

Top best photography smartphone in 2018

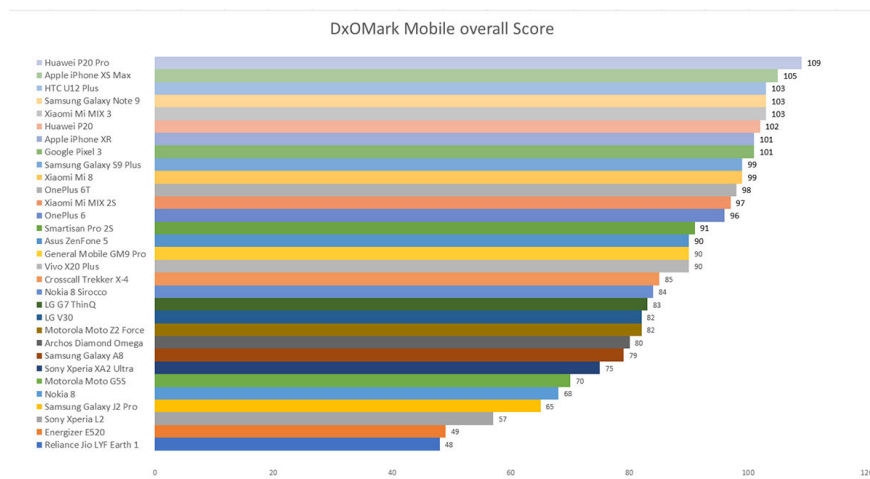

Below is the best smartphone photography chart of 2018 voted by DxOMark, the world famous camera review page.

Below is the best smartphone photography chart of 2018 voted by DxOMark, the world famous camera review page.

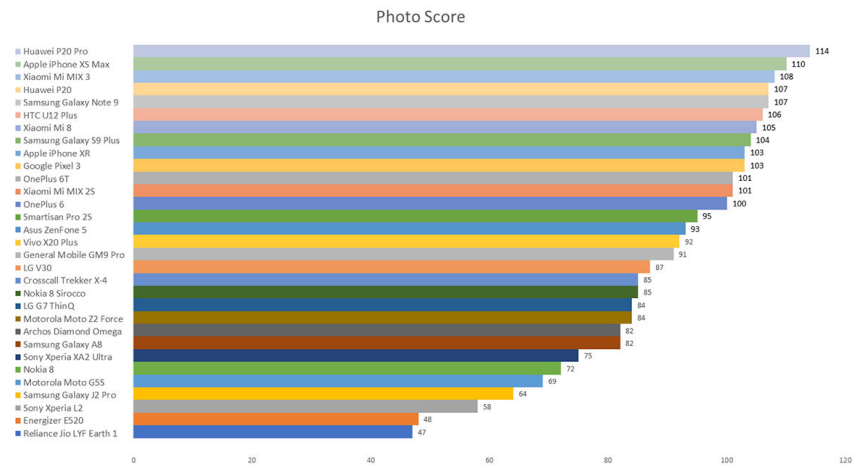

DxOMark has selected 31 smartphones in 2018 to evaluate, including from cheap smartphones to mid-range and high-end.

In this list, smartphones with 2 or more cameras dominate. In particular, this is the first time mobile camera rating points have surpassed 100 points.

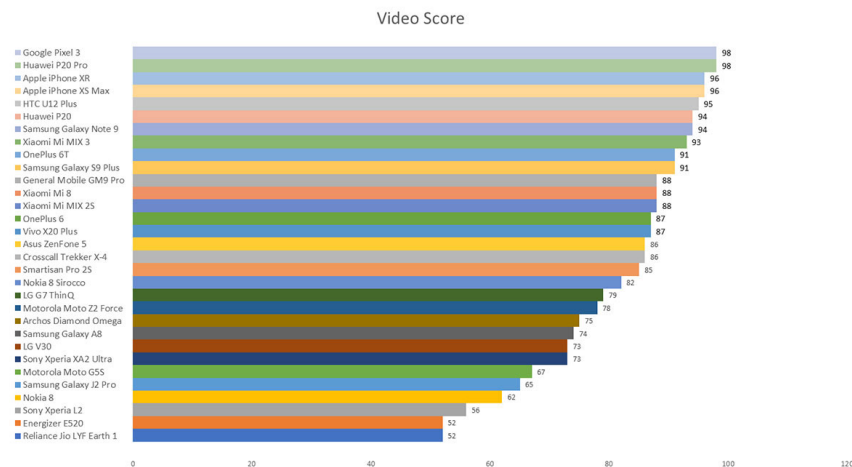

Huawei P20 Pro is a smartphone with the highest score of 109 points, this is also the first smartphone to have 3 cameras in the market in 2018. The following are other dual camera devices such as iPhone XS Max, Galaxy Note9, Mi Mix 3, Huawei P20 . with high scores of 98 points or more.

According to DxOMark, the smartphone with the best single camera in 2018 is the iPhone Xr with 101 points. However, smartphones with single cameras still lose to smartphones with 2 or more cameras in terms of zoom and font removal capabilities.

Unfortunately, in this ranking, there is no appearance of new smartphones launched by DXOMark, but this site is also committed to increasing the rating rate this year.
