

## Step 2:

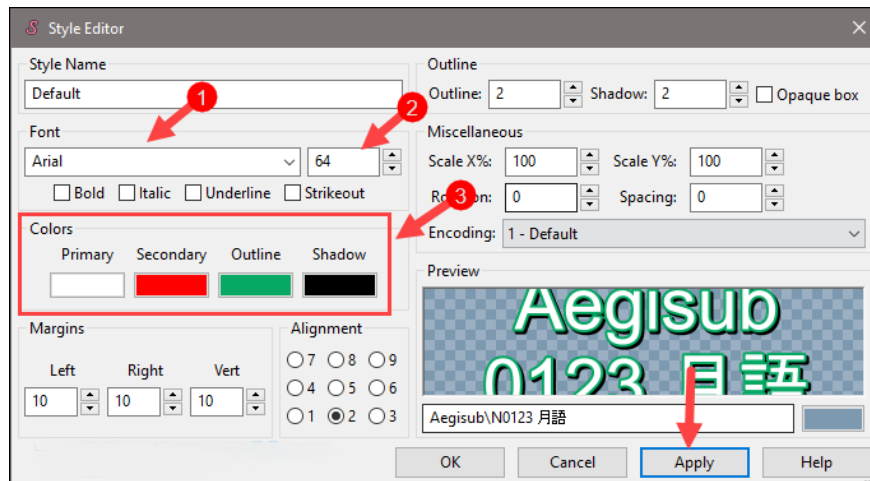

- First, click Play (1) to run the video.
- Next, after the dialogue starts, press button (2) to determine the time to start displaying subtitles.
- Then when the dialogue or song ends, press button (3) to end the sub.
- Now you press pause video (4) to write sub for the segment we just determined.

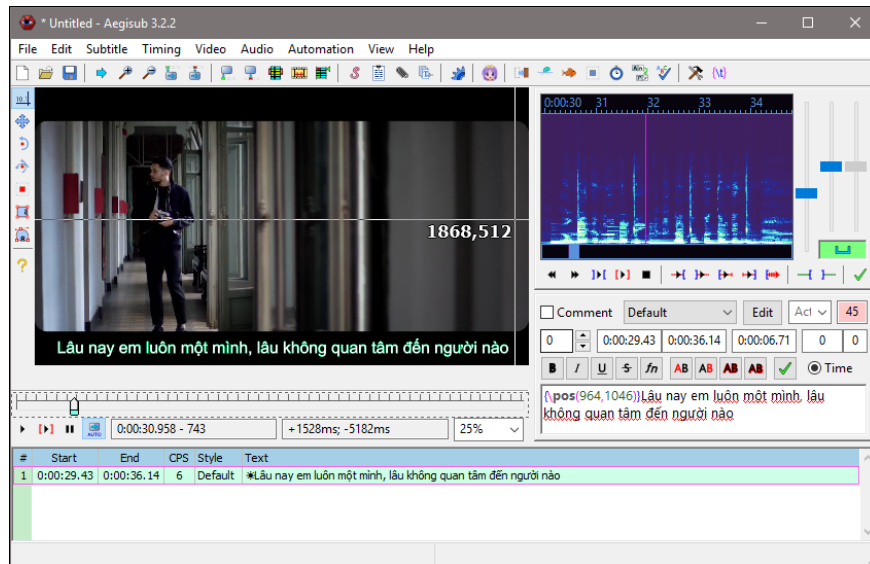

**Step 3:** After having the starting and ending points of the dialogue, enter the subtitles in the blank box on the right and then click **Edit** to adjust the font size.

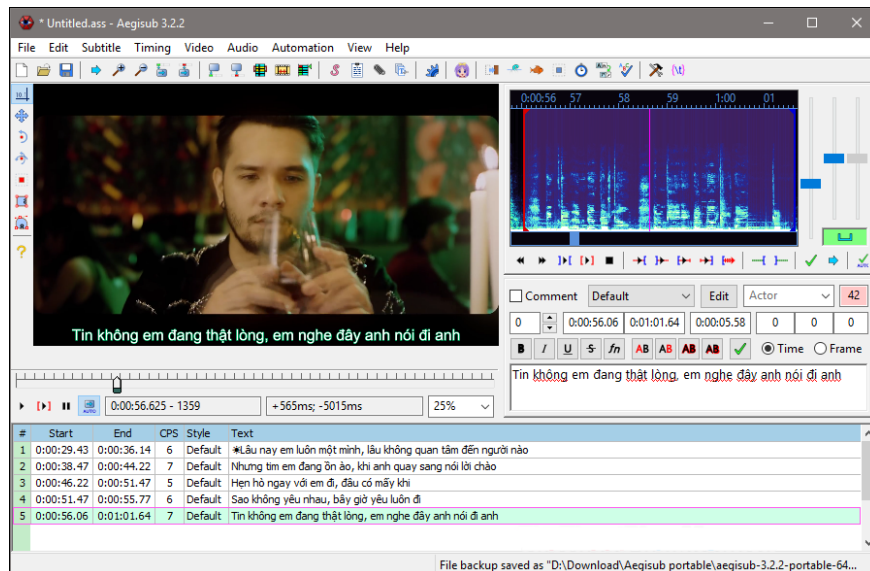

**Step 4:** The **Edit** window appears, you can adjust the font (1) , font size (2) and color (3) for your subtitle. Then click **Apply** and **OK** .

