

# Top 8 best quality vintage photography apps on phones

The topic of vintage photography or photo editing in vintage style is loved by many young people, with a bit of classic photography. Let's try some vintage photography apps in the article below.

The topic of vintage photography or photo editing in vintage style is loved by many young people, with a bit of classic photography. If so, you can try some vintage photography apps on your phone to get beautiful artistic color paintings without having to edit too much. Let's try some vintage photography apps in the article below.

## 1998 Vintage photography cam

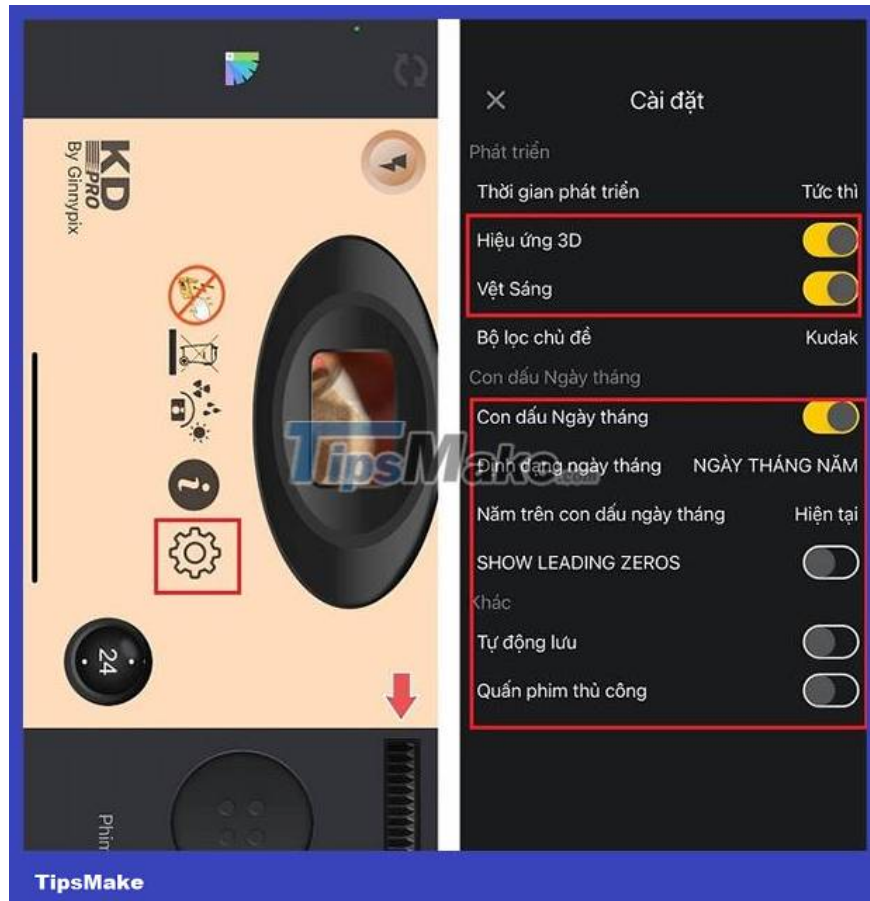

The 1998 Cam application brings more than 100 great color filters such as film, vintage, retro, black & white, cinematic,. for us to take photos and videos with the classic style of 1998.

The interface of 1998 Cam is very simple, with settings for taking photos or recording videos such as cropping images, changing image angles or changing filters right when taking photos and recording videos,.

## **KD Pro takes vintage photos**

KD Pro has film color filters available for us to choose from when taking photos. Or you can also create your own new color filters by combining many available filters to bring a much new and unique image. In addition to supporting vintage photography, the KD Pro application also has a 3D photography feature to create a more interesting look for photos.

## FIMO - Analog Camera

The FIMO application brings a classic photography lens with familiar elements such as scratches, retro colors, light streaks, frame shaking effects,. In addition to taking photos directly with classic effects, the FIMO application FIMO application also allows editing existing photos in vintage style.

