With the complicated traffic situation like in Vietnam, the Dashcam is like a "life buoy" in emergencies. In this article, Software Tips will send to you the Top 5 best dashcams for cars today.

1. VIETMAP iDVR P1

If you are interested in products from Vietnam, you can not miss VIETMAP iDVR P1. VIETMAP iDVR P1 is currently being sought by many users because it is cheap but the features are extremely "top notch". The first highlight of VIETMAP iDVR P1 is the integrated screen mirror, which directly replaces the rear mirror for cars. So we have both a screen, a mirror, and a camera in one product. Not stopping there, in VIETMAP iDVR P1 also integrated 2 Journey cameras in parallel (1 Front and 1 Rear Camera). The features integrated on VIETMAP iDVR P1 can be mentioned as follows: Automatically display the rear camera if you install the reverse gear R, have a standard road map in Vietnam (developed and updated by Viet Map) update), Android 5.0 operating system, 3G connection to surf the Web, listen to music, watch movies, play Wifi, locate cars online, etc. With such features, VIETMAP iDVR P1 deserves to be at the top of the best Dashboard cameras for cars. In fact, according to users, the integration of 2 parallel journey cameras before and after helps them avoid the "nuisance" controversy after an accident.

You can watch the Video below to understand more about VIETMAP iDVR P1:

2. Xiaomi Yi Car 2

Xiaomi is often referred to as "the king of cheap technology", and Xiaomi Yi Car 2 is also a true product to that analogy. The product is relatively priced and suitable for everyone's purse, it only has more than 1 million VND only. So when we spend 1 million dong on Xiaomi's products, what do we have? Xiaomi Yi Car 2 can record at up to 2K resolution and the width of the viewing angle up to 165 degrees makes it possible for you to see very wide in front of the car. The Xiaomi Yi Car 2 version has been upgraded quite a lot from its predecessor such as: Improved light collection, reduced noise in the evening, color balance, increased sharpness . and it received a lot of positive feedback from user. On the Xiaomi Yi Car 2, a 2.7 "screen is available so users can directly watch the videos without the need for ancillary equipment. On the Xiaomi Yi Car 2 is also supported with the ADAS feature to help alert the image lane to the driver to take effective preventive measures.

3. Lets View HD-300M

Let's View HD-300M is a product from Korea, it possesses a lot of different technologies, not just Dashcam. The first is that we will have 2 Dashcam that work in tandem with the front and rear of the car. On Let's View HD-300M is also integrated many different recording features such as:

1. When picture on the move: Default recording mode and collision mode
2. When picture when parking: Detect front and rear motions and collision mode

With these features, Let's View HD-300M will give users more peace of mind from those "careless" riders. The Let's View HD-300M's front camera will have an HD resolution of 1280x720p with a 110 degree lens and the Rear Camera will have a resolution of 720x480p with a 120 degree lens. It also supports GPS for vehicle positioning and directions. On Let's View HD-300M is also equipped with ADAS feature to alert the collision to the user.

4. VietMap A50

Continuing to be a product from VietMap, it seems that in the Journey Camera segment in Vietnam, VietMap is doing very well and is liked by users. VietMap A50 has many outstanding features such as Full HD recording, running Android operating system, supporting S1 navigation . VietMap A50 is equipped with front and back camera, when you set the reverse gear, the rear camera will automatically is enabled for use as a Reverse

Camera. The product is equipped with 5.0 "touch screen for direct use, the screen has a high brightness so it" defies "even the glare of the sun. On the rear camera of VietMap A50 supports 8 LED light bulbs Super bright to reverse, de vehicle during the night without difficulty.
