

Top 6 best 3G / 4G mobile WiFi transmitters

Which 3G / 4G mobile WiFi transmitters are best? The article of the Network Administrator will summarize you reading the names of some devices.

The need to use mobile WiFi transmitters is increasing, as the convenience that it brings is so much. This WiFi transmitter will provide Internet for many devices such as laptops, TVs, phones, tablets anywhere and can share WiFi waves with friends. Most portable WiFi transmitters are very small, easy to carry when traveling, working, . serving quickly the demand.

There are many WiFi 3G / 4G transmitters such as WiFi WiFi reception, WiFi router or portable WiFi transmitter, . The WiFi mobile transmitter uses 3G sim to play WiFi, with an average operating time of about 8 hours. The following article will synthesize some of the best portable WiFi transmitters today.

1. Extremely powerful Wi-fi transmitter for businesses
2. Unexpected items in the house silently "breaking" Wi-Fi waves
3. How to share Internet Ethernet connection for mobile devices
4. How to use WiFi device from SIM 4G

Top mobile WiFi 3G / 4G broadcasts

1. The WiFi 3G / 4G TP-Link M7350 WiFi transmitter

TP-Link brand has been very popular in the market with many designs and diversified designs. The TP-Link M7350 has a compact design, no easy-to-move external antenna, beautifully designed with black, capable of identifying and configuring SIM Viettel Mobiphone or Vinaphone cards.

The device is equipped with the latest generation 4G LTE network, using 2.4GHz or 5GHz dual band, wide coverage with the ability to share 15 smart devices, download speed of 150Mbps and upload speed of 50Mbps.

2000mAh battery capacity, allowing continuous connection within 8 hours. To manage capacity, control WiFi network, set a password can use tpMiFi application. Equipment prices range from VND 1,349,000 - 1,452,000 VND.

Device highlights:

1. Compact design, information display screen.
2. Compatible with many devices.
3. Wide network sharing, high speed access.
4. There are separate applications to manage and use.

2. Mobile WiFi transmitter TP-link M7300

The device is compact, sturdy plastic housing, impact resistant and convenient to move and design underground antenna. Multi-SIM transmitter integrated with all operators.

The transmission speed is 150Mbps, the upload speed of 50Mbps, can be connected to 10 machines at the same time. TP-link M7300 uses 3.4 Ghz band, IEEE 802.11 b / g / n connection standard.

The device has a 2000 mAh battery, has a 32GB memory card slot, a USB connection port for easy WiFi sharing. In addition, there are additional LED lights on the battery management transmitter and WiFi and Internet connection. The price fluctuates around VND 1,200,000 - VND 1,330,000.

Device strengths:

1. Support connection with many high speed devices.
2. Convenient in moving.

3. Equipment for broadcasting Wifi 3G / 4G Huawei E5786

The Huawei E5786 transmitter is rated as the highest quality WiFi transmitter of this company. Download speed is 150Mbps and upload speed is up to 100Mbps. The device has a luxurious design, the information is clearly displayed on the LED screen. Use 2 band 2.4Ghz and 5Ghz, compatible with all SIM networks in the country and abroad.

Where to Huawei E5786 certainly can not ignore the battery capacity 'extreme buffalo' up to 3000mAh allows you can use continuously for 15 hours. Thus users can freely use in long journeys.

Because of the outstanding features on which Huawei E5786 has a cheap price, it fluctuates in the range of 3,499,000 VND - 4,990,000 VND.

Device highlights:

1. Compatible with all types of 3G SIM in the country and abroad.
2. Manage the interface on the phone with the application.
3. LTE CAT 6 standard for outstanding download speeds.
4. Support 2 3G / 4G antenna slots.

4. Equipment for Broadcasting Wifi 3G / 4G Huawei E5573

Huawei E5773 has many different lines but are well appreciated when accessing and connecting to many computers. Still owning luxurious and sophisticated design, Huawei E5573 supports 3G / 4G sim of all network operators, capable of connecting 16 network devices at the same time.

The device supports versatile connectivity, while ensuring 4G LTE speed for WiFi playback, download and upload speeds are 150Mbps and 50Mbps respectively. Device with standard 802.11 a / b / g / n connection for multiple device compatibility.

Huawei E5573 is designed with 2.4Ghz band to ensure wide coverage, WEP / WPA and WPA 2 security encryption, secure before external connection intrusion.

The battery life of 1500 mAh ensures continuous access for more than 6 hours. Equipment prices fluctuate around VND 1,000,000.

Highlights of the device:

1. Support LAN port as ADSL modem.
2. Support connecting to multiple devices.

3. Connect security security when accessing.

5. WiFi 4G LTE transmitter Huawei E8372

The device is designed with 3G / 4G sim slot of all operators, with SD slot for sharing data information. The shape is like a compact USB, the quality is hard plastic, the underground antenna ensures coverage, connecting 10 devices at the same time.

The connection speed of the device is up to 150Mbps, with 50Mbps upload speed, WPA and WPA2 security encryption to avoid data theft intrusion.

The lowest price in the line of its WiFi transmitters, about 800,000 VND.

Strength of equipment:

1. Compact design like USB.
2. Secure access.
3. Low price, in the mid-range segment.

6. Ministry of Wifi Wifi 3G GL5P Huawei GL10P

Huawei GL10P can only use 3G, connecting anytime, anywhere from home, office, bus, traveling or whenever you need it. The device has a 2.4 inch touch screen for users to easily control and install. It is possible to connect 10 devices at the same time as laptops, iPad tablets, mobile phones and easily share to many people.

The battery has 2400mAh capacity, can work from 9 hours continuously depending on the level of user activity. Equipment prices range from 899,000 VND or more.

Highlights of the device:

1. Pocket design, compact when moving.
2. Touch screen to install.
3. The price is cheap, not too high.

I am using this sister, it is a Japanese domestic product so it is full of Japanese characters, but there is no need to configure anything, except rename, change wifi, you only need to ask the seller for only once to remember. Long battery, stable speed, good buy, the price can be cheaper from 100,000 VND - 200,000 VND.

Above are a few devices for portable WiFi playback of many different companies. Each device has its own advantages, its own outstanding features. Users should choose according to their needs, often have to travel far,

many days or not and according to the cost of products to choose the right equipment.
