

TOP 5 phones with super terrible 108 MP camera 2022, super sharp shooting

In this article, I will introduce the TOP 5 super terrible 108 MP camera phones that take sharp pictures, all of which are beautiful camera phones.

Photography is always a passion, a daily hobby of everyone. Nowadays, taking good photos is not only about skill, but also partly depends on the quality of the camera. Do you believe that with just one phone, you can take sharp pictures like a professional camera? Here I will introduce the TOP 5 phones with a super terrible 108 MP camera, taking sharp pictures of anything.

1. Redmi Note 10 Pro

One of the mid-range super products of the Xiaomi family, resonates with an impressive quad camera with the main camera up to 108 MP taking super sharp, extremely flattering eyes. In addition, the device also supports recording videos with extremely realistic 4K quality to each frame.

The front camera with a resolution of 16 MP, is also not disappointing when the image when "virtual life" is also extremely high-quality because of its delicate and eye-catching features thanks to the extremely sensitive beauty feature.

Besides, Redmi Note 10 Pro also has a super beautiful screen from a trendy mole design, owns an AMOLED panel, FULL HD + resolution with a huge screen size of 6.67 inches for a wonderful spacious experience. watch the movie cover "fire".

In addition, the device also has a 5020 mAh buffalo battery for you to freely extend the experience, and enjoy your ability to take photos up to a whole day long, comes with a 33 W fast charger to shorten the charging time. substantial battery.

2. Realme 8 Pro

Have taken good photos but still want strong performance? Choose now Realme 8 Pro with a set of 4 extremely shocking cameras (108 + 8 + 2 + 2 MP). The main camera with a great resolution is guaranteed to support you in storing beautiful, captivating photos.

Especially on this machine, it also has the ability to zoom extremely far away with super sharp quality, not inferior to when taking close-up photos. The front camera supports up to 16 MP, ready for you to take photos of "selfies" thanks to the natural colors of the AI intelligent system.

Besides, the Realme product also has a very beautiful screen thanks to its Super AMOLED panel, FULL HD + resolution encapsulated in a size of 6.4 inches for bright and detailed display quality.

Realme 8 Pro owns pretty good configuration parameters in the segment under 9 million.

The device has a fairly strong battery of 4,500 mAh, but it is compensated with 50 W Super Dart Charging technology. Capable of fully charging 100% in less than 1 hour. Let the machine rest for about 1 hour and then you can carelessly "separate" up to the whole day.

3. Xiaomi Mi 10T Pro 5G

Mi 10T Pro 5G is considered one of the high-end flagships with a great value camera, with a 108 MP main camera, confidently allowing you to zoom comfortably near and far, even on high clouds, or beautiful scenes. towering high-rise buildings.

In particular, the device is also capable of recording videos with extremely sharp 8K quality and the ability to simultaneously record clips between the front and rear cameras to help you create vivid and fun videos with extremely new friends.

The selfie lens with 20 MP, with the feature of taking photos to remove the "magical" and super outstanding fonts will satisfy all virtual life enthusiasts, even the most fastidious.

More surprising when on Mi 9T Pro 5G owns a super smooth 144 Hz refresh rate to each frame and swipe and touch. The device owns an ultra-thin FULL HD + screen with a size of 6.67 inches that allows you to enjoy blockbuster movies with great satisfaction.

Besides, the device also has a large 5,000 mAh battery, with 33 W fast charging technology for both the ability to buffalo and shorten the charging time, in just 1 hour of charging, it can be used up to 7-8 hours. is undeniable.

4. Xiaomi 11T 5G Series

Making a big splash at the time of launch, the Xiaomi 11T 5G Series duo including: Xiaomi 11T 5G and Xiaomi 11T Pro 5G stand out with the camera cluster. The main camera has a resolution of up to 108 MP that will give you great artistic and cinematic photos.

This duo not only has quality cameras but also owns an AMOLED, FULL HD + screen design with a large size of 6.67 inches, for extremely good display quality.

The difference that can be seen in these two versions is the processor, Xiaomi 11T 5G owns Dimensity 1200 chip. Xiaomi 11T Pro 5G owns Qualcomm's flagship chip called Snapdragon 888.

Both these smartphones have huge 5,000 mAh batteries. The time to fully charge the device will also not be an issue thanks to fast charging technology to 67 W on Xiaomi 11T 5G and 120 W on Xiaomi 11T Pro 5G.

5. Samsung Galaxy S21 Ultra

One of Samsung's top flagships when on the Galaxy S21 Ultra has a main camera of up to 108 MP, and also has the ability to zoom 100X allowing you to see things at a distance that you can't see but extremely. it's not clear.

Selfie lens with 40 MP, defies all obstacles that make your "virtual life" photos worse, the machine will handle it neatly and quickly to help you quickly and capture extremely sensitive focus for your photos. Your photos are extremely attractive.

Another new breakthrough comes from this device similar to the Note 20 Ultra, which co-owns a 2X Dynamic AMOLED screen with 2K + resolution with a huge size of 6.8 inches for you to immerse yourself in the enchanting space with Netflix. & Chill.

In addition, on the S21 Ultra, there is also a large 5,000 mAh battery, giving you an uninterrupted experience in the middle and the freedom to "separate" without editing photos because it is already so beautiful.
