

# Top 5 best coal players 2019

After a long time of being forgotten, the charcoal plate is now in fashion and in need of return. Here are some of the best coal players you can consider and choose for yourself the most suitable one.

After a long time of being forgotten, the charcoal plate is now in fashion and in need of return. But to play music from a coal disc, you need a coal disc reader. If you're looking for a coal disc player, you're in the right place. Here are some of the best coal players you can consider and choose for yourself the most suitable one.

**Note:** The price of the disc player in this article is for reference only at the time of writing, subject to change. You should contact the seller to get the most accurate price.

## The best coal heads

1. House of Marley Stir It Up Turntable (4.7 million VND)
2. Audio-Technica ATLP120USB (5.3 million VND)
3. Rega RP3 (VND 18.6 million)
4. Bluetooth Turntable JOPOSTAR (1.6 million VND)
5. Victrola Vintage Suitcase Turntable (nearly 1 million VND)

### 1. House of Marley Stir It Up Turntable (4.7 million VND)

Stir It Up Turntable is a product from House of Marley, the audio equipment company sponsored by the son of Reggae legend Bob Marley, Rohan Marley. With the reputation of his father, House of Marley focuses heavily on high quality and environmentally friendly sound products.

The music player has a two-speed coal disc that is controlled by belt drive, capable of playing music at 33RPM or 45RPM. Belt and rotation speed control are both indispensable for a high quality audio transmitter. It also has a self-start feature, which shortens playback time for music discs. You can also replace Audio-Technica MM.

The main body of the locomotive is made of bamboo origin. Slipmat is made of REGRIND silicone of the company, including waste after consumption is recycled. The disc player is equipped with a 3.5mm headphone jack and a USB port for recording coal discs.

## **2. Audio-Technica ATLP120USB (5.3 million VND)**

Audio-Technica is one of the popular high-end professional audio brands. If you've ever been to the recording studio, you'll probably come across an Audio-Technica device there. The needle tip of this coal disc generator is even used on other disc wheels, including the Stir It Up player above.

Audio-Technica ATLP120USB is one of the company's best coal disc players. This machine is designed to provide an optimal playback experience. The S-shaped tonearm, aluminum disc and slipmat all contribute to the excellent sound.

This device is controlled by direct drive mode, so there is no additional belt rotating the disc. It has three playback speeds, 33RPM, 45RPM and 78RPM. Like many modern coal players, it has a USB output, allowing you to record coal discs.

## **3. Rega RP3 (VND 18.6 million)**

The Rega RP3 is one of the remarkable vinyl players on this list. That is thanks in part to the incredible sound quality and partly thanks to its history. Rega has been producing vinyl players in the UK since 1973. Planar 3 was originally produced in 23 years since 1977.

RP3 is the latest version of Planar 3, aimed at rich audio lovers. Prior to being known as a record player, Rega produced successful and widely used mechanical hands in the world. To match the previous model, you can find the company's RB330 engine here.

Unlike the other transmitters on the list, this is not a modern vinyl player designed to take advantage of refreshed charcoal plates. It is an evolution of one of the world's most popular vinyl players. Rega RP3 does not have USB output, Bluetooth or computer software. RP3 does not come with a needle tip, you can choose it yourself.

#### **4. Bluetooth Turntable JOPOSTAR (1.6 million VND)**

Bluetooth Turntable JOPOSTAR is also a good player worth considering. It is equipped with many modern features at a moderate price. However, the sound quality is not very good.

This music player looks like a traditional charcoal player with a solid wooden look. The plastic case has hinges that protect the music player from dirt. JOPOSTAR Bluetooth Turntable has two common needles, you can upgrade these if you want higher quality audio.

It has a USB port on the back so you can record and digitize the disc. It also comes with two built-in stereo speakers that provide extra sound. In addition, this disc player has stereo output if you want to connect to your speakers. It has Bluetooth connectivity so you can stream wireless player audio to headphones or speakers.

## **5. Victrola Vintage Suitcase Turntable (nearly 1 million VND)**

If you want a high-mobility vinyl player, Victrola Vintage Suitcase Turntable is the music player you need. The player head is in a suitcase-like shape, so you can lock it and take it with you. However, it does not have an internal battery, you need to plug it into an electrical outlet to use.

This music disc player can operate at speeds of 33RPM, 45RPM and 78RPM. It has a 3.5mm jack for plugging in speakers or headphones. It also comes with integrated speakers, although the quality is not very good.

Victrola Vintage Suitcase Turntable also has Bluetooth so you can wirelessly stream vinyl discs to speakers or Bluetooth headsets. This is a low-cost disc player on this list, and is a great choice for those who are just beginning to enjoy the disc.