## NOMO CAM - Point and Shoot classic photography

NOMO CAM has a very simple photography interface, without many classic color filters, but instead there will be familiar classic details such as classic frames, blurring, light streaks, dust or image noise, etc. . You can take photos on NOMO CAM with the double exposure feature to get the desired image.

## RNI Films

RNI Films owns classic style filters exclusively for iPhone. The photo editing interface on RNI Films is very simple, without needing to perform too many steps, with basic photo editing options such as contrast, brightening, adding film scratches,.

## Take vintage photos on HUJI Cam

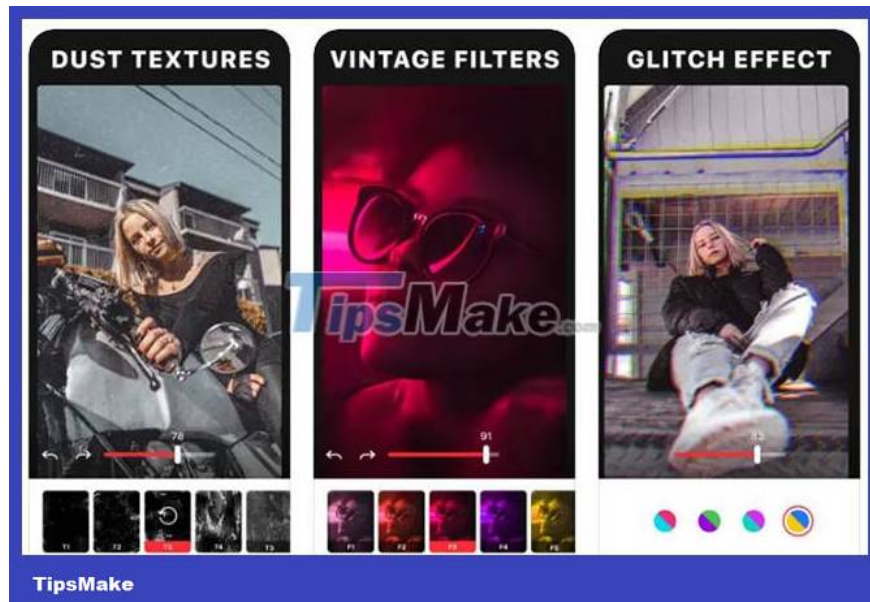

HUJI Cam will bring you back to 1998 with the lens of classic photography. The images will have random red light streaks that add interest to the image. By default, the captured image will have the 98 symbol in the corner of the image, but you can also change it with a very old-fashioned interface.

## RetroCam

RetroCam is another free app available for both Android and IOS. This app is popular due to the vintage filters it offers.

With Retrocam, you can imitate the analog photography of the 80s with ease. Load your photo into the app, choose a filter, apply a light leak, scratch or dust effect and you're done! The app also offers a customizable noise effect option, which is an added bonus for anyone looking to try editing their photos with this app.

RetroCam is very easy to use. The only missing feature that users often talk about is the timestamp option that makes retro photos a bit more realistic.

## Dazz Cam - Vintage Film Retro

Dazz Cam is a free vintage photography app and has in-app purchases available for full access to the app. With Dazz Cam, no post-production editing is needed, the most realistic photo or video is displayed instantly with just one click.

Dazz Cam is inspired by classic film cameras of the 80s. Based on the characteristics of this type of photography, Dazz Cam restores 100% of the color, texture and noise of the film, as well as the leak effect. Interesting light leaks.

The main advantages of Dazz Cam include:

1. Take two photos to apply the double exposure effect.
2. Timer function
3. With flash in the dark, you can capture more film texture.
4. Camera grid supports taking pictures.
5. Fisheye lens.
6. Flash color.
7. Adjust exposure.
8. Photos have square frames, convenient for sharing on Instagram

With Dazz Cam, you will quickly get a vintage-inspired photo without having to spend a lot of money and effort.
