Let's TipsMake.com refer to the article Top 20 templates Bootstrap free for Admin Dashboard below!

1. Beautiful free PowerPoint slides for teachers
2. Beautiful free PowerPoint slides for office workers
3. Create and use the Template in Outlook 2010

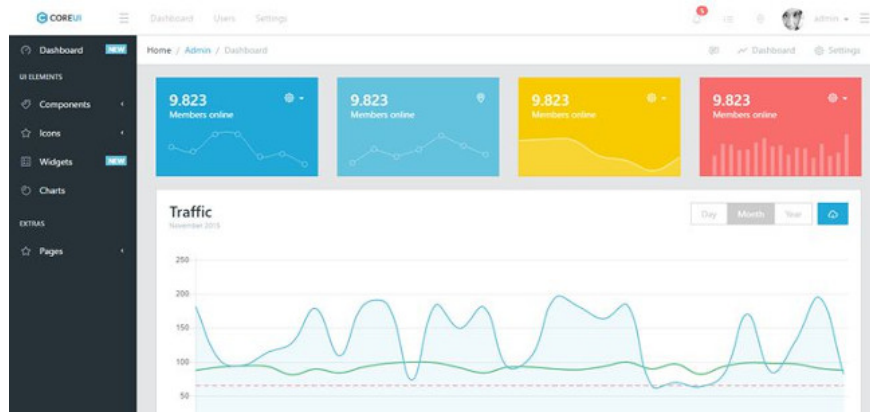

In the past, the admin dashboard part of a web application was built to contain the main features, and the interface is not much considered, so it looks quite dry and not user friendly. Fortunately, things have changed now. Especially in the past few years, there are many open source, outstanding features with beautiful designs, harmony. Besides the growing popularity of the Bootstrap framework, creating a beautiful admin panel and multiple features has never been so easy.

Why do you choose to use Bootstrap? With Bootstrap, you'll know exactly what you can get. This is a very easy-to-customize mobile-first framework (*pre-designed phone to other devices*), including many available designs, comes with a huge component library and widgets. And perhaps most importantly, your Bootstrap will easily unify the interface on all screen resolutions and interfaces. So building a dashboard, or an admin panel for web applications with this framework is extremely effective.

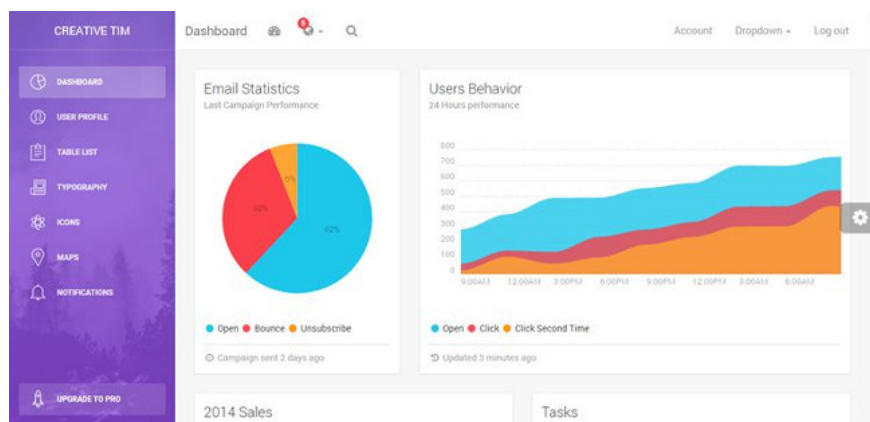

All of the following free Admin and dashboard interfaces are rebuilt for use as a complete solution to help you quickly create a front-end dashboard for your web application. As well as the collection of Bootstrap widgets, they include many other addons, plugins and features (*complement charts & tables, schedules, file management and more*). All you need to build the dashboard.

Besides the great features, these interfaces are also very beautiful. Please join TipsMake.com refer to **Top 20 templates Bootstrap free for Admin Dashboard** below!
