If before any player could pass long, now only players who specialize in this skill have a higher chance of passing accurately.

Not only that, the defense mechanism has also been upgraded. You can now tackle more or fly to block the opponent's striker's shot. This makes each attack less easy, forcing you to focus more on your defense.

The animations and thrill of opening packs or buying new players in eFootball PES are on par with FIFA. Furthermore, the game also constantly updates the transfer market from the top 5 leagues in the world and allows gamers to create their own squads according to their preferences.
