

Top best gaming phones 2018

Here are some of the best phone models to play the game up to the present so you can refer.

Playing games on mobile is increasing and choosing a smartphone to meet this need for users is not an easy task. In addition to configuration, users need to pay attention to some other factors before choosing a phone for gaming purposes. Here are some of the best phone models to play the game up to the present so you can refer.

Razer Phone

Razer Phone is equipped with 5.7-inch screen, refresh rate up to 120Hz, 8GB of RAM and Snapdragon 835 processor to help users battle any game. The Razer Phone can also display smoother fast-moving games because everything is always synchronized because it works in tandem with the GPU.

With Dolby Atmos technology, THX certified speakers, Razer Phone promises to bring gamers a true and vivid feeling when playing games. In addition, this smartphone also has Game Booster software that allows users to fine-tune performance to maximize battery life.

In short, the Razer Phone has everything it needs to be able to fight 'any' mobile game.

OnePlus 6

Oneplus 6 is equipped with a 6.28-inch screen, sharp, ultra-thin border, Snapdragon 845 processor and gigantic 8GB of RAM to make it easy to play games or do anything else.

Asus ROG

Asus ROG Phone has a strong configuration and is integrated with many features specially designed to attract gamers. The casing is integrated with a steam chamber cooling solution to make the most of the Snapdragon 845 and RAM 8GB capabilities. The charging port and audio port are designed on the side of the device for easy gaming in horizontal mode.

In addition, the two sides of the phone also have a button system using ultra-sensitive ultrasound technology, an advanced AirTrigger sensor that acts as a shoulder button on the PS4 handle or an Xbox to help users easily control when playing. game

Along with that, Asus ROG Phone is also equipped with a 6-inch screen, AMOLED panels with a refresh rate of 90 Hz, a feedback speed of only 1 ms to show the images in the game the best.

Not a slimmest, lightest phone but Asus ROG Phone is definitely one of the best options if you want to fight terrible games.

Samsung Galaxy S9 Plus

Samsung Galaxy S9 Plus has a 6.2-inch infinity display (Infinity Display), with an ultra-thin bezel and an 18.5: 9 aspect ratio to show any game or application in the best way.

S9 Plus is equipped with a powerful configuration including Exynos 9810 or Snapdragon 845 CPU with 6GB RAM, internal memory can choose from 64GB, 128GB or 256GB, making everything work smoothly.

The back of the S9 Plus is equipped with a 12MP + 12MP dual camera which helps to achieve the best image even when shooting in the absence of light. S9 Plus also supports wireless charging, IP68 against water and dust.

Honor Play

Honor Play has a 6.3-inch screen running Huawei's own Kirin 970 processor and 4 GB or 6GB RAM.

Honor Play is equipped with Turbo GPU technology to enhance graphics processing performance up to 60% and increase gaming performance. This smartphone also supports playing 4D games with real-time vibration feedback to enhance the mobile gaming experience to a new level.

The Honor Play has 64GB of internal memory, an additional microSD card slot, and a dual camera at the back. Honor Play is a dedicated gaming phone for gaming enthusiasts.

Huawei P20 Pro

The P20 Pro is a good smartphone with Huawei's fast Kirin 970 processor, 6GB of RAM, 128GB of internal memory, a 4000mAh battery and a great screen that can fight any game you want to download and run on there.

In addition, the P20 Pro is currently the leading phone with three 40MP + 20MP + 8MP rear cameras to help you get the best photos.

Sony Xperia XZ2

Xperia XZ2 is equipped with 5.7-inch screen, Snapdragon 845 processor, 6 GB RAM, and 19MP rear camera, certainly will not disappoint you when you play games or do anything else.

Sony also integrated into the Xperia XZ2 screen X-Reality Dynamic Contrast Enhancer technology, Dynamic Vibration system, support HDR and pair of impressive stereo speakers make the game more vivid, giving users More subtle tactile experience.

In addition, the Xperia XZ2 also has a 3,180mAh capacity battery that will give an impressive usage time.

iPhone 8 Plus

iPhone 8 Plus owns 5.5 inch Full HD Retina screen, 6-core Bionic A11 CPU ensures excellent processing performance, smooth, bringing the best gaming experience.
