle and high range clean and detailed. If you're a fan of heavy bass, this is the soundbar for you.
