

# Top 6 best Panorama photography applications on Android

With the development of VR technology and 360-degree cameras, multi-camera phones and other technologies, you can take photos with any wide angle. This article will introduce some panorama photography applications for Android.

With the development of VR technology and 360-degree cameras, multi-camera phones and other technologies, you can take photos with any wide angle. However, you don't need to buy a professional camera or another phone to take panorama photos. This article will introduce to you some of the best panorama photography applications on Android.

## Camera360

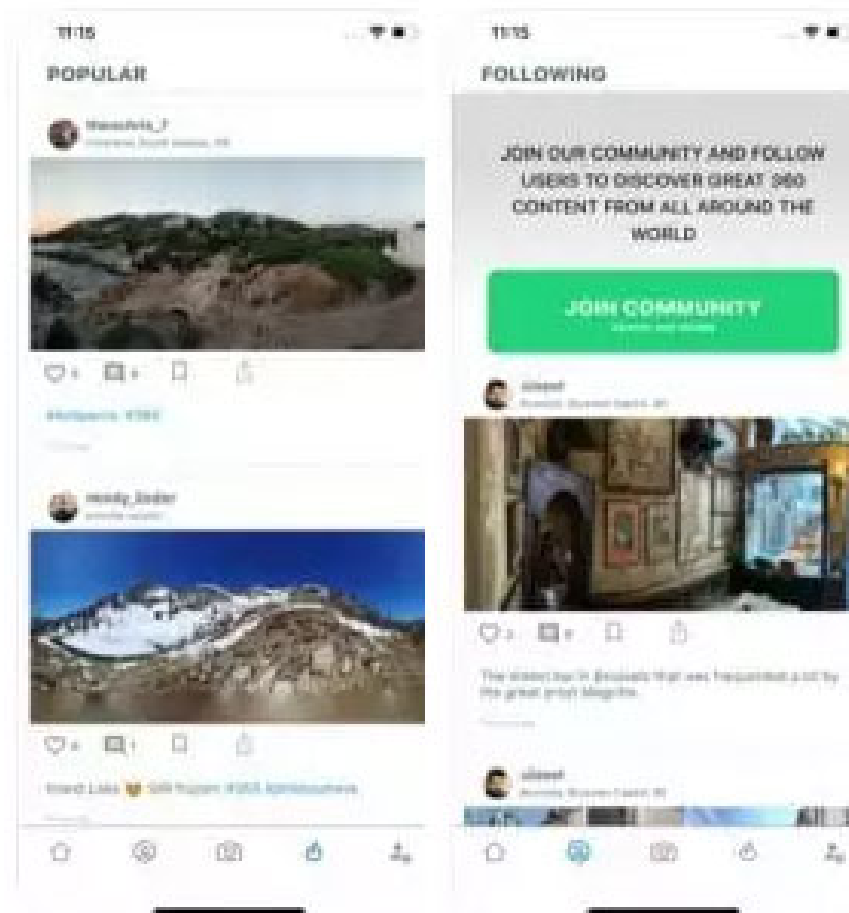

Let's start with an app called Camera360. As you can see from the title, this is an all-in-one app for photo editing including panoramas.

If you ever search for a panorama camera app, Camera360 will be the first result to appear. That's because it has a long list of features for panoramas, and it can even work with 360-degree videos and VR. Along with that, the service includes thousands of filters and layout options.

The interface in this app looks great and all the buttons are placed logically. Furthermore, the app includes a tool section for taking selfies. This section includes various beauty filters that help your skin look better. Those features can be really useful, especially if you decide to take panorama selfies.

## Panorama 360 Camera

The second app is called Panorama 360 Camera. This is a video recording and Panorama photography service. The main goal of this application is to turn your mobile phone into a fully featured panorama camera.

Back then, the app didn't have as many filters and layouts, but it still included basic tools for color correction. With this service, you can record 360-degree videos and take wide-angle photos.

Along with that, the app works in high quality, so you can be sure that all your footage will look great. You can also automatically share your best photos with the world by posting to Twitter and Facebook. All your photos will be geo-tagged so you don't forget where you took them.

If you need a simple app for taking panorama photos, be sure to try Panorama 360 Camera.

## 360VUZ

360VUZ is a 360 degree camera app for the most beautiful Panorama photos of your life. This service also only focuses on Panorama photos and don't expect it to have many tools for editing photos.

