Google Street View

Google Street View was originally a 360-degree VR map viewer, but it was later developed and added 360-degree photography to its users. But software from Google, we probably don't have much to discuss about performance. With Google Street View, in addition to taking 360-degree photos, you can view 360-degree maps or help Google update more 360-degree maps to your system data. Google Street View is being released for free with both iOS and Android platforms.

2. 360 degree photography application on iOS

FOV - 360 Photos

FOV - 360 Photos from designers from Paris. This is a software that supports users to take free 360-degree photos on phones running IOS. Currently Android does not have this software. The biggest highlight of FOV - 360 Photos is the problem with image data processing. Normally, with other software after 360-degree photography, it will take a fairly long time to process and link those images while FOV - 360 Photos does not take time to process images. On the FOV - 360 Photos system, there are also coordinate points that help users align images more accurately.

The screenshot shows the Google Play Store page for the app 'Fyuse - Ảnh 3D'. The app is developed by 'Fyusion, Inc.' and is categorized as 'Nhiếp ảnh' (Photography). It has a rating of 4.5 stars and 31,740 reviews. A green 'Cài đặt' (Install) button is visible. Below the app title, there is a video player showing two women taking a selfie, with a play button in the center. To the right of the video player, there is a 360-degree photo of a woman standing in front of a brick wall, with a purple arc indicating the 360-degree rotation. The text 'ThuThuatPhanMem.vn' is overlaid on the bottom of the video player.

Fyuse là một ứng dụng chụp ảnh không gian cho phép bất kỳ ai có điện thoại thông minh đều có thể chụp ảnh 3D. Những hình ảnh này, hoặc còn gọi là "fyuse", được tạo ra bằng cách nghiêng điện thoại của bạn hoặc bằng cách vượt màn hình. Fyuse chụp theo không gian chứ không phải thời gian, và cho phép bạn xem các khoảnh khắc từ nhiều góc độ khác nhau, theo nhịp độ của riêng bạn.
