

# Top 4 smartphones with 'buffalo' batteries today

The criteria for buying a smartphone depend not only on the battery capacity but also on the features and life of the phone. However, you probably won't want your phone to run out of power in emergencies. In this article, TipsMake.com will introduce you to the top 4 smartphones with the longest battery life as well as quite good performance.

The criteria for buying a smartphone depend not only on the battery capacity but also on the features and "life" of the phone. However, you probably won't want your phone to run out of power in emergencies. In this article, TipsMake.com will introduce you to the top 4 smartphones with the longest battery life as well as quite good performance.

1. The most desirable laptop brands in 2017

## 1. Lenovo P2

**Battery capacity:** 5100 mAh

Battery tests show that Lenovo P2 is at the top. The huge battery capacity along with the energy-saving Snapdragon 625 processor creates the perfect combination for long-term use.

Lenovo's P2 series generally has good performance, 32 GB internal memory and 3 to 4 GB RAM (depending on the model you choose). Besides, this phone also uses proprietary fast charging technology from the charger that comes with the device. With a price of about 6 million, this is really a smartphone worth considering.

## 2. Asus Zenfone 3 Zoom

**Battery capacity:** 5000 mAh

Stand right behind Lenovo P2 is an Asus Zenfone 3 Zoom phone with 5000 mAh battery and Snapdragon 625 processor. Besides high battery life, Zoom is also one of the few smartphones that offer optical zoom (no must be digital), with two lenses concentrated in different bands. Besides, it can also take pictures in RAW format if you want.

## 3. Samsung Galaxy A9 Pro

**Battery capacity:** 5000 mAh

">

If you want to buy a smartphone with good battery life and a guarantee from Samsung, don't miss Galaxy A9 Pro. Although it is now more than 1 year old, it is still the line with its highest battery life. Besides, Galaxy A9 Pro also supports 6 inch screen with Snapdragon 652 processor suitable for gamers. Not only that, this phone also does a good job of optimizing software to get the best battery performance.

## 4. Blu Studio XL 2

**Battery capacity :** 4900 mAh

Blu Studio XL 2 has a 6-inch screen, 16 GB internal memory, 2 GB RAM, 13 MP camera and MediaTek 4-core processor. With such specifications, the capacity of 4900 mAh battery will help the device to be used for a long time.

If you are looking for a smartphone with a high battery life, you can refer to the 4 devices above. Wish you choose the product like that!