This app works with subscription plans and you can choose between monthly and yearly plans. If you need a Panorama app that also doubles as a news social network, try 360VUZ.

## Bimostitch Panorama Stitcher

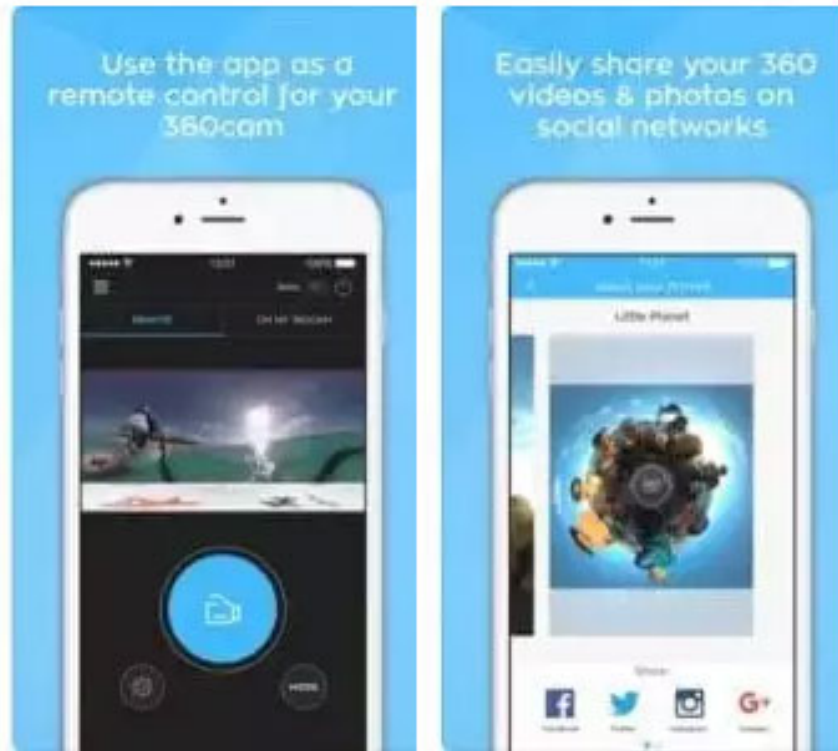

Bitmostich is a good quality editing app for your photos. This program allows you to place several photos on top of each other to create a panorama.

Tap **the Gallery** button to choose a photo from your phone's library, or click **the Camera** button to take a few new photos, then go back. The application will automatically create Panorama images for you, you just need to wait for the application to upload the images, process and match them together.

This app is quite light, it won't take up much storage space on your phone, so you can use the app to take more photos! It's also completely free, but has some ads. However, the ads are not as annoying as in some other similar shows. Bitmostich was recently updated so all the bugs have been fixed and the app is very easy to use. This is a suitable application for creating panoramas.

## **360cam**

360cam is an application that allows you to record videos and take panoramic photos. This app also allows you to experiment with your shooting angles. In other words, you will be able to shoot from top to bottom and even panoramas in different shapes like circles or triangles.

You can also take panoramic selfies with a wide angle. You can then also record 360 videos and automatically broadcast them to your Facebook.

The tool even has a pack of filters that make your photo look like a 3D drawing or animation. In case you want to go further with your fun experience, you can sync the service with your VR glasses and enjoy your photos in a virtual reality environment.

The app marks all the photos you take with geotags so you can always know where each photo was taken. Those tags also help you find the exact photo or group of photos taken in the same place.

In short, if you need a powerful tool to take 360-degree photos, choose the 360cam application.

## **Photaf Panorama**

Photaf Panorama is another app for wide-angle photography with a simple user interface. This app has a long list of tools that can enhance your photography.

The main advantage of this tool is the different photo modes that allow you to take photos in HD and Ultra HD. There's also a portrait mode and a few vignetting modes.

Besides, this app has a powerful color editing tool and even a double exposure tool. This app also automatically crops your photo to use as a mobile wallpaper. Additionally, this app works as a social network so you can communicate with other users and follow people you like. However, the app includes ads that cannot be removed.

The app's interface is created for users with different photography skills, so you most likely won't have any trouble using it. All photos you create will have a unique geotag so you can divide it into collections and always know where a particular photo was taken.

If you need a high-quality panorama photography application, Photaf Panorama will definitely not disappoint you.
