

Top 5 best keyboard test software

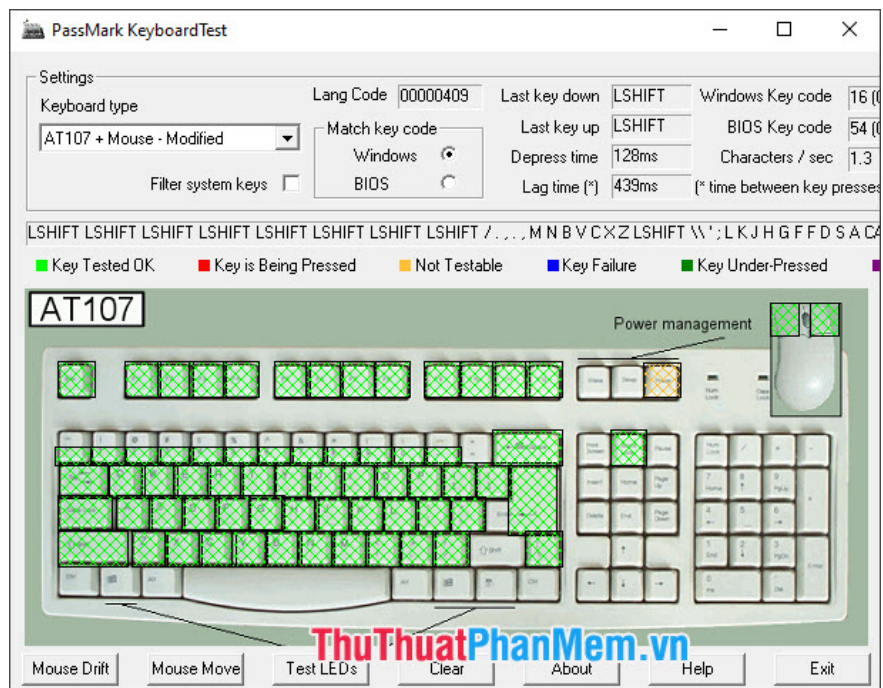

Top 5 best keyboard test software. The keyboard is an important means of input on a computer, but it is also a tool that can easily be damaged by impact or weather (hot, humid) that cause a short circuit and cause the keyboard to malfunction or even function. is causing your computer to make confusing errors and even blue screen errors.

The keyboard is an important means of input on a computer, but it is also a tool that can easily be damaged by impact or weather (hot, humid) that cause a short circuit and cause the keyboard to malfunction or even function. is causing your computer to make confusing errors and even blue screen errors.

In the article below is a list of 5 best keyboard test software that you can reference and use.

1. PassMark KeyboardTest

PassMark KeyboardTest is a comprehensive keyboard testing software with a simple and easy to use interface. In addition to checking keys, the software also allows you to test mouse click features such as Left click, Right click, Middle click.

The software also supports users to check response time when releasing (Depress time) and delay (lag time). For models that support LED backlighting, the software also provides Test LEDs for you to check the level of light on your keyboard.

This is a small utility shared on the Geekhack forum so let's click on the attachment as shown below to download:

Tool **Aqua Key Test** is evaluated as their safe and check with the software **Kaspersky Internet Security** without finding any hazards.

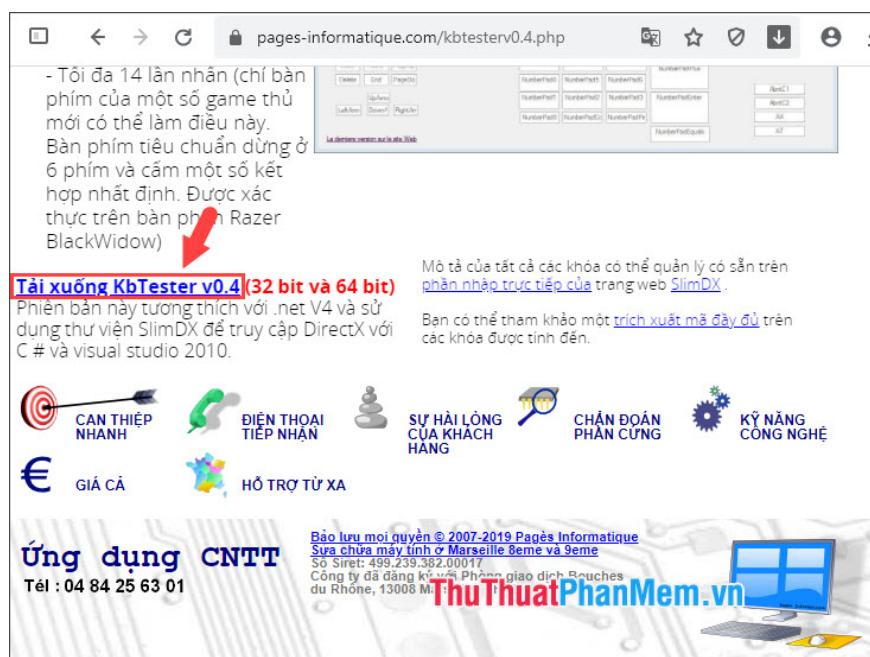

5. KbTester

KbTester utility is a free application from the French software company that helps you to check whether the common features on the keyboard are working normally or not. Software with interface used in French and a little English should probably not be popular with us Vietnamese. However, this is also one of the free keyboard testing software worth a try.

Link to download the software at <https://www.pages-informatique.com/kbtesterv0.4.php>

Because the site is all French, use the text translation feature on Chrome, Coc Coc to translate the website. Next, click **Download KbTester** to download the software to your computer.

With the fast and accurate keyboard testing tools, readers can find out the status of your keyboard and feel secure to use it. Good luck!
