1. *Canva*

As a popular graphics editing software, Canva can help you create your own unique Logos with your name in just a few simple steps, bringing your brand identity into the design. Canva provides all the tools you need to create a custom logo, quickly and for free.

This software owns millions of icons and illustrations as well as thousands of professional Logo templates available for you to choose for your Logo. Besides, Canva will also suggest fonts suitable for the Logo to create the perfect combination between icons and text in the Logo.

Plus, Canva's logo templates are created with color combinations curated by professional designers. Or if you have something specific in mind, you can easily adjust the colors throughout your logo design process.

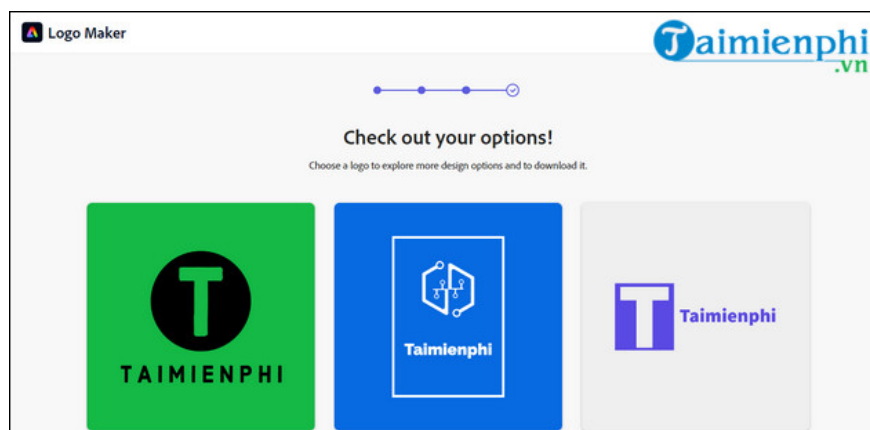

Advantages of Canva:

- Hundreds of high-quality logo templates and a library of millions of vector graphics, icons, and illustrations.
- Drag and drop operations make it easy to arrange graphic elements as desired.
- Freely use available colors, graphics or upload your own choices.
- Create logos online for free.
- Support uploading logos in PNG, JPG, and PDF formats.
