

Top 5 diary writing applications on iPhone, Android best

In the old days, we wrote diaries on paper and pens, but now with modern technology, we can write diaries on our phones. In this article, Software Tips will introduce to you the Top 5 journaling applications on the best iPhone and Android phones.

Journaling is one of the simplest ways to keep track of all meaningful activities in a day. Usually, girls like to write in journals and they often reread the book every spare time to find themselves growing up day by day. In the old days, we wrote diaries on paper and pens, but now with modern technology, we can write diaries on our phones. In this article, Software Tips will introduce to you the Top 5 journaling applications on the best iPhone and Android phones.

1. INSIDE

Surprisingly, INSIDE is an application developed by Vietnamese people, the application developer has the nickname Bui Ty (Bui Quoc Ty) and this is a highly appreciated product. However, despite being a product from Vietnam, the developer is strongly targeting the international market. INSIDE Diary has a beautiful interface and thousands of different effects. On the homepage of INSIDE, you will see an interface similar to Facebook and has a News item (Story) to update for each day. Compared to other journaling software, INSIDE has a lot of differences for you to explore and experience. Currently, INSIDE is being released for free, so please try to experience the product from Vietnam to see the quality.
