Top 5 software for watching videos and movies on computers 2020. To watch videos in the computer smoothly, we need good video viewing software. This article will introduce to you the top 5 software to watch videos on ghost

As you all know most people now watch online videos because the internet is growing. However, sometimes watching videos offline in your computer is still the best option for us. Of course, to watch videos in the computer smoothly, we need good video viewing software. And in this article, TipsMake.com will introduce to you the top 5 best software to watch video on computer so you can easily choose a software that suits your needs. Invite you to follow!

## 1. VLC Player software

Download link: <http://www.videolan.org/vlc/download-windows.html>

Whenever mentioning the best video player software, VLC Play is always the first name mentioned, why is that? VLC Media Player is a free and open source media player, available for all popular platforms. Created by the Videolan project, VLC Media Player is known to support many audio and video compression methods and file formats. The software also has various customization options that can help you improve the player's viewing and changing interface of the player. VLC Player also receives regular updates and has a large user community. It runs on all versions of Windows, from Windows 10 to Windows XP SP3. Occasionally, this free movie player continues to receive new features and updates.

## 2. Media Player Classic software

Download link: <https://mpc-hc.org/>

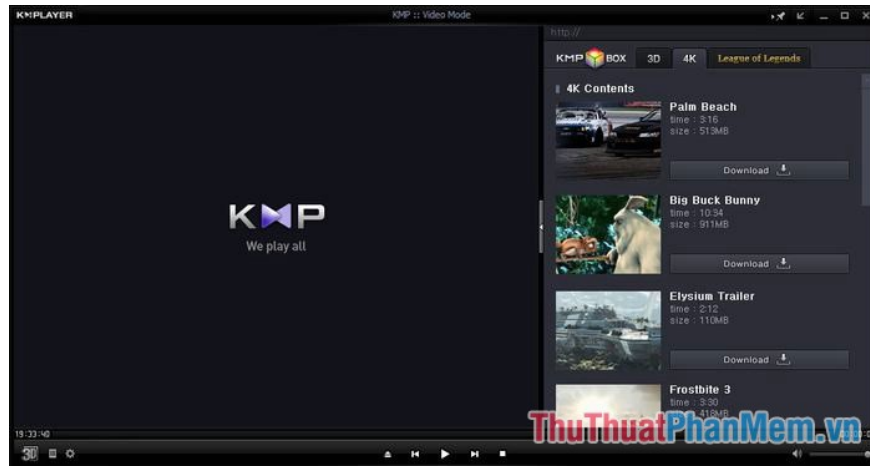

As its name implies, Media Player Classic is a classic media player that is definitely on our best media player list. If you have a low-configuration computer, the MPC-HC is a great choice for you. It has a very simple

interface, lightweight capacity as capable of playing nearly every popular video format today smoothly and quickly. Speaking of customization, MPC-HC can allow you to install toolbars and themes to your liking! If we consider all of this, MPC-HC is an excellent video viewing software for Windows.

### 3. KMP Player software

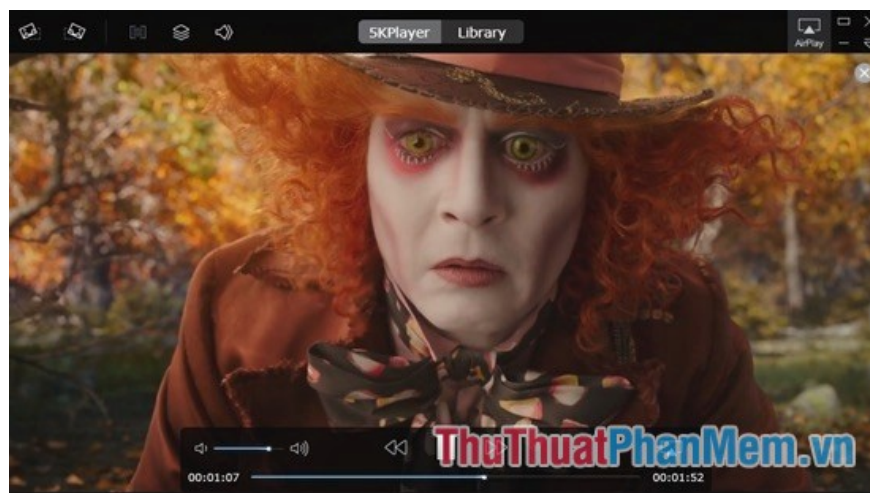

Download link: <http://www.kmplayer.com/>

KMPlayer is another great and free Windows 10 media player, possessing the ability to play most mainstream video and audio files. Since it has a codec available for Windows 10, users don't need to search for any other codecs. To increase its compatibility even further, you can add external codecs. With support for 3D, 4K, and UHD support, users can enjoy high-resolution videos on your device. You also get the ability to edit subtitles right inside the player. First released in 2002, the free media player KMPlayer was acquired by a Korean streaming company Pandora TV in 2007.

### 4. 5K Player software

Download link: <https://www.5kplayer.com/>

5KPlayer is not just a basic video player; It supports local playback, video and radio streaming, YouTube download, and more, including AirPlay support to push content to other devices. If you have a large collection of movies (and music) on your hard drive, you can add libraries to the program to easily access and manage everything. The interface is stunning, modern and not only easy to look at, but also a well-designed interface that makes the program easy to navigate. There's a wide range of video and audio formats supported, and there's plenty of playback controls to adjust the look and sound of your media. However, there's one downside to mention. 5KPlayer is freeware but it will come with ads, if you find that it is not a big deal then 5Kplayer will be a great choice.

## 5. GOM Media Player software

Download link: <https://www.gomlab.com/gomplayer-media-player/>

An advanced media player, GOM Player includes everything you desire and expect to find, and more. There are built-in subtitle and codec download options besides the expected audio and video editing controls. In addition to local and network videos, you can also play YouTube content in the player and whatever you're watching, you can use the integrated screen capture option to capture still images from videos. GOM Player supports 360-degree video, and if you've connected your computer to a TV for a big screen experience, you can use the GOM Remote app on your phone to comfortably control playback on the sofa.

Above are 5 best video viewing software today according to TipsMake.com. Hopefully through the article you can choose for yourself an appropriate software. Thank you for watching!
