

# Top 5 best 3D interior design software

Choosing one of the 3D interior design software programs such as AutoCAD, 3Ds Max, etc., will help us design household and office furniture such as tables, chairs, beds, cabinets, etc., in the fastest way possible.

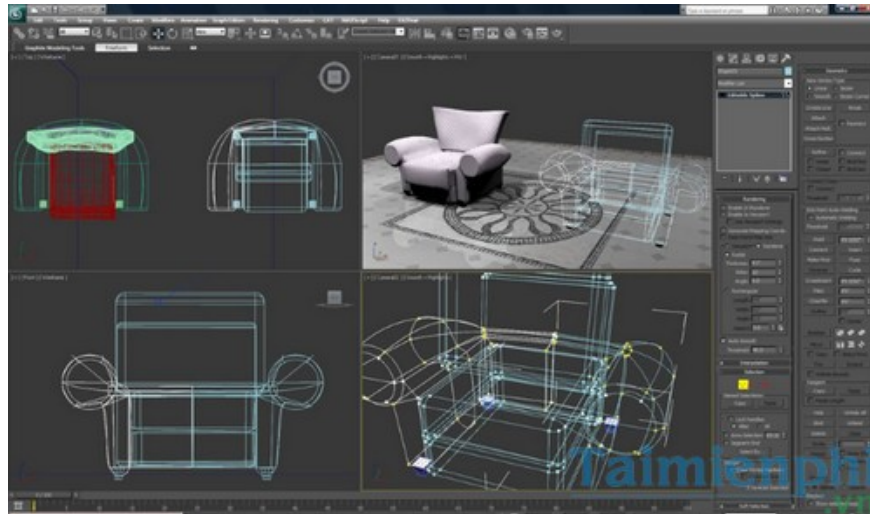

The most prominent name among 2D and 3D designers is probably AutoCAD. This software is quite convenient as it supports keyboard shortcuts for basic AutoCAD commands. Mastering basic **AutoCAD** commands allows users to work faster, creating 3D interior designs much more quickly and easily than using a mouse. In the following article, TipsMake will list some of the best 3D interior design software currently available, giving you more options for your design work.

List of simple and professional 3D furniture design software.

## 1. Autodesk 3Ds Max

Autodesk 3Ds Max software has many useful features. It can create 3D graphics for game applications, animated films, and visual effects. Therefore, using Autodesk 3Ds Max to create 3D interior designs is a very simple task. People passionate about interior design, design school students, and professional designers often choose Autodesk 3Ds Max as their default software on their computers.

At first glance, the Autodesk 3Ds Max interface seems quite feature-rich and difficult to get used to. However, with guidance and a willingness to learn, you can become proficient in using this software within a few days.

## 2. SketchUp

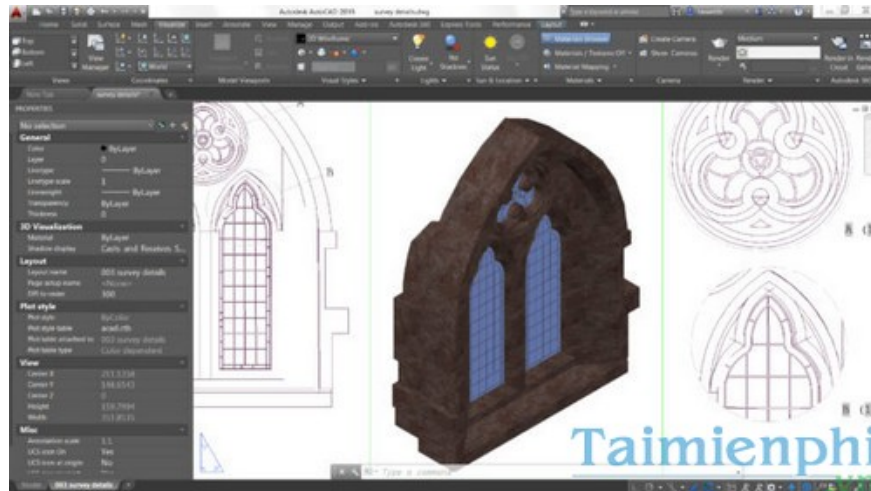

Many people still commonly refer to SketchUp as Google SketchUp because the application was owned by Google for a long time. SketchUp is one of the most basic interior design software programs available today, helping beginners in 3D interior design create their own designs.

This software has a very user-friendly interface. With two versions, SketchUp Make (free) and SketchUp Pro (paid), users can choose the version that best suits their work requirements.

