

TOP 4 best gaming laptops today

Gaming laptops are becoming more and more popular, but not all gamers can choose a machine that suits their price, screen width, buttons, color... short content below TipsMake please forward to readers TOP 4 Gaming Laptops with great configuration, standard graphics, comfortable buttons... for gamers to refer to.

Nowadays, gamers not only play games on PC but have gradually "migrated" to laptop models designed specifically for gaming following a general trend of being more compact, thinner, with aggressive design. Very personal and unique characteristics. Below are the TOP 4 Gaming Laptops with great configuration, standard graphics, buttons. we invite readers to "check in" with them.

In a previous article, TipsMake has compiled the best **laptops priced from 4 to 7 million** today, including Acer ES1-531-P913, Asus E403SA-WX0004T, Lenovo IdeaPad 100-15IBY/N3540, Dell Ins N3443. read, users who are students, interested office workers can refer back to it.

THE BEST GAMING LAPTOP MODELS TODAY

Because they are designed and manufactured for a specific group of customers, namely gamers, game testers, game developers. so gaming laptop models often have large designs with A bit aggressive, high configuration, super sharp graphics, vivid sound, standard buttons, nice to use. The leading names in this market include: Acer, MSI, Razer and Dell.

1. Acer Predator 17

Predator 17 was just "launched" by Acer in March this year. Many people believe that it is a beast that dominates the market and is one of the top gaming laptops today.

Acer Predator 17 has an aggressive design with an IPS screen, Full HD/4K resolution; Intel Core i7-6700 HQ processor; 32 GB RAM with 4 slots that can be upgraded up to 64 GB; Internal hard drive combines 256 GB SSD and 1 TB HDD; Nvidia GeForce GTX 980M graphics card.

When sold on the market, Predator 17 comes pre-installed with Windows 10 Home operating system and to own Acer Predator 17 you need to spend about 80 million VND.

2. MSI GT80 Titan

Laptop MSI GT80 Titan is one of the MSI gaming laptop models that is not only huge in terms of screen size when designed up to 18.4 inches, but its weight is also "oversized" - 4.5 kg.

If you are a gamer with a muscular body and love large-sized products, the GT80 Titan will "crush" you at first sight without even adding its parameters. However, we are quite sure in recommending good gaming laptop models for readers and the reason GT80 Titan ranks TOP 2 is due to the configuration and technical details and technology that it is equipped with.

Specifically, the device is equipped (optional - gamers can choose lower) with the highest CPU, Core i7-4980HQ, for processing speed up to 2.8 GHz (Turbo Boost to 4 GHz); 16 GB RAM, 1 TB HDD, 256 GB SSD; Non-removable 5,225 mAh battery provides unified power throughout the product.

Not only that, MSI GT80 is also the first laptop in the world equipped with a mechanical keyboard for extremely comfortable gaming experience. Currently, the selling price of **MSI GT80 Titan** fluctuates between 80 - 100 million depending on the configuration chosen as well as time of purchase and product distributor.

3. Asus RoG G751JY

If the MSI GT80 Titan and Acer Predator 17 are extremely impressive, the RoG G751JY produced by Asus is not really more outstanding. However, each brand has different strengths and with the Asus RoG G751JY, perhaps the first thing gamers will feel is the unique fighter-style design.

Indeed, the Asus RoG G751 JY Laptop is designed based on inspiration from the F-22 Raptor fighter jet; If you are good at studying history and memorizing military and defense knowledge, the F-22 Raptor is the 5th generation "Raptor" fighter that uses 4th generation stealth techniques recognized by the air force. The US military used it to overwhelm the Soviet air force. Returning to the Asus RoG G751 JY, the device has a scratch-milled metal frame that creates a more solid feeling.

The configuration of Asus RoG G751JY is as follows: 17.3 inch IPS screen, Full HD resolution; Intel® Core™ i7 4860HQ Processor; 32 GB RAM, 1 TB hard drive and 512 GB SSD; Nvidia GeForce GTX 980M 4GB graphics card, 5,900 mAh battery. The price of RoG G751JY is about 50 million VND.

4. Dell Alienware 17

In the article TOP 4 Gaming Laptops with great configuration, standard graphics, comfortable buttons., the Dell Alienware 17 Laptop is ranked 4th, however it should be noted - TipsMake does not rate and review Prices are listed in order of superiority and inferiority for readers' reference only.

Alienware 17 was launched by Dell in early 2015 along with Alienware 15 at starting prices of \$1499 (Alienware 17) and \$1199 (Alienware 15), respectively. It was immediately the desire to "occupy" people. gamers. The device has a rugged design, huge configuration but is considered. cheap, at this time the selling price of Alienware 17 in the Vietnamese market is 51 million VND.

The Alienware 17 version of Dell Laptop is equipped with a 17.3 inch screen, Full HD resolution; Intel Core i7-4910MQ processor clocked at 2.9GHz; 16 GB RAM, 1 TB hard drive and 256 GB SSD; Geforce GTX 880M graphics card, 8 GB VRAM.

Above are the TOP 4 gaming laptops with great configuration, standard graphics, comfortable buttons. that TipsMake wants to introduce to readers and gamers for reference. In addition to these high-end models, we can also choose the Lenovo Ideapad 700 15", Dell Inspiron 15 7559 for 23 million or the new ASUS ROG G752

model released in April 2016.

If readers want to play these Android games on your Laptop can be downloaded from BlueStacks and then emulated through **BlueStacks** to play the game; this is an easy and cost-effective method because BlueStacks is being provided for free to users.
