3. DELL LATITUDE 3520 LAPTOP (70251590) (I7 1165G7 8GB RAM/256GB SSD/15.6 INCH

Appearing continuously with ultra-thin and light laptops with Intel® Evo certification, Tiger Lake 11 uses a new process with 10nm SuperFin. With this upgrade, the Dell Latitude series in general and 3520 in particular will bring higher clock speeds, 20% more performance than the previous generation (Ice Lake e) and double the graphics support compared to Iris Xe.

Diversity and flexible adjustment of i3/i5/i7 configuration in the Latitude 3000 series, Tiger Lake Gen 11 chip uses Willow Cove core. With Core i5 or Core i7 configurations, all machines have quad cores and Iris Xe graphics, while for the Core i3 version, the "brother" Latitude 3000 series will use dual cores and integrated Intel UHD graphics.

Latitude 3520 laptops are mostly used with Fedora (a free, open-source Linux distribution) or Windows 10 (optional purchase). Both operating systems provide the same experience with smoothness and good support for users.

- Fedora: completely free, feature-rich, groundbreaking interface with GNOME 3, impressive performance and a high-quality, independent operating system.

- Windows 10 Pro: as the name suggests, this new generation of Windows operating system allows users to protect devices and information with a comprehensive solution based on business intelligence only available from Microsoft. Enhanced security with BitLocker, flexible with Remote Desktop login, creating and running virtual machines with Hyper-V technology,. With the ownership of an Intel Core i5-1135G7 using 8GB RAM, 256GB PCIe NVMe Class 35 SSD, you will definitely own the copyright of Windows 10 Pro with the English version.

Upgraded compared to previous Dell lines, Latitude 3520 is completed with a luxurious design, sturdy processing with a new darker finish, polished edges and thin bezels, giving a rather high-end feel in the mid-

range business line. The resolution of the Dell Latitude 3520 screen meets the 1080p standard, enough to watch movies, sharp text display, can multitask on the 15.6" screen and still be fine. In addition, the screen of the 3520 line is also covered with an Anti Glare anti-glare layer to enhance contrast, create a wide, multi-dimensional viewing angle and brighter vision with a Full HD 250 nit screen.

Dell Core I7 Dell Latitude 3520 laptop model is equipped with 11th generation Tiger Lake CPU chip, configuration changes to suit and flexibly for all subjects (customizable with 4GB or 8GB RAM, large/small hard drive depending on user needs). In particular, the machines in the Latitude 3520 series are equipped with VGA port so they can connect to an external monitor with VGA port (this feature is similar to the 3.5 headphone jack on the phone, although it is about to become outdated but is compatible well, suitable for some old technology products). At the same time, this series also supports Bluetooth 5.1 (from version 5, it will support connecting multiple devices at the same time, so Bluetooth headphones can listen to 2 ears at the same time, while with the previous version 4, it can only be used on one device).

The products when delivered will have a 1-year warranty according to the manufacturer's regulations. And if you like to "play around" you can install some popular software to display configuration parameters, temperature and health of the machine such as Speccy, CrystalDiskInfo, CrystalDiskMark, HWMonitor, CPU-Z, BatteryBar Pro. they will help you a lot in checking and monitoring the status of the machine during long-term use later.
