## 1. NZXT H700i (VND 3.6 million)

NZXT's attractive computer case is becoming more popular today, although the brand has been around since 2004. This special model was released in 2017 and provides a clean space with many modern features to create a good computer case for your desktop.

Its outstanding feature is the smart center, which controls fan speed and RGB light, utilizes machine learning to balance the cooling and color of the system in real time to best suit you. It also has a toughened glass built into the window if you want people to see fancy lighting settings.

H700i is easy to build, powerful steel frame completely and custom cable management prevents obstacles for air flow and easily sets up gaming desktops. If you want a smaller size, you can consider the micro-ATX and mini-ITX models.

## **2. Corsair Carbide Series 100R (VND 1.4 million)**

This is a mid tower computer case that offers many benefits including an ergonomically furnished interior containing 4 hard drive trays and a non-mesh front panel for air circulation. Dual USB 3.0 front panel gateways with audio in / out are also available for you to access the device quickly.

It has an elegant, minimalist design with miniature side panels that allow easy assembly. If you want to showcase the power inside your rig, you can use the Corsair's side mounted flat window.

It also has sound compartment capability and is affordable. This makes this computer case a good choice for new and professional computer builders.

### **3. be quiet! Dark Base Pro 900 (6.2 million VND)**

Be quiet! causing great buzz when participating in the PC case market and continuing to do quite well since the first market launch in 2014.

Dark Base Pro 900 is a great computer case with a beautiful design large enough to support large heat sinks and motherboards, along with convenient features like wireless Qi charging and built-in LED lights.

This computer case has a full modular design, so you can adjust, remove and move each part of the chassis even the motherboard tray. This computer case has a high degree of flexibility, while the load of the flying drive (the space on the front-facing case usually adds a hard drive) provides plenty of storage that any system builder would all appreciate.

#### **4. Cooler Master H500P Mesh (4.2 million VND)**

Cooler Master is a famous name in the computer case industry, especially for cooling things.

The Cooler Master H500P is no exception, it provides plenty of space for the airflow and the attached radiator up to 3600mm on the top and front when you want to increase the system cooling level.

In addition, it also has a light-up and tempered RGB side panel so you can build a beautiful rig. The previous version was not good at cooling but the H500P had a grille instead of the front panel, keeping the parts cool and operating at the highest level.

## **5. Fractal Design Define R5 (3.2 million VND)**

Define R5 is a mid-tower computer case of Fractal Design with a simple but sleek appearance that gives a premium feel with many impressive features.

In addition to the affordable price, the R5 is made from internal noise-reduction materials with moisture-proof covers for unused fan slots, plus a wide range of cooling options up to 7 140mm fans for cooling. country.

Inside this computer case is spacious, built and well designed, although the case is a bit big and heavy but it contains a lot of hardware. The layout is also scientifically arranged with good cable management and you can easily change and move parts. This computer case is highly customizable, rugged and quiet.

There are many things to consider when choosing a computer case. A good computer case helps you build a good computer, saving you time and money. In addition to attractive appearance, good ventilation, size is also important to contain internal components. The five options in the list above provide features that are suitable for your work or gaming purposes.
