

Top 5 best free VPN software for computers today

In the age of Internet service providers constantly blocking many different websites in Vietnam, using VPN is a great solution. Software tips will introduce to you the Top 5 best free VPN software for computers today.

In the age of Internet service providers constantly blocking many different websites in Vietnam, using VPN is a great solution. However, if you use unreliable VPNs, you will probably be harmed by the exploitation of personal data. However, in the world there are many very good free VPNs, in this article, Software Tips will introduce to you the Top 5 best free VPN software for computers today.

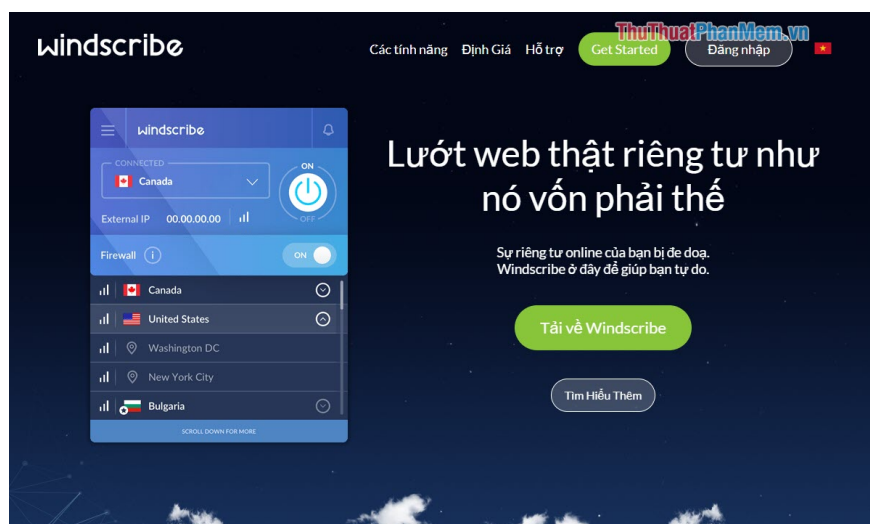

1. Hotspot Shield VPN

In fact, Hotspot Shield VPN is not the top VPN software but it is the top free VPN software. In free VPN platforms for users, Hotspot Shield VPN is rated best thanks to the large number of servers, stable operation speed and not being splashed during use. However, we are free users so every day you can only use Hotspot Shield VPN for 30 minutes and the system is not relatively much advertising. Because we use it for free, this is perfectly acceptable. Hotspot Shield VPN has a lot of commitment to users about the privacy of personal data as well as data in the user's computer so you should feel secure to use.

2. Windscribe VPN

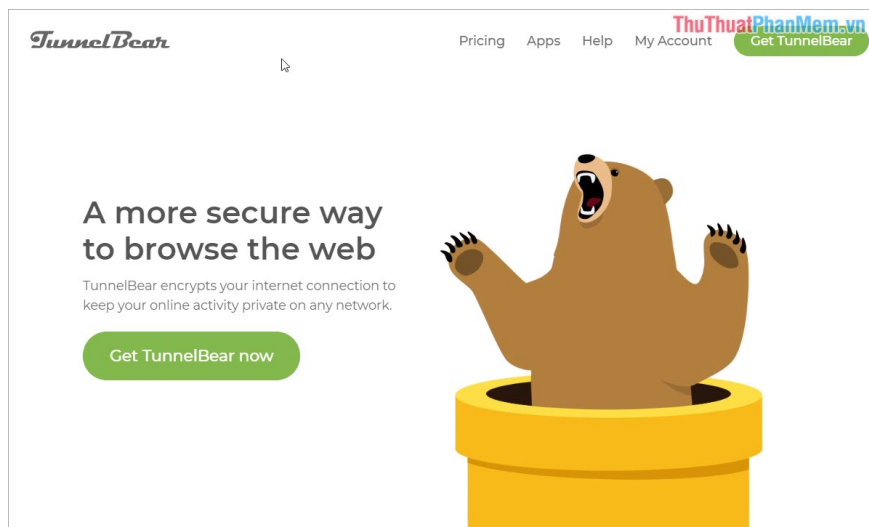

The next name we need to mention in the Top of those free VPNs is Windscribe VPN. Windscribe VPN has very good policies for free users such as: maximum 10GB / month. This is an impressive level of capacity for those who often have to use a VPN to secure personal information. The connection speed of Windscribe VPN is impressive, but the number of Windscribe VPN servers is still limited and some are not available. In terms of

security, Windscribe VPN is also highly appreciated when it integrates many encryption features into the software and has ad blocking available.

3. TunnelBear

TunnelBear is one of the good VPN tools because it supports a lot of features like super fast Web surfing speed, 256-bit high security encryption protocol. TunnelBear server systems are numerous and spread all over the world to ensure user connectivity. However, for free users, TunnelBear only allows use of 500MB / 1 day. This is a relatively small number but it will be suitable for those who need high speed and not access much in a day.

4. ProtonVPN

If you need to find a completely free and unlimited bandwidth VPN tool then ProtonVPN will be the first choice. The software is provided free of charge to users with unlimited bandwidth but you will have to trade with the access speed. The free usage speed is somewhat slow and slightly unstable but it is also a good solution for those who want to use it for free. ProtonVPN software also has a high security system (according to Swiss privacy) so you can safely use it.

5. hide.me

hide.me will be the last ranked VPN software because it offers relatively low free storage. For free accounts, you can only use 2GB / 1 month, this is a pretty "prison" number for those who often use VPN. However, hide.me supports Download Torrent users, so it is also highly appreciated. The security of hide.me is also highly appreciated when it complies with the laws of many different countries and the hide.me server is located in Europe.
