

Top 5 best Video editing software

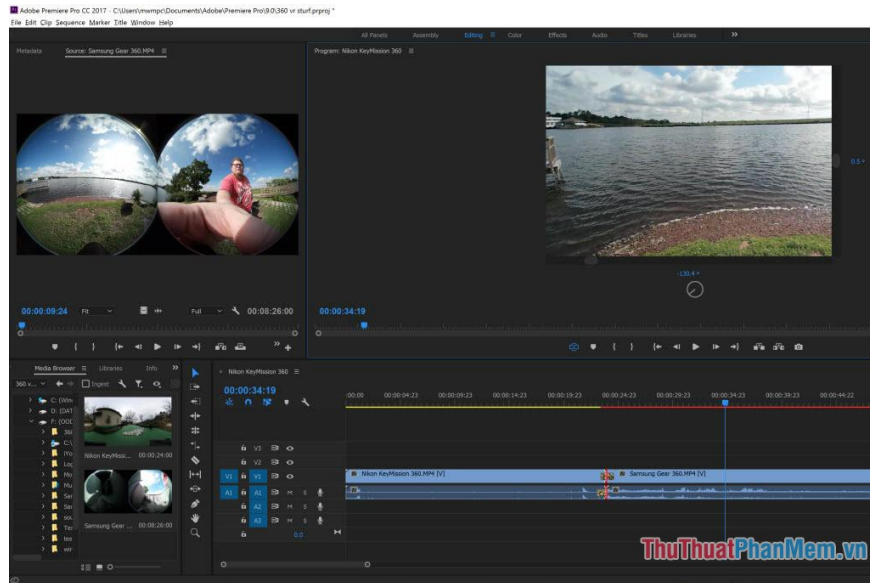

Top 5 best Video editing software. Video editing is an increasingly popular skill and one that almost everyone wants to own. Nowadays, a lot of people are successful with youtube and of course they have to have video editing skills

Video editing is an increasingly popular skill and one that almost everyone wants to own. There are a lot of successful people out there right now and of course they have to have video editing skills to do that. If you are looking to learn video editing and search for your own success, one thing that is indispensable is video editing software. However, on the market today there are too many different video editing software, depending on the goals and budget of each person will choose for themselves the appropriate software. The following article of TipsMake.com will help you classify and choose the top 5 best video editing software today, invite you to refer.

1. Adobe Premiere Pro (Best video editing software)

When it comes to video editing software, Adobe Premiere Pro will be the first mentioned and that is for good reason. The first is about the features, any features you might need in a video editing software, and I'll bet Premiere Pro has it. The editor is not only powerful but also has a clear and familiar interface. But, the best part about using Adobe Premiere Pro is the ecosystem it supports. All other tools that Adobe provides you with a seamless connection to Premiere Pro. Whether you're using Photoshop for photos, After Effects for animation, or Adobe Audition for audio editing, everything works fine with Premiere Pro. When you buy Premiere Pro, you don't just buy a video editor instead of you're entering an ecosystem that gives you access to some of the best creative tools available. If you are looking to become a professional video editor, I recommend using Premier Pro instead of any other video editing software in the world.

Supported platforms: Windows, macOS

Supported input formats: MP4, MPEG, MPE, MPG (MPEG-1, MPEG-2), M2V (DVD-compatible MPEG-2), MTS (AVCHD), MOV, FLV, AVI

Supported output formats: H.264: AAC, 3GP, MP4, M4V, HEVC (H.265), MPEG-2 and MPEG-4, among others

Price : \$ 19.99 / month (Annual invoice)

2. Final Cut Pro X (The best video editing software on Mac)

If you're a Mac user, I don't think you should consider buying any editing software other than Final Cut Pro X. The only reason to choose any other software like Premiere Pro is if you invested a significant amount of time in learning some other video editors and recently switched to Mac. However, if you're just starting to edit videos, Final Cut Pro is the best option for you because it's a beast on a Mac. Apple's software only syncs with their hardware, so you get the best performance possible. However, it's not just performance, because Final Cut is as powerful as any other video editor on this list. Not only that, if you are a beginner and willing to invest time and money in this software, you will find that it is one of the easier-to-use video editing software. As I said, If you're on a Mac and you can afford it, buy this without hesitation.

