Top 5 Folder software, extremely secure folder lock. Make sure anyone who uses a computer stores data on it, which can contain a lot of important, even private information. So the security of the data is an indispensable need, because otherwise, your data can be completely accessed by others.

Make sure anyone who uses a computer stores data on it, which can contain a lot of important, even private information. So the security of the data is an indispensable need, because otherwise, your data can be completely accessed by others, deleted, or monitored by spyware. In this article, I would like to share the top 5 Folder software, extremely safe folder lock today.

## 1. IObit Protected Folder

One of the most reliable file and folder locks for PCs, IObit has improved the quality of its products with Protected Folder. Its interface is very simple to use, and to get started, you just need to create a password and confirm it. Then, drag your files or folders into the software window, and they will still be protected from outsiders. Lock - exit - complete, that's the **Protected Folder** .

### Highlights:

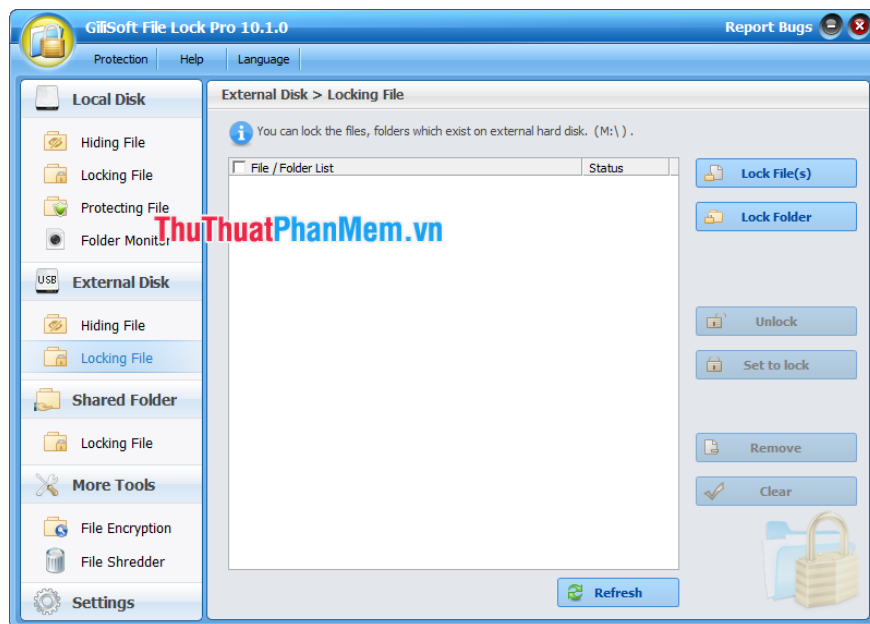

- Your data will also be safe from malicious attacks or spyware.
- You can customize details like lock options, passwords, languages ??and more. - Very easy to install and use.

**Download link:** IObit Protected Folder

**Operating system:** Windows 2000 and above

## 2. GiliSoft File Lock Pro

GiliSoft's motto is that your data and documents are always really important, and they will not be compromised for anything. Whether you are in any industry, use GiliSoft File Lock Pro, a file and folder protection software created for all types of users. You can also lock folders that are not only on the internal drive, but also on flash drives, USB drives, memory cards and LANs. Just select what you want to lock and then click on "Lock".

### Highlights:

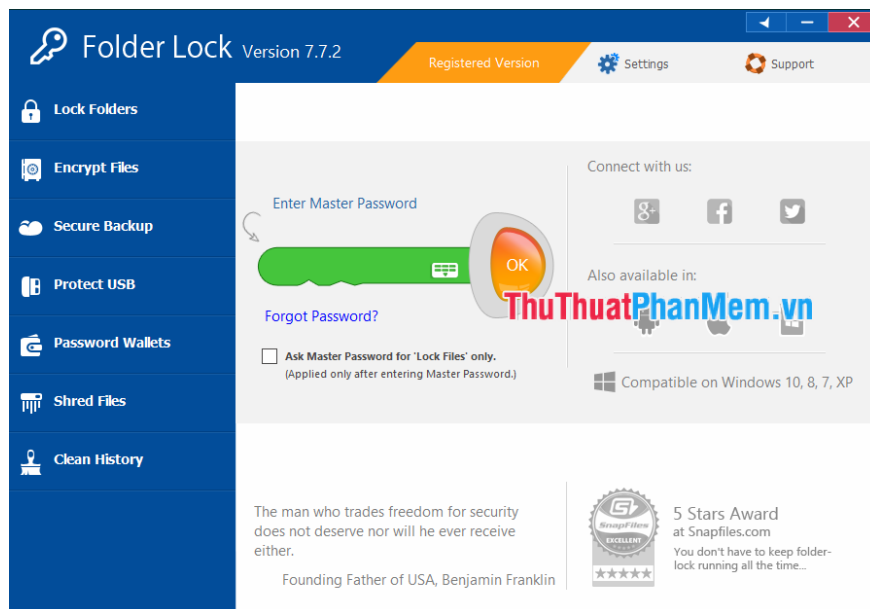

- Stay away from malicious attacks and privacy leaks.
- Available in 7 languages.
- Alarm if someone tries to access your directory via the wrong password.

**Operating system:** Windows 2000 and above; macOS 10.14

## 3. Folder Lock

Folder Lock is a file locking software as its name implies, acting as an "all-in-one" solution with full of directory features such as password protection, encryption, real-time backup, destroy files and delete history in seconds. With a few simple steps, you can protect your USB drives, hard drives, email attachments, CD drives, and even your wallet with the chosen password.