## 3. Autodesk AutoCAD

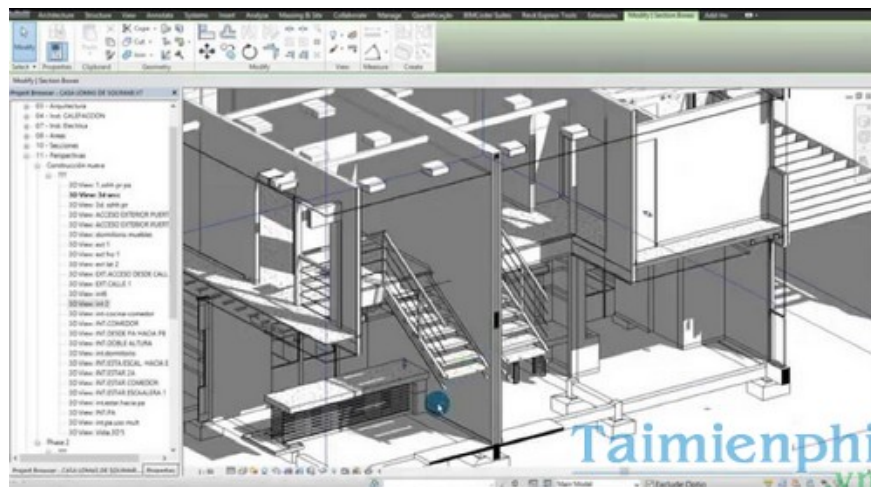

This is the name we mentioned at the beginning of the article, a software that is already very famous among 3D graphic designers. Although Autodesk AutoCAD has a complex design and is difficult to get used to, its position remains strong as it is always the top-preferred tool in architectural and interior design companies.

#### **4. Autodesk Revit**

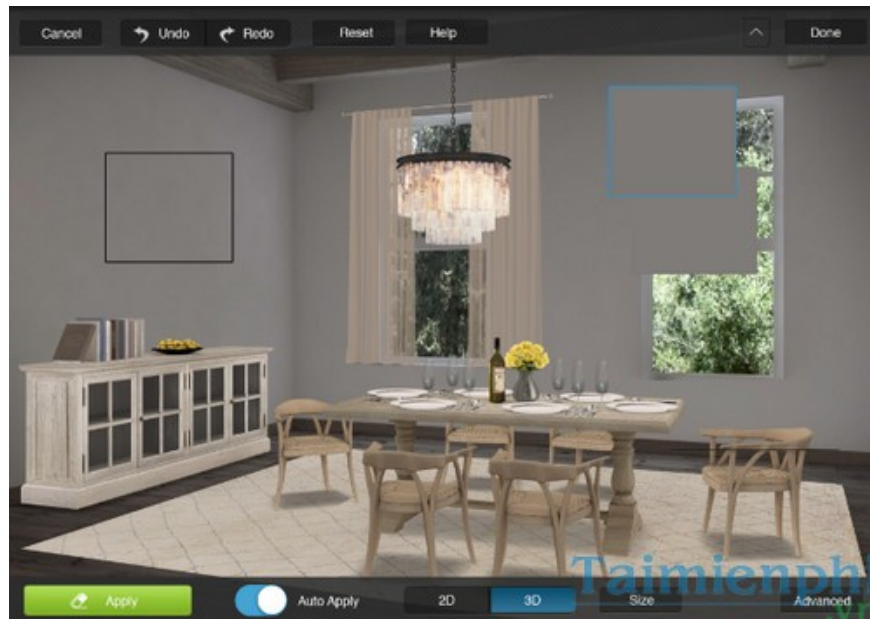

Autodesk Revit is more than just 3D interior design software. Its capabilities extend far beyond that, enabling the design and construction of large-scale projects. Highly skilled engineers often use Autodesk Revit to design buildings and public works with high precision.

Taimienphi.vn advises that you should only switch to Autodesk Revit if you have been working in the interior design field for many years and have extensive experience using the aforementioned software.

#### **5. Autodesk Homestyler**

One final name on the list, quite popular with Vietnamese designers, is Autodesk Homestyler. Autodesk Homestyler software has the advantage of easily planning and designing detailed houses, including doors, windows, floors, and interiors, through its accurate simulation features.

Another advantage is that Autodesk Homestyler is easy to use and not as complicated as AutoCAD or Revit. That's why it's chosen by many Vietnamese designers.

Of the top 5 best 3D interior design software programs we just introduced, which ones have you already used? Try these tools to make your design process as simple as possible. Additionally, you should also explore professional interior design apps to use on your phone.

3D graphic and interior design files often contain many details and are very large. Therefore, users should know how to reduce CAD file size. This is especially important for designers using AutoCAD; knowing how to reduce CAD file size is essential for sending files quickly and easily via Gmail or Facebook without size limitations.
