

Top best mechanical keyboards 2025

Many people prefer the physical feel and distinctive sound of a mechanical keyboard. If you are thinking about switching to a mechanical keyboard, TipsMake.com has a list of the best mechanical keyboards available today.

In recent years, mechanical keyboards have become very popular and are known and loved by many people. At present, mechanical keyboards are suitable for both gaming, working and other computer tasks.

Many people like the physical feel of typing and the distinctive sound it makes. If you are thinking about switching to a mechanical keyboard, TipsMake.com has a list of the best mechanical keyboards available today.

1. Corsair K95 RGB Platinum XT

The Corsair K95 RGB Platinum XT is one of the newest keyboards in the K95 series and offers the ultimate mechanical keyboard experience for gamers and streamers.

This mechanical keyboard features macro keys, USB ports, and an easily accessible media manager. The macro keys are ideal for MMORPG gaming.

In many ways, the K95 RGB Platinum XT is an upgrade over the standard K95 Platinum. For the extra money, you get a keyboard with a very comfortable wrist rest and much-improved keystrokes.

If you already own a K95 Platinum, you probably shouldn't spend the money on the XT version. However, if you're looking for a new mechanical keyboard, this seems like the best option on the market right now.

2. Razer Pro Type

This keyboard connects wirelessly via Bluetooth. When connected this way, the Razer Pro Type has a battery life of up to 84 hours. When the RGB lighting system is activated, the battery life drops to 12 hours.

Razer's Synapse software lets you remap keys and create custom profiles, a highly anticipated premium feature on a mechanical keyboard.

3. SteelSeries Apex 7 TKL

The SteelSeries Apex 7 TKL is a very easy-to-use mechanical keyboard that feels comfortable in both appearance and feel. The keyboard body is designed to be very sturdy but still has a sharp RGB lighting system and OLED display.

This keyboard may not be the best choice for everyday use due to the lack of a numeric keypad. However, the SteelSeries Apex 7 TKL is designed with gamers in mind, allowing for more strategic and convenient gameplay.

The SteelSeries Apex 7 TKL is a well-balanced combination of price and functionality. It is the perfect choice for those looking for a mechanical keyboard that is both beautiful and durable.

4. Das Keyboard 4C TKL

The Das Keyboard 4C TKL is easy and comfortable to use. If your workspace is a little tight on space, you'll appreciate the compact design, which doesn't take up as much space as other mechanical keyboards.

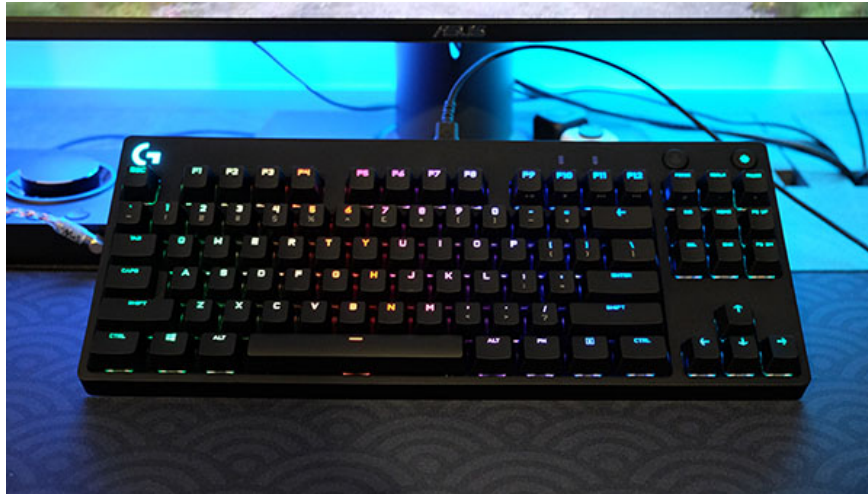

The build quality is evident, it feels premium and the feature set is excellent. The keys are extremely responsive, and the N-key hover is a welcome feature. You can turn it on and off as needed.

The fact that the keyboard is not equipped with a backlight at this price makes users very uncomfortable, especially with mechanical keyboards designed like this. However, do not let this small detail make you ignore an extremely good choice like this.

5. Logitech G PRO

The Logitech G PRO X is a competitive mechanical keyboard. It has a compact design and comes with a USB cable for connection.

This compact design is ideal for gamers, and it shows in the price. The Pro model is definitely aimed at professionals, with a complete feature set and mechanical switches available.

If you're looking for a mechanical keyboard with a lot of features, this is a fairly expensive option as it's more of a niche option. However, the lack of onboard memory is a bit of a bummer, especially at this price point.

6. HyperX Alloy Origins

The HyperX Alloy Origins is a well-built, premium-feeling mid-range mechanical keyboard. It's much more affordable than other competing keyboards and offers a unique feel with its proprietary keys.

If you are looking for a simple and easy to use mechanical keyboard, you should look at the HyperX Alloy Origins. This is an extremely ideal mechanical keyboard for those who play a light level of game and for users who like the feel of using a mechanical keyboard.

However, this keyboard still lacks key features that could be useful for gamers and streamers, so it would be better placed in the general-purpose keyboard category. The lack of volume control and macro keys is a bit disappointing.

7. Drop ENTR Mechanical Keyboard

Drop ENTR Mechanical Keyboard is a very nice keyboard, extremely suitable for people who do office work and have to type a lot. You can feel the quality with every keystroke.

If your workspace is small, don't worry, the Drop ENTR Mechanical Keyboard is extremely compact, allowing you to optimize your space. The appearance is finished with a smooth matte paint and LED lights, giving you the feeling that the mechanical keyboard will last forever.

However, if you're expecting this keyboard to have adjustable keys, auto-tune features, and app configuration, you'll probably be disappointed and look for another mechanical keyboard.
