

Top 20 the most beautiful computer Case

Top 20 most beautiful computer cases. Old computer computers are just for giving, it doesn't need to be beautiful, please because it doesn't matter much. But now it is different, not only to hold components but also has an important use that is beauty.

In an era of increasing development nowadays, products not only serve the main purpose but also serve to decorate and beautify. As for computers, too, the old computer case just let it be, no need to be beautiful, please because it doesn't matter much. But now it is different, not only to hold components but also has an important use that is beauty. Today, Thuthuatphanmem.vn will introduce the Top 20 most beautiful computer Cases.

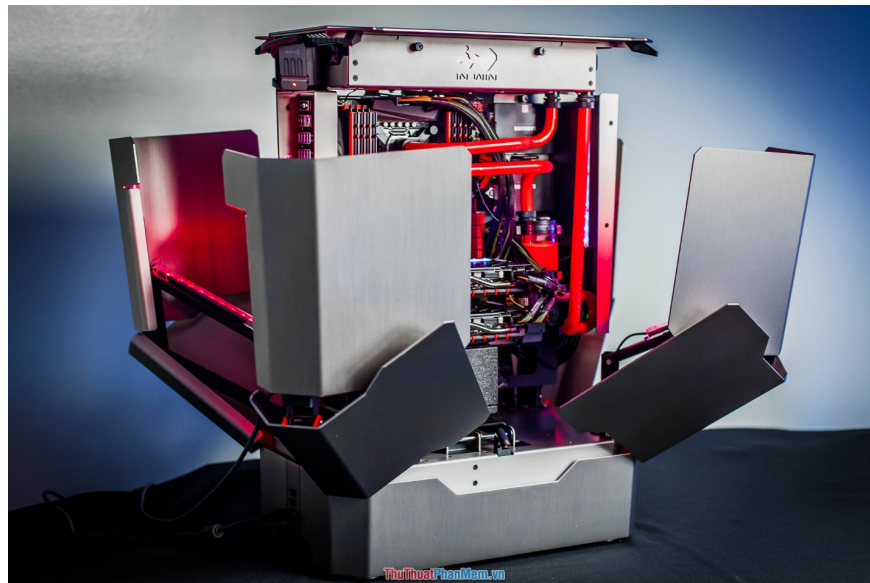

1. In-Win Z-Tower

Launched not long ago, In-Win Z-Tower is a super in the case world. This is a limited version of In-win manufacturer. And to own it you have to spend an extremely large amount (about 160,000,000 VND). But in return we will have a glossy design, sharp but never concerned.

2. In-Win Signature Motorized Transformer

In-Win is known as the 'tycoon' in case creation. With this version, the studio was inspired by the movie Transformer. It is also the first case in the world to have the ability to transform. Just a push of a button, from a rectangular case will open the wings to open like a flower to reveal the entire internal component.

3. In-Win Tooe 2.0 Limited Edition

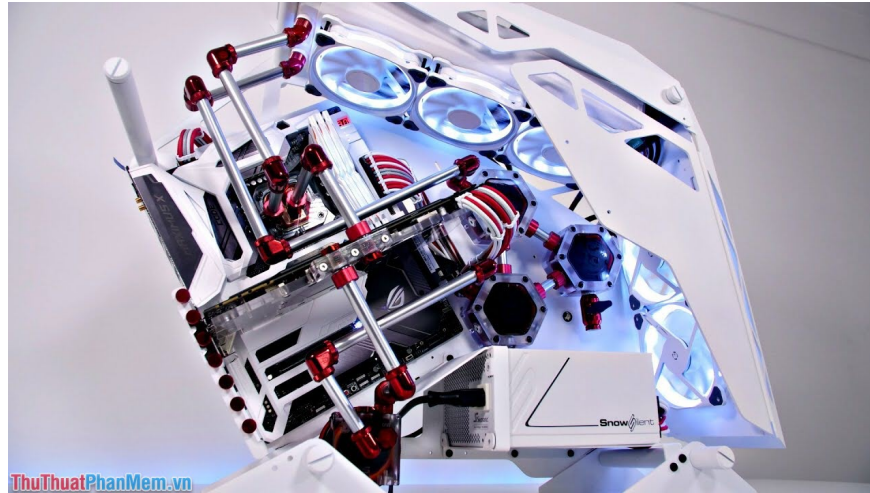

Another child of In-Win, the company has too many super products in the case. In-Win Tò 2.0 is a version with mirror-coated glass, reflecting the most beautiful and sparkling internal components. To own this version, you have to spend nearly 50 million new.

4. Case DeepCool Quadstellar

DeepCool Quadstellar takes its ideas from fiction movies and spaceships. The case is divided into 4 wings, each wing will have a different task such as powering, motherboard, . But the most remarkable thing is the customization ability of DeepCool Quadstellar, the RGB LED system on the case can be adjusted. control by phone at will It sounds so far right?

5. Case Cougar CONQUER

Case Cougar CONQUER takes its ideas from the sharp, agile fighters. This Cougar CONQUER case has many empty sections to ensure ventilation. The placement of components is also different from other cases which is what makes the case for Case Cougar CONQUER.

6. Case THERMALTAKE Level 20 Tempered

Born to target THERMALTAKE Level 20 enthusiast users, there is an impressive user-friendly design with three completely separate compartments that can be assembled into a large square. The entire case is made of steel and meticulously scratched.

7. Thermaltake Core P7

ThuThuatPhanMem.vn

This is the most advanced product of the Core line from the manufacturer Thermaltake. Thermaltake Core P7 is aimed at users who prefer water cooling by revealing all the components inside the engine compartment and adding two extra wings on the side to install the beautiful radiator radiator. The biggest downside of the Core line is dust, to show off the beauty that forces it to accept the dust issue.

