## **Frequently asked questions when changing voice while playing games**

It can be said that voice changing applications bring you many great benefits. However, surrounding that issue, there are still many users wondering and asking questions such as: Is using voice change tools legal? or What is the operating process of certain software?...

Let's help TipsMake answer the above questions here:

## Is it legal to use a voice changer?

Many people are concerned that using their voice may be an illegal act, even causing them some trouble related to the law.

In fact, voice changers change the speaker's timbre and reformat it through effects. These are legal tools, do not violate the law and are not prohibited. You can use these tools in many cases such as joking with friends, integrating, changing the sound in the video to create fun, entertainment,.

However, in case you use voice changing applications for the purpose of committing crimes and performing harmful acts, this issue is completely different. This is considered an illegal act, even a crime of fraud. For example: Using voice changer to threaten, blackmail, scam or bully someone.

In short, the above software does not violate the law but depends on your purpose of use. which can be concluded as legal or illegal. Currently, most cases of using voice changing applications for entertainment purposes are harmless and legal. On the contrary, those who use them for bad purposes can be punished according to the law.

## What is Voicemod's operating process?

First, when you turn on a chat or game application, these applications will receive audio signals from the mic. When an audio signal is detected, Voicemod will process it in real time through selected effects such as: Echo, Distortion, Delay, Panning, Reverb, Chorus, EQ, Auto-Tune, Vocoder , Filters or Pitchshifter.

After the sound is processed, the audio signal will be sent to the output device such as headphones, speakers, recording programs,.
