

Top 12 best laptops cost under VND 16.87 million

For less than 17 million VND, users can own one of 12 laptop models with relative configuration to 'shoulder' many hard work later.

For less than 17 million VND, users can own one of 12 laptop models with relative configuration to "shoulder" the following heavy work :

Acer Aspire 6930G-583G: multimedia service

Advantages: Equipped with super bright 16: 9 screen (widescreen) for good display quality, a discrete graphics card, a Blu-ray drive. Dolby Home Theater allows quick access to audio applications and settings.

Notes: It's quite heavy when weighing 3.2kg

Reference price: VND 14 million

X82Q Asus: geared towards business objects

Pros: Super-TFT screen gives good contrast quality, bright images and sharpness. The battery is capable of operating for over 200 minutes. Most pre-installed applications are copyrighted.

Cons: The price is quite expensive compared to the features it offers. The screen is 1280 x 800 pixels, only 14.1 inches in size. GMA 4500M integrated graphics card is not suitable for multimedia entertainment or gaming purposes.

Reference price: VND 15.5 million

Dell Studio 15: use laptops at home regularly

Pros: The 15.4-inch LED display provides very good color display quality, it is capable of supporting resolutions up to 1440x900 pixels, supporting HD movie viewing.

Disadvantages: Because it is equipped with Intel's integrated graphics card, this Studio 15 model only helps you play simple games.

Reference price: VND 16.87 million

Fujitsu Siemens Amilo Pi 3625: laptop instead of desktop

Pros: The 17-inch screen is quite large with display resolution at 1440x900 pixels resolution, Super-TFT lighting technology for bright and colorful image quality. The battery has a reasonable use time.

Bad: Equipped with integrated graphics card makes it an unsuitable device for multimedia purposes.

Reference price: VND 16.87 million

HP Compaq 6370s: geared towards entrepreneurs

Pros: The 15.4-inch screen makes it easy to work with multiple windows at once. Thanks to that, the keyboard layout becomes more spacious.

Bad: Light and contrast are not good, the touchpad is a bit small.

Reference price: VND 14 million

Lenovo 3000 N500: geared to small businesses

Advantages: Equipped with many quality features and utilities from Lenovo. They have an eye-catching design similar to the Acer Aspire 6930G-583G. The casing is made of plastic for a cool feeling after a long time of use.

The feeling of using the keyboard is quite comfortable while keeping a copy of the Thinkpad generation.

Bad: No light adjustment key, the above layout keys will be difficult for users when you are new to Lenovo.

Reference price: 11.26 million

MSI VR705: laptop oriented to multimedia

Advantages: 17-inch screen with NVIDIA GeForce 8200M graphics card supports 3D technology to display the multimedia entertainment very well. The sharp screen quality is capable of supporting resolutions up to 1440 x 900 pixels for comfortable space to work with multiple windows.

Poor: Not very suitable for business.

Reference price: 14.33 million VND

PC Nextday Zoostorm 83-5200: cutting costs to improve quality

Advantages: Thanks to cutting costs for other devices, this model is equipped with the processor with the best RAM in this group. The 15.4-inch screen has sharp picture quality with vibrant colors, which contrasts well with sunlight.

Bad: The screen quality only supports display at 1280 x 800-pixel resolution because of the integrated GMA 4500M graphics card. It also makes this model unsuitable for multimedia programs, but only for office work as well as watching simple movies. However, you can also choose to upgrade the discrete graphics card to take advantage of the power.

Reference price: VND 16.87 million

Rock Pegasus 210: towards the main style

Pros: Focused on design, it is quite eye-catching. The 12.1-inch screen supports 1280 x 800-pixel resolution for very good image and light quality. The keys move sensitive and accurate. Powerful GMA950 integrated card for consistent performance.

Cons: Super-TFT screen is equipped with some reflective features that make you feel uncomfortable. The keyboard and touchpad have a small design that makes it difficult to type. It only performs simple operations and does not perform advanced tasks.

Reference price: 16.87 million VND

Samsung R150: outstanding design

Pros: Cheap price but equipped with many impressive features for mobile devices. The 15.4-inch screen has a sharp and clear display quality. Integrated card but still capable of watching 3D movies as well as multimedia programs. Comfortable keyboard provides many good utilities.

Cons: Can reflect directly or under lighting conditions. Not suitable for gaming ability as well as graphic design. There are no keyboard shortcuts and multimedia program access keys.

Reference price: VND 15.5 million

Sony VAIO VGN-NS20J / S: N-series series at an affordable price

Pros: Vivid 15.4-inch screen gives the best and brightest image quality in this product group for the purpose of watching movies. 1280 x 800-pixel resolution still gives sharp display quality.

Disadvantage: Intel GMA 4500 integrated graphics card makes you want to play games, entertainment . you need a discrete graphics card to complement.

Reference price: 13.5 million

Toshiba Tecra A10-16E: an ideal solution for businesses

Pros: The TFT screen has a display size of 15.4 inches. Ability to display well under light, equipped with fingerprints. Integrated graphics card helps to extend battery life longer when it is capable of operating up to 318

minutes.

Nh??c: Without many outstanding colors, the integrated card does not allow the use of multimedia entertainment programs and powerful games.
