Reading small text on a mobile screen is never an enjoyable experience. Especially when you are using an Android device whose screen is too bright or the screen is too dark. In addition, visually impaired or elderly people may also have difficulty reading websites, ebooks, PDFs and other files. In those situations, you can use text-to-speech applications to listen to text files, ebooks and websites. And in this article TipsMake.com will introduce to you some of the best text-to-speech software for Android phones, please refer.

1. Google Text-to-Speech

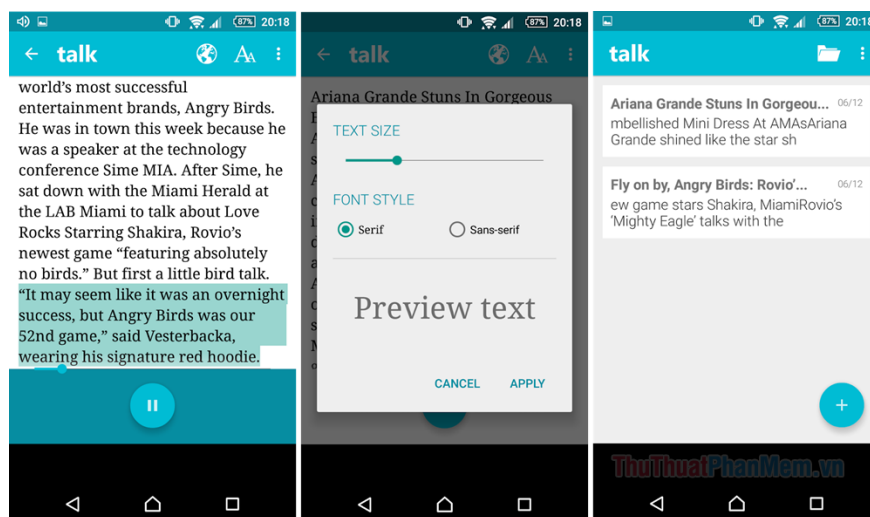

Download link: <https://play.google.com/store/apps/details?id=com.google.android.tts&hl=en>

Google Text-to-Speech is a text-to-speech application of Google and it is built into every android phone. Google's Text-to-Speech feature allows applications to read text aloud on your screen. For example, this feature can be used by: Google Play Book to 'Read aloud' your favorite book, Google Translate to read the translation aloud so you can hear the pronunciation of a word, TalkBack and other Accessibility apps to read feedback on your device and more. In addition, this application also supports many different languages and of course, Vietnamese. This is generally a very well rated user app that you should try to use once.

2. Talk Free

Download link: <https://play.google.com/store/apps/details?id=com.ktix007.talk>

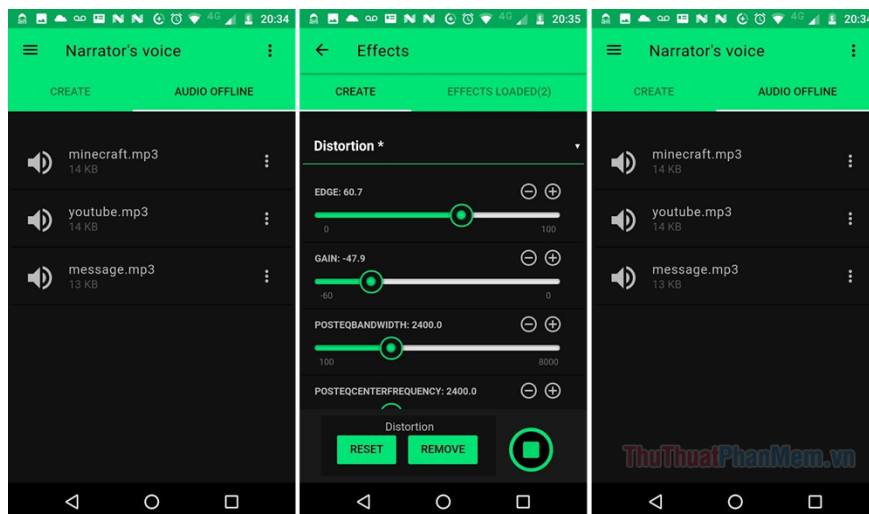

Talk Free is another popular and minimalist text application. Using your internet connection, Talk Free can convert text in multiple languages. Keep in mind that Talk Free uses the built-in Google Text-to-Speech engine. If you turned it off or uninstalled, you need to install or enable it before you can use Talk Free. Generally, most Android devices have Google Text to Speech installed and turned on. So for the most part, you don't have to worry about that.

Also, because Talk Free uses the built-in TTS Engine, you need to change that tool's settings to modify pitch or voice. Alternatively, you can enter text or read web pages directly from the application. For offline and sharing purposes, you can save your speech as a WAV file.