Supported platforms : macOS

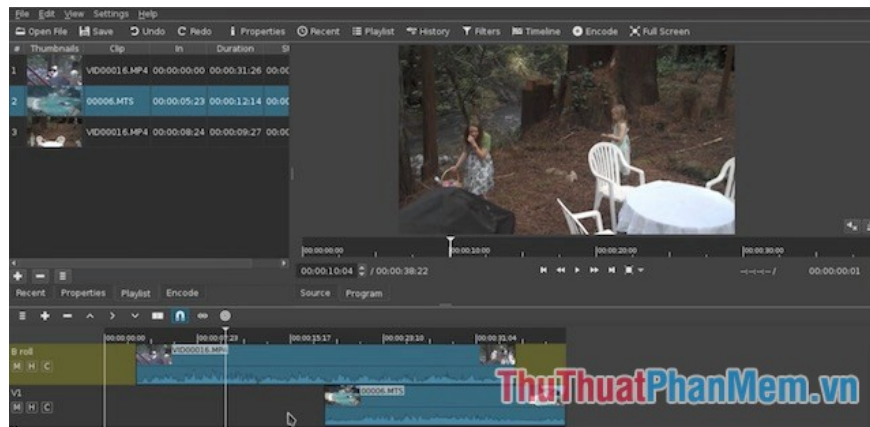

Supported input formats : H.264, Apple animation codec, Apple ProRes (all versions), AVHCD, DVCAM, DVCPR0 and more

Supported output formats : Apple Pro-res, H.264, HDV, MPEG and HDV among other formats

Price : \$ 299.99

3. Shotcut (Best video editing software for Youtube)

If you are a YouTube person and you need a software that is not only free but doesn't cut features, consider **Shotcut**. Shotcut is a free and open source video editor that gives you all the editing tools you need. Because the editor is open source and completely free, if you are a beginner, this is a great way to learn the basics of video editing without investing any money. Most video editors follow the same basic editing concepts, so when you're ready to switch to professional editing software like Premiere Pro or Final Cut, things won't be too hard. The best part of Shotcut is that although it's free, it doesn't cut too many features. The editor supports various audio and video formats with a wide selection of effects and color correction tools. Additionally, Shotcut is available for Mac, Windows and Linux, so regardless of which operating system you're running, You can install and use Shotcut on your device.

Supported platforms: Windows, macOS and Linux

Supported input formats : Based on FFmpeg thus supporting most video formats

Supported output formats : H.264, WebM, ProRes, MPEG-2 and other formats

Price : Free

4. Adobe Premiere Elements (Video editing software for beginners)

If you are a Windows user and looking for a good beginner-friendly video editing software, Adobe Premiere Elements is the software for you. At \$ 99.99, it's not cheap, however, I still think it's a good choice for beginners who are willing to spend some money. Those looking for a free option should choose the Shotcut mentioned earlier (the best video editor for YouTube). Premier Elements is a great stepping stone for those who are just starting to edit videos and later want to become professional with Premiere Pro. You will also love its sleek interface and its intuitive and natural editing environment. It also comes with all the video editing tools that you will need as a beginner. If you are serious about video editing, you should start with this software.

Supported platforms : macOS, Windows

Supported input formats : H.264 (.mp4, .m4v), QuickTime encoded H.264 (.mov, .mp4, .m4v), MPEG-1 (.mpeg), MPEG-2 (. m2v, .mpg) and others.

Supported output formats : H.264 (.mp4), QuickTime encoded H.264 (.mov, .mp4), MPEG-1, MPEG-2, MPEG-4 and other formats

Price: (\$ 99.99)

5. Cyberlink Power Director 16 (Good color video editing software)

If you can't afford expensive software, you should consider Cyberlink Power Director 16. This software provides you with a great editing environment. Despite its low price, Power Director 16 is not inferior to other software when editing videos. It is updated regularly and always adds the latest features. This is one of the first video editing software to support 360-degree video editing. The software also focuses heavily on color correction and

gives you lots of tools to get the perfect color on your video. Other features include support for multiple audio, video and image formats along with Multi-cam editing support.

Supported platforms : Windows

Supported input formats : H.265 / HEVC, MVC (MTS), MP4 (XAVC S), FLV (H.264), MPEG-4 AVC and more.

Supported output formats : H.264 AVC, WMV, H.265 HEVC, XAVC S and more.

Price : (Starting at \$ 99.99)
