

Top 5 best duplicate file deletion software on Windows

Introducing you to the 5 best software for deleting duplicate files on Windows, these are considered to be the best and most used ones.

For many computer users today, they often have the habit of copying and moving files or documents across many different folders, this will make the computer work slower than usual, because over time The duplicate files will appear more and more quickly filling the hard drive.

To help you solve this problem, here I will introduce the 5 best software to remove duplicate files on [*Windows*] that you should not ignore.

1. Duplicate Cleaner (Pro) Software

Duplicate Cleaner is one of the leading file removal software I want to recommend to you. This software is considered very compact but equipped with a lot of modern features.

In this application, you will be able to easily find duplicate files by searching by keyword, file format such as PDF, doc or jpg, according to the specific search period. In addition, you can also search and scan zip files and hidden folders.

The Scan Location feature allows you to perform detailed searches in any folder on your computer. This search engine works very fast because they use a method of comparing files of the same size. It only takes about 2 minutes for this software to search for duplicate files on all drives.

Once you've completed your search, you can just go to individual groups of folders and delete all the duplicate files, or you can also delete entire folders at once to save time.

Duplicate Cleaner software allows you to try it free for 15 days. You can then purchase the Pro version if desired.

You can download this software [here](#).

2. Duplicate File Remover Software

If you want to use a simple software to clean a few folders, but do not need many features, the software [*Duplicate File Remover*] will be suitable for you.

To use this software, please click *Add Folder* below to proceed to select the folder from your computer. After selecting a folder, click the *Scan* button to let the software scan and sync all your files in that folder.

This will help remove duplicates that are located in that directory without spending much time cleaning up the entire drive like other software.

The Duplicate File Remover software is now available on the **Microsoft Store** and can be downloaded [here](#).
