

Top 10 'ultra portable' laptops of the year

Ideal for frequent business travelers, the following ultraportables are usually very light in weight, small in size.

Ideal for frequent business travelers, the following ultraportables are usually very light in weight, small in size, extremely high in performance, and especially very fashionable and eye-catching.

1. Thinkpad X200

The X200 is one of the most comprehensive ultraportable laptops available today. The device is equipped with an Intel Core2 P8600 Duo processor (2.40GHz, 3MB L2, 1066MHz FSB), 4GB RAM (1067 MHz), a 12.1-inch wide screen with sharp resolution, 200GB hard drive . It comes with Premium options such as WWAN and GPS connectivity. However, the Thinkpad X200 also has certain disadvantages such as a heavy weight due to the use of a 9-cell battery; lack of optical drive; and no hover keyboard. The weight of the device is 1.3kg, and the price is 1,542USD.

2. Sony VGN-Z598U

Being the most advanced laptop from Sony, VGN-Z598U is for weak businessmen who are 'very expensive' because its maximum price can be up to 4,450 USD. However, with the basic configuration, the price of Sony VGN-Z598U is only an average of \$ 1,499. It is equipped with Intel Core Duo P9500 2.53GHz chip; 13.1-inch screen (wide); 256GB hard drive (or 128GB SSD); 4GB RAM, nVidia GeForce 9300M discrete graphics card GS. The weight of the machine is 1.5kg.

3. Asus U6V

As Asus' top-notch fashion laptop, it's no surprise that Asus U6V is equipped with the most fashionable features. It has integrated Intel Core 2 Duo P8400 2.26GHz chip; 12.1-inch TFT screen; 4 GB DDR2 SDRAM; NVIDIA GeForce 9400M GS 256MB discrete graphics card; 320GB hard drive; secondary battery; weight 1.5kg. Asus U6V is priced at US \$ 1,650.

4. Samsung X360

Samsung X360 looks superficial and luxurious, looks like the quality of expensive phones. X360 was built to compete with the Lenovo X200. It has extremely sharp images and very stylish designs. X360 is equipped with Intel Core 2 Duo SU9400 1.6 GHz chip; 4GB RAM; 13.3-inch wide screen; 128GB SSD . The price of the product is \$ 2,499.

5. Lenovo ThinkPad X300

The ThinkPad X300 is a revolutionary product of Lenovo with a 13.3-inch wide screen; Intel Core 2 Duo L7100 1.2-GHz chip; 64GB SSD drive; 1GB RAM; and have LED backlight. The strength of the machine lies in its stylish design; built-in DVD burner; Connected WWAN, GPS and wireless USB. However, due to the integrated SSD, the price of the X300 is 'blown' up quite a lot. The weight of the device is 1.5kg, and the price is 2,057USD.

6. Lenovo IdeaPad U110

Lenovo IdeaPad U110 looks extremely attractive with glossy black or red. The pharmacy is equipped with trendy features but the price is not too expensive. IdeaPad U110 'scores' of design, lightweight, rugged, sharp screen resolution, an easy-to-use keyboard, and a secondary battery. However, the IdeaPad U110 lacks an optical drive; screens sometimes reflect; configuration is difficult to change; and there is no premium WWAN option. Lenovo IdeaPad U110 basic configuration includes: 1.6-GHz Core 2 Duo L7500 chip; 11.1-inch screen; 120GB hard drive; 2GB RAM; weight 1kg. The price of the product is \$ 1,749.

7. Micro Express JFT2500

Thanks to the integrated small size keyboard and small battery that only runs for about 2 hours, the weight and size of JFT2500 is minimized to the maximum. The device is equipped with an Intel Core 2 Duo T7700 2.4GHz chip; 12.1-inch screen; 160GB hard drive; weight 2kg. Price of Micro Express JFT2500 1,199USD.

8. Panasonic Toughbook W7

Toughbook CF-W7 represents the business computer line with a mechanism to ensure data safety and machine operation mechanisms. The CF-W7 can withstand the weight of 90kg, while the weight is on par with the MacBook Air, and has a WWLAN connection. Basic specifications of the CF-W7 include: Intel Core 2 Duo U7500 1.06GHz chip, 1GB RAM, 12.1-inch screen, 80GB hard drive, weighing 1.3kg. The price of the product is: 2,099USD.

9. HP Voodoo Envy133

As a typical smart design of HP, the Voodoo Envy133 is full of qualities to make a high-end laptop. The device is equipped with 1.6GHz Core 2 Duo SP7500 chip, 13.3-inch screen, 80GB hard drive, 1GB RAM, 1.5kg weight. It sells for \$ 2,349.

10. Macbook Air

Perhaps we don't need to talk much about the Macbook Air 'super product' because its reputation has been very far away. Looks horizontally, it feels like Air is just as thin as paper, while its weight is only 1.3kg. The device is equipped with a 1.6-GHz Intel Core 2 Duo chip (or 1.8GHz), 2GB of RAM, Bluetooth and Wi-Fi support, a 120GB hard drive (or 128GB SSD), the battery runs for 5 hours, and costs USD 1,799.

The MacBook Air all scored in size, weight, style, and maneuverability. Air's processor is quite fast but still slower than other Macs; while the battery is used longer, the user cannot replace it and cannot use the extra battery. The memory is also strong but cannot be expanded. Air has helped increase Mac sales quickly. The

product has two main competitors: Toshiba's 1kg laptop (claimed to be the world's lightest laptop), and HP's Voodoo Envy 133. MacBook Air is considered a decoration for entrepreneurs who often have to travel far away.
