

Top 7 best gaming laptops in 2021

To help you find the best gaming laptop available right now, TipsMake has compiled a list of the best models that both meet your learning needs and combine entertainment with high flexibility. These gaming laptops will be the perfect choice.

Tips for choosing the right Laptop Gaming:

Choosing the right GPU: Most current self-games are GPU-dependent and cannot be upgraded at all, so if you buy a laptop with a powerful GPU, you can still play games for a few years.

Can be upgraded: Since the CPU and GPU in a laptop are non-replaceable, we should choose a gaming laptop that can upgrade RAM and SSD.

Battery capacity: Very rare laptops play games for 8 hours or on a single charge and still need direct plugged in for maximum performance while gaming. However, the current time with AMD Ryzen 4000 generation processors and Nvidia has improved the Optimus technology can help change this problem.

Choosing the best gaming laptop in 2021 to play every game

1. MSI GE66 Raider

CPU: Intel Core i7-10875H | **GPU:** NVIDIA GeForce RTX 2070 8GB GDDR6 | **Display:** 15.6" FHD IPS, 240Hz | **Weight:** 2.38 Kg

1. Excellent gaming performance
