

Top 5 high-end laptops 2020 running well with graphics and gaming

Laptops for graphics and games must invest in high-end machines with strong performance. The manufacturers also often divide gaming laptops, laptops that specialize in design. The options are 'huge' enough to balance both the graphics and the following gaming that are not easy to find.

Here is a list of 5 high-end laptops that help you run well with graphics and gaming to help you get work and play done at home.

1. MacBook Pro 2020 (Note: install windows with Bootcamp)

The MacBook has always had a certain place in the laptop industry. And the highest-end, most powerful Pro line of course can meet even the most demanding needs with the ability to multitask smoothly. The latest generation MacBook Pro 2020 is equipped with a 10th-generation Intel chip and provides 80% faster performance than its predecessor. New integrated Intel Iris Plus graphics card with support chip makes graphics smoother.

The MacBook Pro can be said to be perfect inside and out. The stylish monolithic design, class of the product is still in the old style but is made thinner and more flexible. The new Magic Keyboard keyboard design is also appreciated for being easier to press, responsive, quiet and less noise.

Referring to the MacBook, there is no need to talk about power or durability

2. Laptop for graphics and gaming - ASUS ROG Zephyrus S Laptop

ROG - Republic of Gamers is the gaming product line of Asus. So we need not have any doubts about the gaming capabilities of this laptop. Besides, it is powerful enough to serve graphics software.

Unlike many other gaming laptops, the device is thin, compact to be flexible when it is needed to move, although the colors and decorative details are still gaming. With ultra-thin screen bezels, we have the same machine size as 14-inch laptop despite the actual 15-inch screen. 1080p resolution is not too impressive, but in return the large screen refresh rate - 144Hz and 3ms response time minimizes lag.

Zephyrus S runs on 9th generation Intel i7 or i9 chip. According to the test, the machine can open 40 browser tabs at the same time and still play heavy-configuration games like Shadow of the Tomb Raider. So using Photoshop, Lightroom or Illustrator is a small thing.

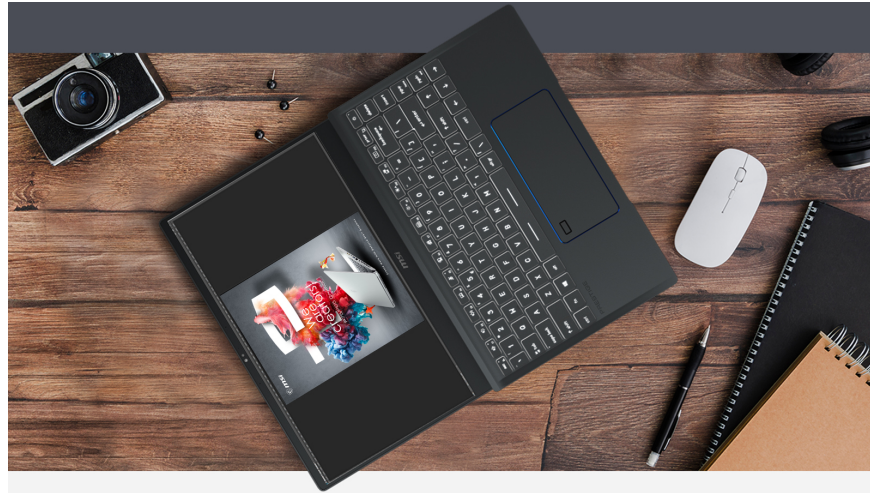

Even though ROG Zephyrus S is a gaming laptop, there are a few details devoted to making graphics

3. MSI Prestige 15 laptops

MSI is famous for its gaming laptops, but the MSI Prestige 15 is the product for many needs from office work to gaming and entertainment. Its design is therefore also light and elegant, total weight is only 1.6 kg with exquisite monolithic aluminum shell.

As a high-end laptop for both games and graphic design, the 15-inch screen is large enough and has high resolutions up to 4K. In addition, it also has MSI's exclusive True Color color technology for true-to-life images.

The laptop has up to 2 heatsink fans, 3 heat pipes with Cooler Boost 3 technology. Along with that is the familiar new generation Intel chip, DDR4 RAM and high-speed SSD storage with specific parameters.

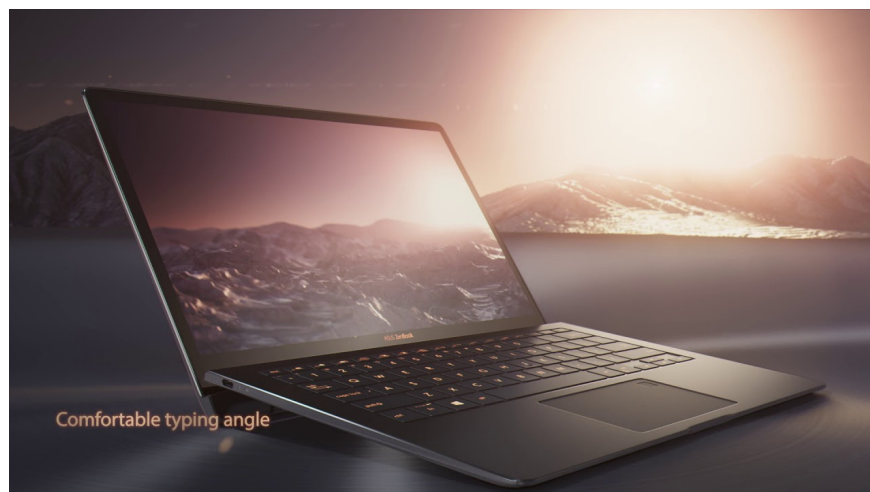

The MSI Prestige 15 has 2 memory drives, maximizing storage space

4. ASUS ZenBook S laptop

ZenBook is the famous high-end laptop line from Asus for many years. The ZenBook S is for those who need both the internal power and the thin and light look and feel that they don't want to make a huge investment in buying a budget device like the MacBook.

The laptop's aluminum outer shell is made of a characteristic concentric pattern, which has its own character. The size of the device is like a file bag so it is easy to carry with you when meeting, need to move. Asus ZenBook S has a smart design, when you open the lid, push down will tilt 5.5 degrees to release natural heat.

The screen has an impressive maximum brightness of 323 nits, 116.4% of the sRGB color range, although the resolution is only Full HD. Inside the machine is equipped with INtel i7-8550U chip, 8 GB RAM and 512 GB SSD. Machine can open and use 21 browser tabs simultaneously, even including tabs to open video.

The intelligent design lifts the device both to help dissipate heat and to be more comfortable for the user

5. Dell G5 Laptop - Laptop for graphics and gaming

Although not as popular as the aforementioned competitors, the 15-inch Dell G5 is also a high-end laptop with its own market. This product is intended for gamers, but both office workers, business people and content creators can use it well. Laptop elegant design of traditional laptop, sturdy and elegant, but with the highlight on the different hinge.

Aside from the new Intel chip as a matter of course, this laptop has dual drives including both an HDD and a M.2 PCIe SSD, for much larger storage space. 60 Wh battery capacity is enough to plow games for many hours continuously. Even though it is using a Laptop for graphics and playing games, it is also very good.

Design Dell G5 with unique and powerful non-seamless hinge

With the demand for laptops for graphics and gaming, we are required to invest a large amount of money on laptops. But the value of use that they bring is definitely worth it!
