Laptops are an indispensable companion for every individual in work, study and daily entertainment. This article will review the 5 best gaming laptops under 25 million that you should own today, helping you choose a computer that fits your budget.

Asus Gaming Laptop TUF FX506HCB-HN139T

ASUS TUF Gaming Dash F15 is a gaming laptop with Intel Gen 11 processor combined with the latest Nvidia RTX 3000 GPU.

Asus Gaming Laptop has a completely improved design compared to its previous brothers in the TUF Gaming line. The angular appearance creates a solid and gaming-like feel.

ASUS TUF Dash 15 is equipped with a 15.6-inch FullHD screen, anti-glare technology with Adaptive-Sync, the screen's refresh rate will synchronize with the GPU's frame rate to minimize stutter and eliminate tearing for an extremely smooth gaming experience.

Acer Gaming Nitro 5 Eagle AN515-57-51G6 Laptop

Acer Nitro 5 gaming laptop 25 million uses 11th generation Intel Core i CPU for stable performance, can use heavy applications.

Combined with 8 GB or 16 GB RAM, you can also upgrade up to 32 GB for good multitasking and using multiple applications at the same time.

Geforce RTX 3000 discrete graphics card allows you to play mid-range games smoothly. You will also have a professional experience using 2D graphics applications such as Photoshop, Ai,.

The M.2 PCIe SSD hard drive operates quickly, responding to all tasks quickly in just a few seconds. The device is also equipped with an HDD slot for users who want to upgrade storage space.

Acer Nitro laptop creates a strong feeling through its design. The body is made of plastic with an impressive black and red color tone. Weighing 2.3 kg, the machine is quite light compared to gaming laptops in the same segment, making it easy for you to move.

The laptop has a cooling system with 3 fan speed modes and helps the machine reduce temperature immediately.

The 15.6-inch 144hz Full HD screen provides a spacious viewing space, sharp images with accurate colors. Acer ComfyView technology helps the screen display well in sunny weather, reducing eye strain when used for a long time.

MSI Gaming Bravo 15 Laptop

MSI Bravo 15 gaming laptop is the successor of Alpha 15 with newer design and hardware updates. Ryzen 5 5600H is a 6-core/12-thread CPU, these are 2 new CPUs from AMD with the expectation of beating rival Intel.

In terms of GPU, the Bravo 15 uses the same AMD Radeon RX5500M graphics card as its brother Alpha 15 with 4GB DDR6. The device is also equipped with 8Gb RAM and 512Gb NVMe SSD.

MSI is a famous brand for gaming devices, so the appearance is somewhat stronger than normal computers. The new design of Bravo 15 has removed the concave part on the back, but the features such as keyboard lights or thin screen borders are still quite similar to the old version. Although it is only a single-color red LED, no color, Bravo 15 is still bright enough to help you work more conveniently.

Bravo 15 has a luxurious, lighter brushed aluminum shell design. Weighs only about 1.86Kg

HP Gaming Laptop VICTUS 16-e0179AX

With a sophisticated design, attractive configuration and a mid-range price; HP Victus 16 will be suitable for gamers,.

Despite having a screen of up to 16.1 inches, the device is still very compact, equivalent to 15.6-inch products on the market. Unlike the Omen line, the HP Victus 16 will have a full keyboard of numbers and letters; convenient for use for a variety of tasks. Instead of RGB LED like other gaming products, the backlight of the HP Victus 16 will be in monochrome form only. Therefore, the aesthetics of the product will be limited, but the light brightness is convenient to use.

With HP Victus 16, users will experience the latest high-performance components at the present time, with many deep structural improvements to bring better and optimal power compared to the previous generation.

HP Victus 16 will have 3 USB-A ports, 1 USB-C 3.2 Gen1 port supporting video output, HDMI 2.1 port, RJ45 LAN port, SD card slot and 3.5 combo headphone jack - convenient for all needs of connecting gaming gear, hard drives or even memory cards to serve multimedia users.

Gigabyte Gaming G5 Laptop

The 25 million Gigabyte Gaming G5 gaming laptop is equipped with an 11th generation Intel Core i chip with Turbo Boost technology that not only plays games well but also quickly processes office software on Word, Excel, PowerPoint, or designs, edits images, videos, smoothly.

2-slot DDR4 RAM with 3200 MHz RAM Bus speed for superior multitasking, you can open multiple applications at the same time. In addition, you can upgrade up to 64 GB to meet all needs.

NVIDIA GeForce RTX 3000 discrete graphics card improves image display when playing games and doing graphics. You can play popular games today such as: GTA V, CS:GO, or freely create on software such as: Photoshop, AI, Pr, Figma, .

GIGABYTE laptops are equipped with a modern cooling system with 2 fans with 71 blades to help air circulate quickly, ensuring the computer does not get hot when operating at high capacity. Maintain smoothness when playing games or doing graphics for hours.

GIGABYTE Gaming G5 uses a removable battery. You can easily store multiple batteries to replace them when they run out without having to wake up to charge. However, the removable battery will take up the space of the rear heat vent of the device and reduce the ability to dissipate heat when the device is running heavy tasks.

The laptop keyboard is designed to be spacious, minimizing the risk of accidental keystrokes when playing games or working. Integrated LED strips under the keys create a highlight, helping you quickly locate the keys when playing games or using them in low-light environments.

Easily connect to other devices thanks to the ports equipped around the laptop such as: USB 3.2, HDMI, 3.5mm headphone jack, LAN (RJ45), Mini DisplayPort, USB 2.0, Type-C.

The laptop is equipped with a 15.6-inch Full HD screen with sharp images in every detail, allowing you to fully enjoy your favorite games and movies.

The laptop has a 144 Hz screen refresh rate that can reproduce frames extremely quickly, minimizing lag. Helps you react quickly when playing games or editing videos.
