

Top 9 best free security Fake IP software today

Use the best free Fake IP software below to help you access blocked websites around the world.

Have you ever been blocked when trying to access a foreign website? This may happen because the country you live in blocks access to that website or that website prohibits access from your country. This problem can be solved by faking IP to another accessible IP address. In addition, when faking IP you can surf the net safely. Here are 9 best free security IP faking software *that TipsMake* introduces to readers.

Do you know what fake IP is?

Fake IP is the act of hiding the real IP address of a computer with another IP address through a Proxy Server (intermediary) when accessing the Internet. The purpose is to trick the server into not allowing it to access the location of the visitor.

This can be done with a third-party software or application to hide the real IP address on your computer. This address will be replaced with the IP address of any country in the world such as: UK, USA, France, Australia and help you access blocked websites from these countries.

For example, PUBG Lite is a game that can only be played in Thailand. So if you are in Vietnam and use your real IP address to access the PUBG Lite website, it will be blocked. To avoid being blocked, you have to fake your IP to an IP address in Thailand to be able to access and play.

Top 9 best free Fake IP software today

1. Hotspot Shield - Top IP Fake Software

2. Ultrasurf - The easiest to use Fake IP software

3. FreeGate - Top IP Fake Software Today