3. Narrator's Voice

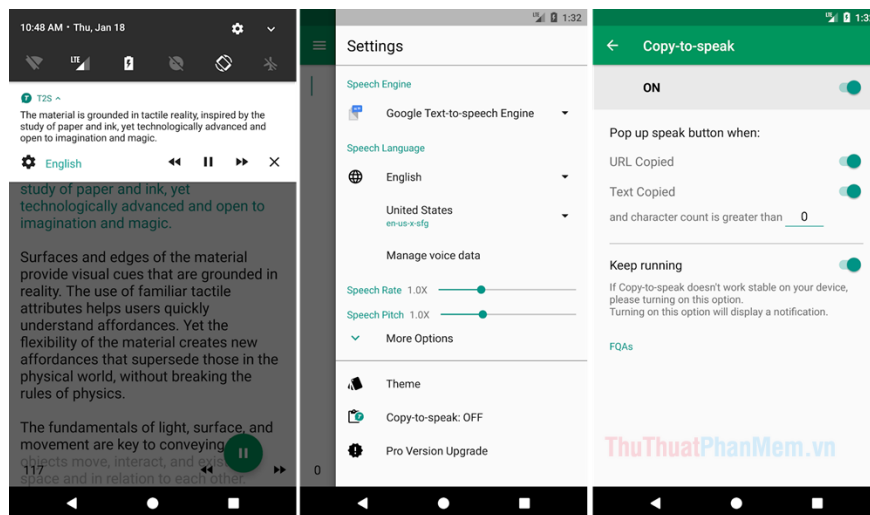

Download link: <https://play.google.com/store/apps/details?id=br.com.escolhatecnologia.vozdonarrador>

Narrator's Voice translates to a **narrator's** voice and, as the name implies, this application allows us to turn text into voice with a variety of voice options. By default, Narrator's Voice uses regular voice while converting text into voice. However, you can add different voice effects such as echo, reverb, gargle, compressor, chorus, etc. Of course, you can also choose between a variety of voices like Cortana, Zira, Steven. , etc., no internet connection required. But with special voices like Goku, Charmander, Articuno, etc., it requires you to have an internet connection to work.

4. T2S: Text to Voice

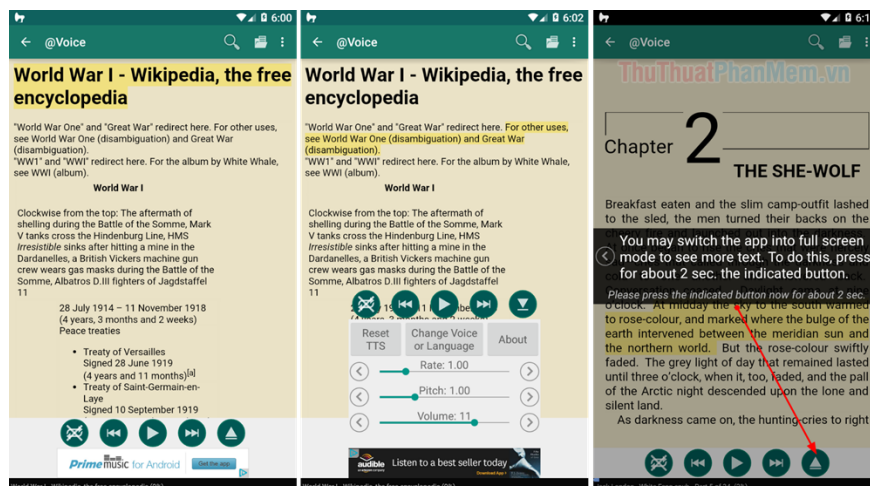

Download link: <https://play.google.com/store/apps/details?id=hesoft.T2S>

T2S is a text-to-speech application that possesses the most modern interface among the applications mentioned in this article. The standout feature of the application is the presence of a simple integrated web browser. The number of features it offers is not overwhelming, but it allows you to easily listen to websites without having to worry about copying and pasting URLs or using the Share menu. The copy-to-speak feature of T2S is also quite good. It displays popup button on screen whenever you copy text in other apps. Pressing this button will make the application start reading the copied text immediately.

5. Voice Aloud Reader

Download link: <https://play.google.com/store/apps/details?id=com.hyperionics.avar&hl=en>

Like all text-to-speech applications on the list, you can not only read web pages from browsers but also support all other text formats - TXT, PDF, DOC, DOCX, . RTF, OpenOffice documents, EPUB, MOBI, PRC, AZW and FB2 eBooks, etc. You can increase or decrease the playback speed. Some people have tried to listen to some really long posts (almost like a book) with Voice Aloud Reader and it works fine. You can pause and play the sound even after a day. And if you have a habit of listening to articles before going to bed, the good news is, this app also comes with a night mode and a sleep timer.

Above are 5 best text-to-speech applications for android that TipsMake.com introduces to you. Hopefully through the article you can choose for yourself the application that is suitable for your needs. Thank you for
