

# Top 7 best vertical mouse models worth owning in 2024

Vertical mouse or ergonomic mouse is probably a relatively new device to many people...

Vertical mouse or also known as ergonomic mouse is probably a relatively new device for many people because in actual use we often only encounter flat mouse models, designed to fit in the palm of the hand. However, in recent years, vertical mouse is gradually becoming a popular choice for office workers, those who often have to work with computers due to the benefits that cannot be found in conventional flat mice that it brings.

Using vertical mouse will help to reduce the pressure and pain of the wrist

To be a little more specific about this rather strange type of mouse, instead of being designed in the traditional horizontal style, vertical mice are often designed in the form of a vertical pyramid, with buttons on the body located at certain angles, so that the user's wrist and forearm are in a more natural position.

For office workers - those who often have to sit and use computers for long periods of time every day, phenomena and diseases related to pain, fatigue, and aching in the wrists and even the arms are common occurrences. The reason may stem from the habit of using the mouse continuously, without rest, which gradually puts harmful pressure on the joints. According to research, holding the mouse in a vertical grip instead of the usual horizontal position will significantly reduce pressure, stress as well as increase blood circulation to the fragile muscle bundles in the forearm, wrist and fingers - positions that often lead to pain for people who regularly use the mouse.

As mentioned, although it brings such practical uses, the vertical mouse is still a strange device for many people. If you are experiencing problems with your wrists and arms as mentioned above, and want to buy a vertical mouse model for daily use but do not know where to start, you can refer to the names that we will list in this article below.

## **1. Logitech MX Wireless Vertical Mouse**

*Reference price: 3.1 million VND*

The Logitech MX Wireless Vertical Mouse tilts your hand at a 57-degree angle when you hold the mouse, avoiding forearm strain. By keeping the mouse in its basic position, you'll notice less muscle strain over time. Its textured design also provides a comfortable tactile surface for interaction.

The Logitech VX offers approximately 3 hours of wireless use after a 1-minute charge and up to 4 months on a full charge. The mouse boasts super-responsiveness thanks to its high-precision 4000 DPI sensor. This also has the added benefit of requiring 4x fewer hand movements than a typical mouse with a 1000 DPI sensor.

Using the included USB receiver, you can use the Logitech MX to seamlessly navigate across 3 computers. Text, images, and files can be easily copied from one computer to another using Logitech FLOW. And gamers can enjoy customizable shortcuts with the Logitech MX, along with ultra-smooth tracking and hours of stress-free comfort. This is a premium wireless mouse that's perfect for work or play.

## 2. ZLOT vertical gaming mouse

*Reference price: About 800,000 VND*

Ultra-affordable RGB Wired Gaming Mouse The ZLOT Vertical Gaming Mouse may not be something that immediately catches your eye, but upon closer inspection, you'll find that it has a lot going for it and is a gaming mouse that you won't want to pass up.

Thanks to the PMW-3325 gaming chip, it can deliver up to 10,000 DPI, 100 IPS, 20G acceleration, and is capable of supporting 5,000 frames per second. There are 5 adjustable DPI levels and RGB color changing on both sides. All 11 buttons of the mouse can be programmed to suit your gaming needs, and 128KB of onboard memory is available for saving key mappings.

The 1.5 meter USB cable will allow you to game comfortably, and the RGB color options look nice, if a little limited. Still, for the price, there's a lot to admire about the ZLOT vertical gaming mouse. And for gamers with any form of RSI, this mouse can certainly give you a little respite while you continue doing what you love.

## 3. Nulea Wired Vertical Mouse

*Reference price: About 700,000 VND*

Another wired vertical gaming mouse that's great for those on a budget is the Nulea wired vertical mouse. This mouse positions your hand at an optimal 57-degree angle, reducing strain on your wrist and forearm, with a textured grip for added comfort.

Switch between four different DPI options (800, 1200, 2400, and 3200) and adjust the mouse's responsiveness to suit your needs. The mouse buttons here aren't programmable, but that's understandable given the low price point. And for less complex gameplay, the features on offer will do just fine.

There are 11 RGB backlight modes to choose from to add a little excitement to your gameplay, and the mouse's 1.8 meter long USB cable is comfortable but doesn't get in the way. This budget-friendly vertical gaming mouse makes gaming easier and more comfortable.

#### **4. TRELK Gaming Mouse with 5 D Rocker**

*Reference price: 1,050,000 VND*

The TRELC Gaming Mouse with 5D Rocker is a wired vertical mouse with 11 programmable buttons, allowing you to customize your settings for different gaming styles. Its 128KB of onboard memory saves those customizations for later.

There are 5 DPI levels from 1500 to 10000, with a movement speed of 1200 IPS, 20G acceleration and 5000 FPS. You will find 5 dynamic RGB lighting effects and a color-changing RGB light strip located on each side of the mouse, making switching super easy.

This vertical gaming mouse offers decent customization options and can help relieve much-needed shoulder and wrist pain, so if you're looking for a vertical gaming mouse and don't necessarily want it to be wireless, this option is worth considering.

## 5. DeLUX Ergonomic Mouse

*Reference price: About 650,000 VND*

Another wired vertical gaming mouse that's perfect for anyone suffering from gamer's strain is the DeLUX ergonomic mouse. This mouse reduces hand fatigue thanks to its ergonomic design and detachable palm rest that provides a little extra comfort for long work sessions.

There are five adjustable DPI levels, ranging from 800 to 4000, and a switch on the base lets you switch between these options easily. There are six buttons in total here, all of which are programmable via the mouse driver; it's compatible with Windows and Linux.

And then there's the RGB Chasing Lighting, which can also be customized and saved via the mouse driver, to complement your gaming setup. This gaming mouse will probably be better suited to those with slightly larger

hands. It looks great and is comfortable to use, and is a worthy addition to your PC gaming setup.

## **6. MOJO Master Grip Rechargeable Vertical Mouse**

*Reference price: About 900,000 VND*

The MOJO Master Grip Rechargeable Vertical Mouse is a wireless ergonomic mouse with quiet dynamic buttons and adjustable sensitivity settings. The Master Grip is designed to reduce stress and discomfort on the hand, wrist, forearm and shoulder.

Adjustable DPI sensitivity ranges from 800 to 2400 DPI and has 7 mouse buttons (plus a scroll wheel). Ideal for late night gaming sessions, if you're up late and have a small child or spouse sleeping in bed at home. And you can control 3 computers with this mouse, switching from one to the other with the click of a button.

The customization software lets you adjust button functions, DPI, or refresh rate. And you can also choose to turn off the LEDs if you want. A quiet wireless vertical gaming mouse is worth it, as long as you don't mind giving up fancy RGB lights.

## **7. J-Tech Digital Ergonomic Mouse with Wireless Connection**

*Reference price: 680,000 VND*

The J-Tech Digital Ergonomic Wireless Mouse can give you what you need when you are in the market for a wireless vertical gaming mouse. It tilts at a 57-degree angle, has a removable anti-slip and sweat-proof palm rest, and provides comfort when needed.

4 DPI settings are built-in and you can adjust from 800 to 3200 DPI, depending on your requirements. Optical tracking technology ensures smooth movements on the mouse pad or computer. Button functions can be reassigned using third-party software and there is a 250Hz RGB LED that can be controlled via a dedicated external switch.

There are a lot of cool features to enjoy with this mouse. Combine that with the added comfort and support that the J-Tech Digital Ergonomic Mouse offers and you have a great wireless vertical gaming mouse.