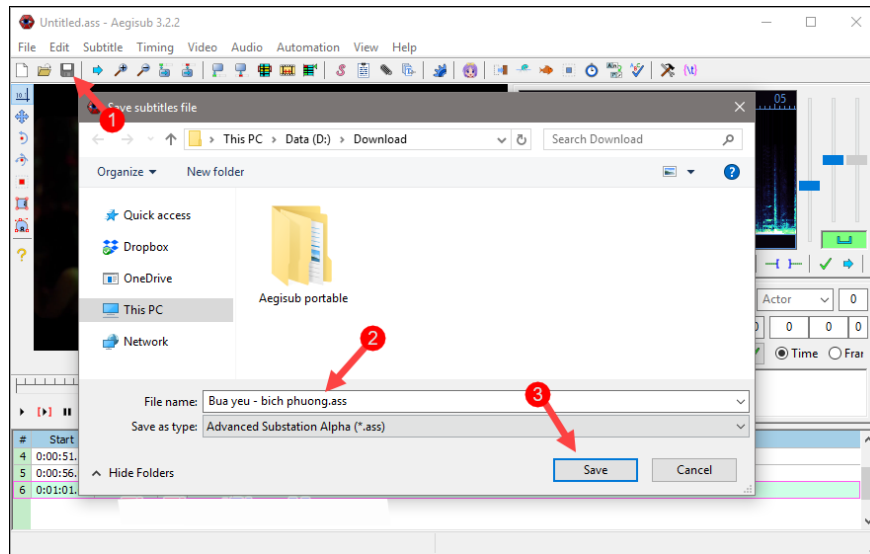

**Step 5:** After editing, click **Play** to see if the subtitle is suitable or not.

**Step 6:** After completing the first subtitle, press **Enter** at the end of the text to move to the second paragraph. Do the same until the end of the video:

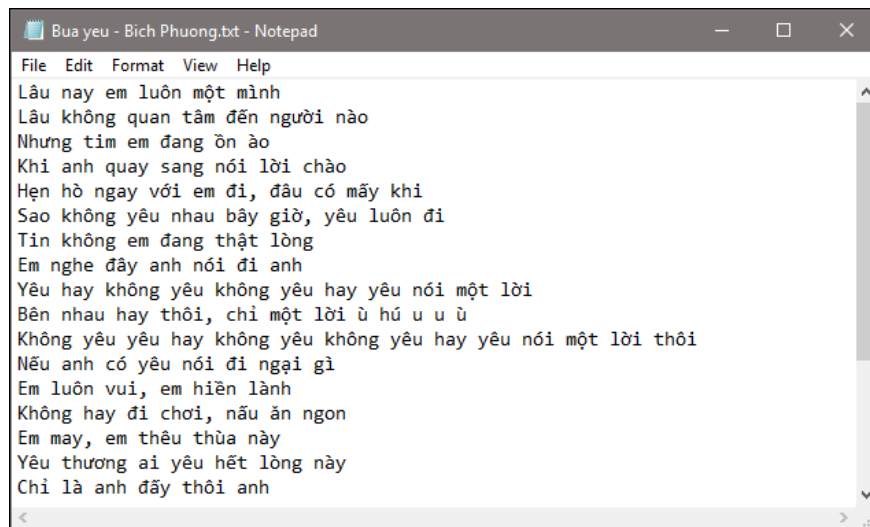

**Step 7:** After completing the subtitle creation process, save the subtitle file by clicking the **Save** button , then name the sub file and click the **Save** button .

