A nasal nasal aspirator is a specialized product for the treatment of rhinitis, sore throat, bronchitis, pneumonia in both children and the elderly. Sore throat or nasal spray with nebulizer will effectively treat the disease, but it is very safe for health. To find a cheap, durable, nasal nasal ventilator you can refer to the 5 best nasal nasal aspirator codes on the market below.

Nasal nasal aspirator is a very necessary medical device for every Vietnamese family. Nebulizer is usually equipped with 2 masks that can be used for both children and adults. Using a nasal spray machine will help patients do not need to take oral medication, limit a lot of side effects caused by the drug and lessen the health.

Extremely small particle-size nasal aspirators will go into the alveoli for effective treatment of upper respiratory tract inflammation, pneumonia, bronchitis effectively.

The nasopharyngeal nasal ventilator is extremely simple to use, just put the inhaler under the doctor's prescription into the medicine cup, plug the power cord into 220V power and press the ON / OFF button to be usable.

So what kind of diseases does the nasopharyngeal machine treat?

Nebulizer is used to support in treating some respiratory diseases such as:

1. Laryngitis
2. Tracheal inflammation
3. Bronchitis
4. Pneumonia
5. Sinusitis or chronic inflammation like asthma.

Top 5 best aerosol generators today

1. Omron NE-C28 nasal aspirator

Omron NE-C28 nasal aspirator is a series of nebulizer from Japanese brand used by many mothers. Omron NE-C28 designed with unique virtual valve technology (VVT) helps the medicine to be well protected, safe and hygienic. The size of small, fine air particles (5 microns) helps penetrate into the alveoli, thereby improving the effectiveness of treatment. Air injection speed of 0.4 ml / min (according to weight loss).

Omron NE-C28 nasal aspirator comes with 5 spare filters, throat mask for adults and children.

Specifications:

1. Air injection speed: 0.4 ml / min
2. Advanced plastic materials
3. Capacity: 7ml
4. Warranty: 24 months

2. Philips Essence nasal aspirator

Philips Essence nasal aspirator is a device used to treat some respiratory diseases such as bronchitis, asthma, laryngitis. Philips Essence nebulizer using SideStream technology, medicine is transferred from Liquid form to mist spray is less than $5\mu\text{m}$ to help alveoli, lungs easily absorb drugs, thereby limiting the harmful effects of side effects due to taking drugs.

Short treatment time is only about 6-8 minutes. The airflow with a molecular weight of less than $5\mu\text{m}$ accounts for a high percentage of 77%, easily absorbed through the breath, resulting in a high therapeutic effect.

Specifications:

1. MMAD: 2.9mm.
2. Particle particles are smooth, small 77% below 5mm.
3. Duration of treatment (2.5ml): 6-8 minutes.
4. Average flow: 6 lpm / 10 psig - 7 lpm / 10 psig.
5. Maximum flow rate of 8.0 lpm - 9.3 lpm
6. Brand origin: Netherlands
7. Warranty: 36 months

3. Nebulizer, Beurer IH-25/1 throat

IH-25 is a device that supports the treatment of respiratory diseases in children and adults. Machine compact design, large compression pressure, spraying in mist form with extremely small particle size 0.2 ~ 8 μ m so easily absorbed and dilute sputum to help patients easier to breathe and increase treatment effectiveness sick.

Specifications:

1. Dew particle size: 0.2 μ m ~ 8 μ m
2. Compression pressure: 0.8 bar
3. Accessories: Electrostatic gourd, air duct, 2 broken masks
4. Capacity: 8ml
5. Made in: Germany
6. Warranty: 24 months

4. Nasal aspirator 2 in 1 Dotha Health Care - Nebulizer

Nasal aspirator 2 in 1 Dotha Health Care is the only nasal nasal aspirator in Vietnam that combines 2 functions in 1 product: nasal nasal spray, nasal discharge. Dotha Health Care uses unique virtual valve technology, minimizing the amount of drug loss. Small particle size of about 3-5 microns in diameter helps penetrate into the alveoli, to bring the best treatment effect. Dotha Health Care - Nebulizer runs smoothly, saving power and absolute safety for users.

Specifications:

1. Maximum amount of inhaler: 5ml
2. Medicine particle size: 0.2 - 8 μ m
3. Average size: 2 μ m
4. Breakout capacity: 13ml (cc)
5. Drug consumption:> 0.2 ml / minute
6. Air injection volume: 11.8 ~ 15.6 L / min
7. Fluid tank capacity: 330ml
8. Suction pressure:> = 10 ml / min

- 9. Brand origin: Vietnam - Japan joint venture
- 10. Warranty: 24 months

5. Air compression nasal aspirator NE-C801KD (used for children)

NE-C801KD air nasal aspirator is recommended by the Vietnam Respiratory Association, so it is very safe for young children. NE-C801KD aerosol has 2 different types of masks with different sizes, so it can be used for both babies and young children. The medicine cup is designed with virtual valve VVT technology, for high efficiency, which helps to reduce the amount of wasted medicine to a minimum.

When used, the NE-C801KD children's nasopharyngeal aspirator extracts a small, 3 micrometer fine granule size into the alveoli to help treat respiratory disease effectively.

Specifications:

1. Current intensity: 0.8 A
2. Advanced plastic materials
3. Weight: 270g
4. Brand origin: Japan
5. Warranty: 24 months
