

Top 4 Asus laptops running AMD CPUs have the most impressive performance in the first half of 2020

With the strong rise of AMD Ryzen CPUs, Asus has launched laptops with superior performance compared to the price.

In this article, Synnex FPT will help you choose a high-class laptop model that not only suits your work or gaming needs, but also fits your budget.

Asus ZenBook 14 UM433D

If you are looking for a thin and light laptop, beautiful design but still ensure stable performance to handle graphics and 3D gaming tasks, then Asus ZenBook 14 UM433D is the right choice. Best.

In appearance, with an ultra-thin screen border and compact size, this laptop easily enters the top of the world's smallest and most compact 14-inch notebooks, 16.9mm with a weight of 1.12kg and a size equal to A4 paper. With NanoEdge technology on the 4 sides should be 13% smaller than the previous generation ZenBook UX430. The slim bezel not only helps you have more display space on the same size, but also makes your device look much more comfortable. % sRGB color range and 178-degree viewing angles.

In terms of performance, we can not ignore that it is equipped with the latest AMD Ryzen 5 CPU with integrated VGA Radeon RX Vega, additional 8GB of RAM and 512GB SSD hard drive to increase the ability to handle the work of this product. Owning such an impressive configuration, however, its battery life can completely be up to 12 hours of use thanks to the ability to save power on the latest generation AMD Ryzen CPUs.

Finally, the most special feature of this product is definitely the NumPad range that is integrated directly into the TouchPad to bring a new and creative feeling for users.

Asus D570D

For those of you who prefer a more aggressive style, especially those who need to fight games that require discrete VGA, the Asus D570D will not be missed. Different from Zenbook model, this machine has a sturdy appearance, more unique thanks to black case and blue border as the best point. It is really a product suitable for male gamers or female personality.

Equipped with AMD Ryzen R5-3500U processor (2.1GHz upto 3.7GHz) 8GB RAM, 512GB PCIe SSD and comes with NVIDIA GeForce GTX 1050 4GB GDDR5 graphics card and Radeon™ Vega 8 Graphics. Virtually all current hot titles and graphics tasks can't make this laptop difficult. In addition, the product is full of common connections such as HDMI, USB 3.0, USB Type-C™ and SD memory card slot to connect the device to peripheral devices easily and quickly.

Overall this is a laptop model with a very good price compared to the configuration that it brings

Asus FX505D and Asus FX705D

To cater to specialized gaming capabilities, while still needing a good price, you definitely will not miss Asus' TUF Laptop line. Typically, we have 2 models Asus FX505D and Asus FX705D respectively with 2 screen sizes of 15.6 inch and 17.3 inch fullHD.

The impressive performance of these two products is reflected in the CPU and VGA it is equipped with. The Asus FX505D model will be equipped with Ryzen 7-3750H CPU, 8G RAM, 512GB SSD and VGA GTX 1650 4G. The Asus FX705D model will be equipped with Ryzen 5 3550H CPU, 8G RAM, 512GB SSD and GF GTX 1050 3GB. These are both extremely powerful configurations so that you can handle most types of games on the market at the present time. Depending on the different needs, you can choose the screen version of 15 inch or 17 inch respectively.

In appearance, these two products are equipped with sturdy metal casing, unique and impressive design. Its appearance is customized, making these 2 products completely different from the rest of the market.

And those are four of Asus's most impressive laptops using the new generation AMD Ryzen CPUs in the first half of 2020, in my opinion. Hopefully you have chosen for yourself the product that suits your pocket money.

Asus laptop series running AMD CPUs are being genuine distributed by Synnex FPT in Vietnam market.
