

Top 5 Android TV Box models worth buying today

Smart TV only supports certain features, not as diverse as the Android operating system. Because of that, manufacturers have developed Android TV Box to help TVs use the Android operating system. Here are the Top 5 Android TV Box models worth buying today.

The current technological era is extremely modern, all TV products are equipped with new generation Smart TV technology. But Smart TV only supports certain features, not as diverse as the Android operating system. Because of that, manufacturers have developed Android TV Box to help TVs use the Android operating system. Here are the Top 5 Android TV Box models worth buying today.

1. KiwiBox S10

In today's TV Box products, the KiwiBox S10 surpasses competitors with its super-high configuration with Mali-T820 GPU and 2GB of RAM. KiwiBox S10 has a beautiful design, possesses a huge configuration and good cooling system that helps KiwiBox S10 maintain a stable temperature for a long time of use. KiwiBox S10 has 2 Wifi reception antennas for added stability and supports Dual-band 2.4Ghz and 5.0Ghz. About the connection ports of the KiwiBox S10 include: 2 HDMI ports, 1 USB Type-C port, 3 USB ports (2 USB 2.0 ports, 1 USB 3.0 port), RCA, Coaxial, Optical ports.

KiwiBox S10 uses Realtek RTD1295 processor to support 4K @ 60fps, 10-bit, ULTRAHD image quality. 4K resolution is a huge burden for TV Box because if it is not strong enough, the lag phenomenon occurs continuously. But the Mali-T820 graphics chip, equipped on the KiwiBox S10, is strong enough to handle this task.

2. ZIDOO Z9S

ZIDOO Z9S has a luxurious design made of scratched metal. If you are afraid of TV Box losing the area and space on the table to TV, ZIDOO Z9S is a decoration accessory, not a TV box. The aluminum shell on ZIDOO Z9S also has another use that is cooling the internal components. ZIDOO Z9S is equipped with Realtek RTD1296 64-bit quad-core chip, Mali-T820 MP3 GPU, 2GB DDR3 RAM, 16GB eMMC internal memory, Gigabit LAN, dual-band Wifi (2.4G / 5.8G 802.11ac), Bluetooth 4.1.

ZIDOO Z9S integrates various imaging technologies such as 4K HDR to make wider dynamic contrast and display more colors. ZIDOO Z9S supports 4K @ 60fps and 4K UHD Blue-ray image quality with 10 bit H.265 / HEVC color system.

3. Mibox TV

If you already know the coverage of technology products from Xiaomi, Mibox TV is too familiar to you. Mibox TV has had many different generations and drastic improvements. For Xiaomi manufacturer, Mibox TV is still based on a delicious - nutritious - cheap method. Mibox TV has an ultra-thin design, the product does not have any protruding beyond a soft rounded edge. Mibox TV looks like a luxury jewelry box. But inside that compactness is a powerful configuration with Amlogic Cortex-A53 Quad-Core 1.5GHz and Mali-450 GPU with 2GB of RAM.

The control of Mibox TV is also worth mentioning because it has been simplified to look much more luxurious and modern. The keys on Mibox TV have been shortened to leave only the main keys. Mibox TV supports 4k HDR resolution for crisp resolution. The system runs on Android 7.1 platform. But the unfortunate point on Mibox TV is probably the connection port is still limited when there are only 3 ports.

4. Clip of TV Box

Clip TV Box is a product from Vietnam that is quite familiar to many people. Clip TV Box will give you the ability to experience Youtube, Netflix, Game, . The configuration of Clip TV Box is at an average price because it is mainly aimed at Vietnamese users. Clip TV Box is equipped with a quad-core processor with 2GHz speed and 1GB RAM.

Clip TV Box has a small and beautiful design, suitable for all users. In particular, the control of Clip TV Box is also optimized when removing all the "cumbersome" keys and leaving only the main key cluster on the control.

5. Vinabox X9

Vinabox X9 excels at a fairly soft price and supports many different features. Vinabox X9 has a slim and square design. The highlight of Vinabox X9 is the "flying mouse" - moving the mouse cursor by aerial control. Vinabox X9 uses RK3229 CPU with support for 4K60fps technology, giving users a great experience. Vinabox X9 uses Android 5.1 operating system and comes preloaded with many exclusive applications.