8. Case Corsair OBSIDIAN SERIES 1000D

ThuThuatPhanMem.vn

Corsair OBSIDIAN SERIES 1000D is a very large case with Super-Tower size standard. With such a large case, you can fit 2 motherboards into 2 separate sets of computers, but only in one case. And the cooling system of the case is very appreciated with many places to install the cooling fan, exhaust .

9. In-win D-Frame 2.0

Case IN WIN D-Frame 2.0 is a broken version designed with pentagons. At first glance it will look like an old-fashioned dynamite. But not, the product is mainly designed by circular metal pipes linked together to form a frame. Moreover, it is necessary to mention In-win's ability to color when gilded with the beautiful frame of the shiny system.

10. InWin H-Frame

The design of InWin H-Frame is plump and round from many different angles, not unlike his brothers. InWin H-Frame does not come from monolithic aluminum milling but they are cut along many aluminum plates together as models to create a great design.

11. Corsair 570X LED RGB

With a relatively traditional design but covered with glass on the front and hips make Corsair 570X LED RGB more beautiful than many other competitors. Corsair 570X LED RGB has a large size, good support for cumbersome custom water dispersion systems.

12. COOLER MASTER COSMOS C700M

COOLER MASTER COSMOS C700M is a true 'monster'. With a large design, the RGB led strip comes extremely artistic and top notch. But it is worth mentioning that the COOLER MASTER COSMOS C700M has a very solid and tough design. COOLER MASTER COSMOS C700M weighs up to 24kg without the components attached. If we install a complete set of machines, it will be over 30kg is too simple.

13. DeepCool Tristellar SW

To break the way and impress the user, DeepCool has chosen to produce its case unlike anyone else. With a star-like design with 3 wings is a completely different thing. But it will be a bit problematic to use when each wing will handle a separate job that makes you a little confusing when installing.

14. Golden Field G20

The Golden Field G20 excels with the use of large metal scratches and reverses the position of the components horizontally. And put the cooling system down. This is going to be a bit contrary to the current design, but in

return you will get a large space to facilitate the beautiful and creative Custom plumbing.

15. In-Win 805i Design

Like the other cases inside, the design is nothing outstanding, but the front of the case is a large 'infinity' mirror that creates a very different and unique product.

16. In-Win 915 RGB

In-Win 915 RGB with the design of curved edges is very gentle, on the roof of In-Win 915 with RGB Led system comes very creative and unique.

17. Thermaltake The Tower 900

Thermaltake The Tower 900 has a vertical design as high as a high tower and reveals all 3 sides of the case with transparent glass. At first glance, we will see it as a building made of glass rather than case.

18. Thermaltake View 91 TG RGB

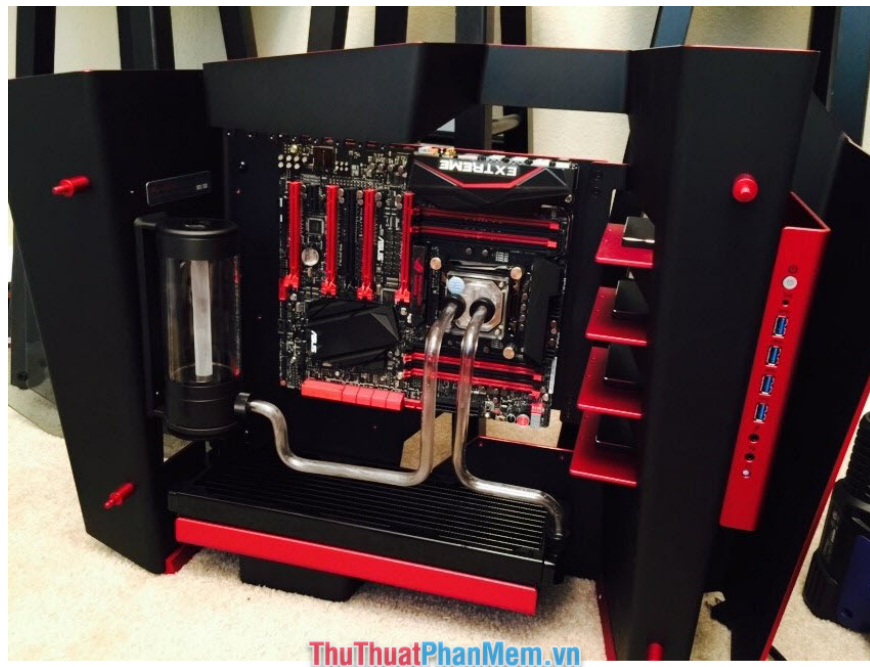

Thermaltake View 91 TG RGB is the most advanced version of Thermaltake's Serie-View family. Nothing stands out beyond the large size that supports modern Custom water radiators and the faces are made of transparent glass to reveal all the components inside.

19. LIAN-LI PC-O11WX

LIAN-LI PC-O11WX with a completely separate design of the power and main compartments makes the case with a huge space on the front giving you a large space to show the internal components.

20. In-Win S-Frame

In-Win S-Frame is designed as an open book and shows all the components inside in the most beautiful way. With In-win, the company is always aiming at users with a lot of customization (water dispersion) but rarely towards general users. Therefore, In-Win S-Frame is very beautiful when created by Modders to create water pipes or expensive water dispersion components.

Thus, Thuthuatphanmem.vn has instructed you the 20 most beautiful and most modern case covers. Have a nice day!