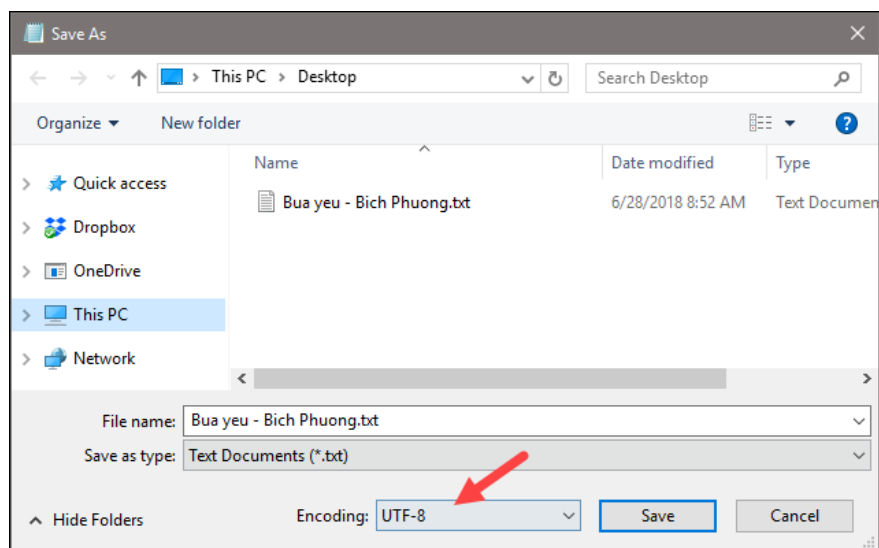

The above method is suitable for creating movie subtitles, but if you are creating subtitles for music videos, you can do it faster by typing from the subtitle line.

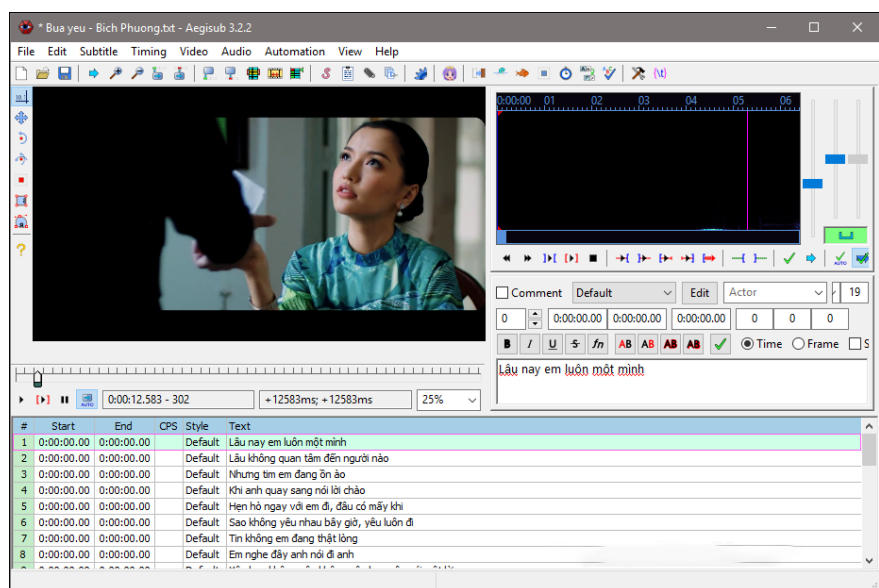

Copy the lyrics and save them in a .txt file as shown below:

Note when saving text files you must choose UTF-8 format to avoid font errors.

Then open Aegisub software, select **File -> Open Subtitles** . and open the text file you just created. If a message appears, click **OK** .

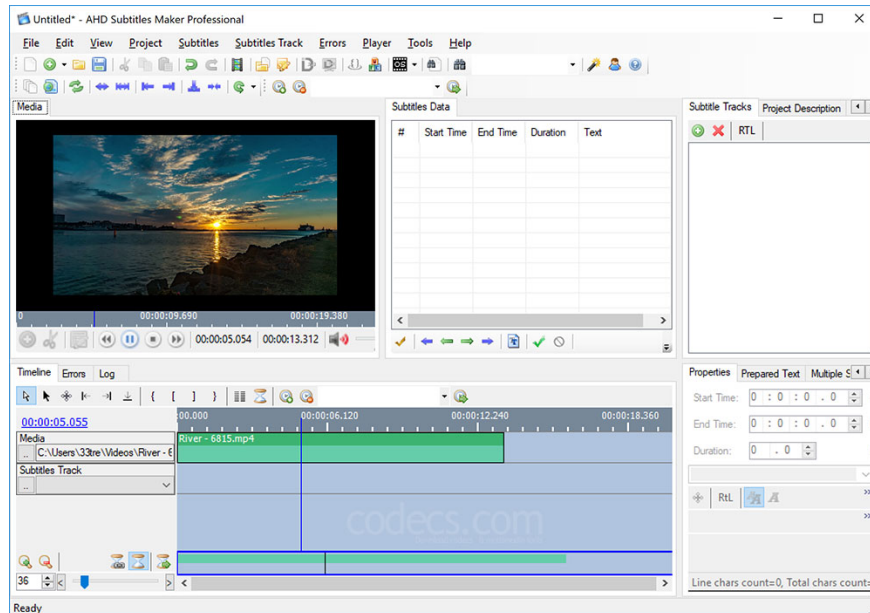

And you will see the subtitles appear, your job is just to align the timing for each song and you're done.
