

Top best push water pumps for families

Top 5 best water pumps for families that we recommend are the best suggestions to help you pump water for high-rise buildings effectively and long-term.

For high-rise households, using a high-powered water pump is most suitable. So which kind of water pump is the best?

What is a high water pump?

High-pressure water pumps have 3 main types: vacuum water pump, semi-vacuum water pump, centrifugal water pump. The biggest advantage of high-pressure water pumps is the ability to draw water from pipes and tanks very well. Suitable for pumping water for tall buildings.

Top 5 high quality, cheap water pumps for families

1. Panasonic 200W water pump GP-200JXK - Price: 1,169,000 VND

Advantages:

1. Panasonic water pump uses copper core motor to operate stably, smooth and durable.
2. Robust structure, rust-free, waterproof, ensuring electrical safety.
3. Suction depth of 9m, high push of 21m suitable for water pump for houses with 1-3 floors.
4. The water pump operates with a capacity of 200W for fast water pumping capacity of 45 liters / minute.

Specifications:

1. Motor: 100% copper core
2. Voltage source: 220V / 50Hz
3. Capacity: 200W
4. Water flow: 45 liters / minute
5. Depth: 9m
6. Push height: 21m
7. Product weight: 7.5kg
8. Made in: Indonesia
9. Warranty: 24 months
10. Brand: Japan

2. Panasonic water pump GP-129JXK - Price: 925,000 VND

Advantages:

1. GP-129JXK manufactured by Panasonic - Japan brand, ensuring high durability and stability.
2. Water pump uses 220V power, the ability to absorb water in tanks up to 9m deep and effective.
3. The ability to pump water at a height of up to 21m provides better water pumping efficiency for families with many floors.
4. Very good water pump, for large water flow, smooth operation.

Specifications:

1. Throat suction discharge: 3cm
2. Voltage source: 220V / 50Hz
3. Capacity: 125W
4. Water flow: 30 liters / minute
5. Depth: 9m
6. Push height: 21m
7. Product weight: 5.4kg
8. Made in: Indonesia
9. Warranty: 24 months
10. Brand: Japan

3. Panasonic GP250JXX water pump - Price: 1,939,000 VND

Advantages:

1. Smooth operation, low noise is the first advantage of GP250JXX pumps.
2. The pump is capable of absorbing water in underground tanks or deep pipes.
3. Can pump liquid with temperature up to 45 degrees C.
4. Copper wire motor allows continuous pumping for a long time.
5. Large pumped water flow up to 50 liters / minute saves power consumption.

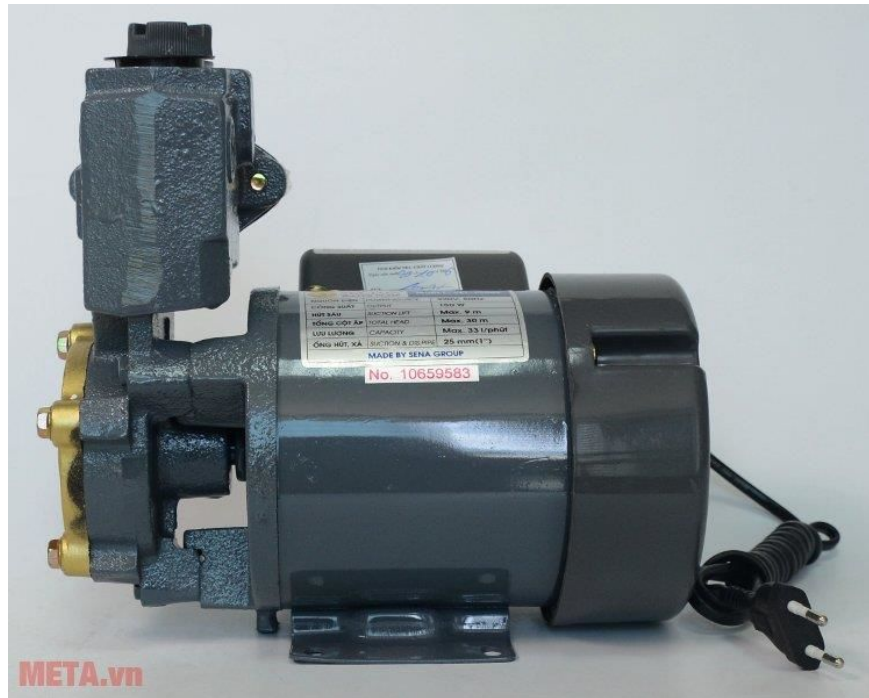

Specifications:

1. Motor: Copper wire
2. Exhaust suction: 2.54cm
3. Pump fluid temperature: Max (45 degrees C)
4. Capacity: 250W
5. Water flow: 0 - 50 liters / minute
6. Depth: 9m
7. Pressure head: 38m
8. Product weight: 8kg
9. Made in: Indonesia
10. Warranty: 24 months
11. Brand: Japan

4. Selton water pump 150BE- Price: 650,000 VND

Advantages:

1. Selton water pumps are cheap at the cost of every family.
2. Selton 150BE has a high thrust of 21m so it transports water very fast.
3. There are integrated fire-resistant thermal relays when the water source is unstable, causing dehydration.
4. Suitable for small families with 1 - 3 storeys.
5. Robust design, stable and durable operation.

Specifications:

1. Throat suction discharge: 25mm
2. Capacity: 150W
3. Water flow: 33 liters / minute
4. Depth: 9m
5. Push height: 21m
6. Made in Vietnam
7. Warranty 12 months
8. Brand: Vietnam - Korea

5. Panasonic GP-350JA 350W water pump - Price: 2,789,000 VND

Advantages:

1. Panasonic GP-350JA has a push up to 36m, so it is suitable for 4 to 5 storeys.
2. Pump chamber cap and pump disc are made of high temperature resistant brass.
3. The machine operates smoothly, using pressure ball with Butyl rubber to create stable pressure.
4. Automatically disconnect power when the pump temperature is too high, increase the safety against explosion
5. Cast aluminum motor body and brass pump chamber cover ensure high durability.
6. The switch with platinum contact can operate 1 million uninterrupted switching / switching.

Specifications:

1. Exhaust suction: 2.54cm
2. Capacity: 350W
3. Water flow: 45 liters / minute
4. Depth: 9m
5. Pressure head: 45m
6. Product weight: 14kg
7. Made in: Indonesia
8. Warranty: 24 months
9. Brand: Japan

With the above suggestions, I hope to help your family find the best and best water pump.