### Highlights:

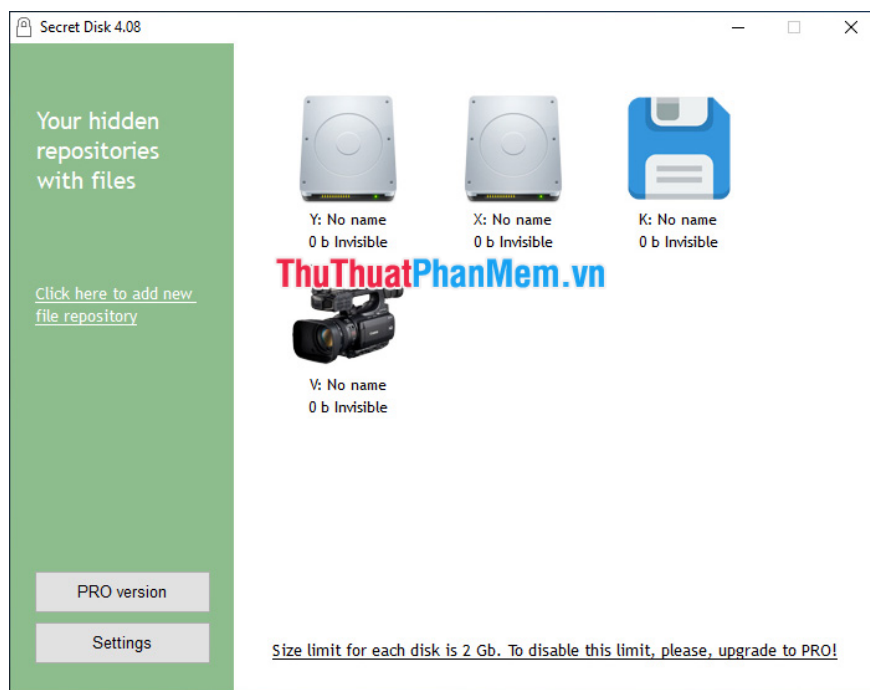

- Set a master password to avoid entering multiple passwords for different files.
- Data will not be lost because of automatic backup.
- Works in the background and saves information about wallets, passwords and cards.

**Operating system:** Windows XP and above

## 4. Secret Disk

Secret Disk is not only a file locking software but also separating a new disk space and locking it with a password. You can "make" your private files and folders invisible and protected. Although it doesn't provide encryption features for files, you just need to lock them with a secure password.

### Highlights:

- If the power goes out or Windows fails, your secret drive will automatically be hidden and locked.

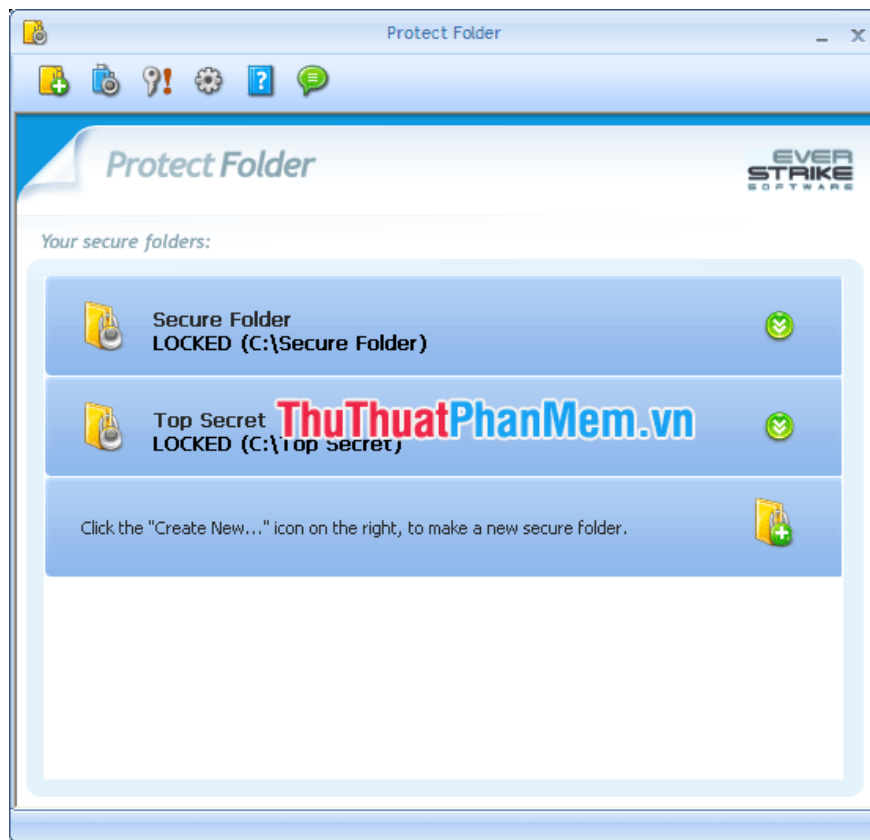

The free version allows the maximum capacity of a secret drive to be 2 GB, while the paid version has no capacity limit and allows creating multiple drives.

**Operating system:** Windows XP and above

## 5. Protect Folder

Another nice "lock" folder locking software for Windows is Protect Folder, which helps you create your own folder and protect it with a strong password. But the interesting thing is that it encrypts your files quickly and helps save them even on external drives. Just double click on the protected folder and enter the right password, you will have full access to your private data, just like any other folder.

### Highlights:

- Complete data security with encryption features.
- Emergency lock is a feature not to be missed, helps lock all folders with just one hot key.
- Time-out feature to automatically lock files after a certain period of time.
