

Top 5 best VPN apps for Android

On the current Android operating system, there are many VPN application developers. In this article, the Software Tips will introduce to you the Top 5 best VPN applications for Android.

Currently, the use of VPN is one of the things that is quite common for people using Android device devices specifically. With the benefits that VPN gives users, it is huge. On the current Android operating system, there are many VPN application developers. In this article, the Software Tips will introduce to you the Top 5 best VPN applications for Android.

1. NordVPN

NordVPN is one of the leading applications because of its extremely large coverage with 5200 different servers located in 60 countries around the world. In addition, Nord's VPN also has useful features such as blocking ads when you surf the Web to save data. With NordVPN software, the manufacturer has divided many options for users such as: Free and paid use with corresponding features. If you only need a software to access VPN normally, do not require any other features, NordVPN is more than enough for you to use. NordVPN is also one of the editors' top rated and selected VPN apps on the Google Play Store.

Security from cyber threats

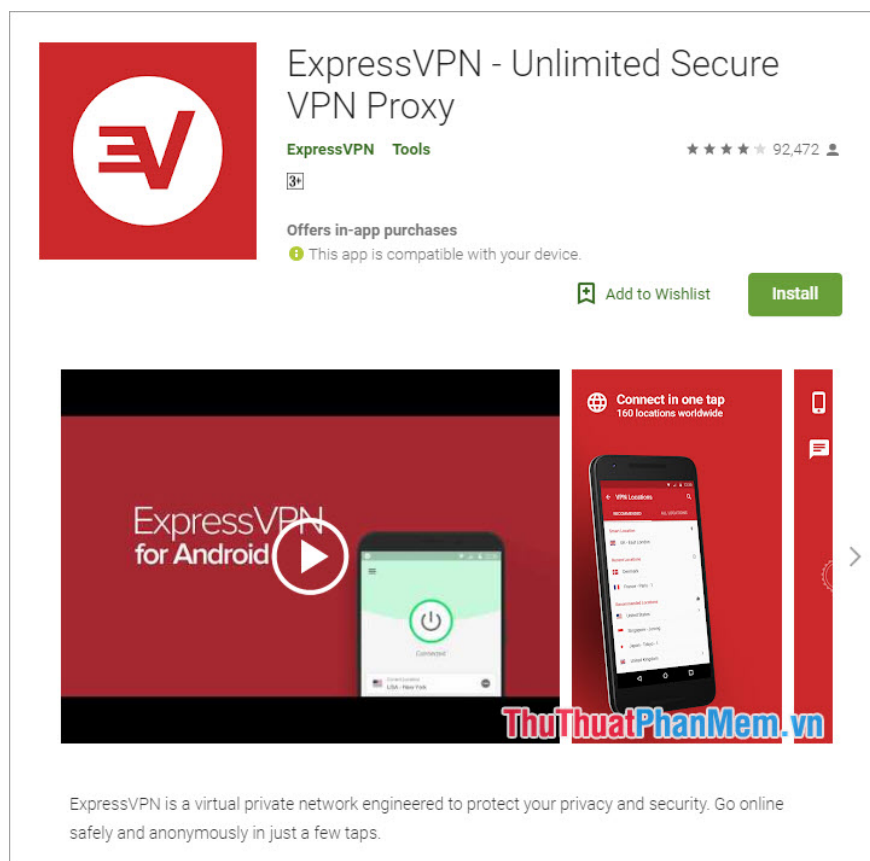

Looking for the best VPN for Android? The NordVPN app lets you enjoy secure and private internet access in just a single tap – on your smartphone, tablet, or your Android TV.

PCMag Editors' Choice and recommended by CNET, NordVPN is the No. 1 VPN service for more than 12 millions users worldwide. Now that's a very private club. Join now!

2. ExpressVPN

ExpressVPN is highly rated with fairly fast access speeds of up to 83Mbps upload speed and 100Mbps download speed at the server. This speed will not be fixed due to the number of devices accessing the server, location, . But this is also a good result of ExpressVPN. ExpressVPN is suitable for all different Android operating systems, including old, low-speed versions of ExpressVPN. The most outstanding feature on ExpressVPN is suggesting the VPN servers around you so that you can get the fastest and most effective experience. ExpressVPN is also greatly appreciated in the market of VPN applications today.

Connect in one tap
160 locations worldwide

ThuThuatPhanMem.vn

ExpressVPN is a virtual private network engineered to protect your privacy and security. Go online safely and anonymously in just a few taps.

3. Surfshark

Surfshark is a relatively small VPN server provider, but they are more focused on user experience than market expansion. Surfshark's experience is far more effective than other software, even though VPNs are not that numerous. But in certain geographical areas, Surfshark VPN is still very strong and provides users with effective connection. Surfsharkd has two strong protocols, OpenVPN and IKEv2, which allow for unlimited connections.
