

# Top best wireless mice 2019

Wireless mice have become the standard for interacting with computers, and among hundreds of tested mice, Logitech MX Master 2S is a product that meets almost every user's needs.

For many people, wireless mice have become the standard for interacting with computers, and among hundreds of tested mice, Logitech MX Master 2S is a product that meets almost every user's needs. But, if you need something a little more suitable, it's hard to make a mistake if you go along with any of the options below.

There are thousands of options to consider when choosing a wireless mouse, ranging from under \$ 20 (VND 460,000) to over \$ 100 (VND 2,300,000). Many options are designed specifically for a limited number of users - such as having the best gaming mice for gamers. But one of the favorites below will definitely be the right wireless mouse for you.

## The best wireless mouse

1. Best wireless mouse: Logitech MX Master 2S
2. Best minimalist mouse: Microsoft Surface Mouse
3. Best gaming mouse: Logitech G Pro Hero
4. Best mobile mouse: Logitech MX Anywhere 2S
5. Best handy mouse: Logitech MX Vertical
6. Best cheap mouse: Microsoft Wireless Mobile Mouse 1850

## Best wireless mouse: Logitech MX Master 2S

Reference price: \$ 70 (VND 1,620,000)

Based on the advantages of the previous version, MX Master 2S is a super wireless mouse, offering excellent accuracy, comfort and features. Sensitivity can be adjusted in increments of 50 DPI / time, from 200 to 4,000, this mouse supports all the sensitivity and style of user use.

The MX Master 2S's 500mAh rechargeable battery can last up to 70 days, so you won't need to worry about running out of battery in a short time and it can also charge very quickly. Logitech has paid special attention to the ergonomics of this device.

There is a reason why MX Master 2S is one of the top mice on this list. MX Master 2S makes the fingers very comfortable, with a shape that fits a variety of grip styles and prevents the creation of pressure on the wrists.

One of the best features of MX Master 2S is its multi-device support. If you want to switch from laptop to desktop and vice versa, you can do it quickly and easily with MX Master 2S, as it can pair with up to 3 devices at the same time and transfer. Switch between them at the touch of a button. With support for both the Logitech Unifying Receiver (Logitech Unified Receiver) and Bluetooth technology, you don't even need to switch wireless receivers.

## **Best minimalist mouse: Microsoft Surface Mouse**

Reference price: \$ 27 (625,000 VND)

Although targeted to Surface device owners who want more functionality than what the standard touchpad offers, the Microsoft Surface Mouse is a wireless mouse with comparable capabilities on any other system you choose. This product is very elegant, streamlined, handy and most importantly, lasts up to 1 year with just a pair of AAA batteries.

Despite being a Microsoft product, the Surface Mouse is still compatible with macOS and Android platforms, as well as Windows 10 and 8.1 operating systems. This mouse uses Microsoft's **'BlueTrack'** technology for low energy Bluetooth connections.

The switches and scroll wheel on the mouse are suitable for thousands of hours of use and a large number of actions. The mouse has a 1 year warranty, so you will be guaranteed, if you encounter any problems. There are not many additional features on this model, but the minimalist design is the score of Microsoft Surface Mouse!

## **Best gaming mouse: Logitech G Pro Hero**

Reference price: \$ 58 (1,340,000 VND)

Logitech has more formidable competitors in the gaming market than in other areas, but that doesn't mean that the Logitech name is not at the top of the game. G Pro Hero is one of my favorite gaming options for good reason. The mouse has 1ms latency for wireless connection, 16,000 DPI optical sensor and tracking speed up to 400 inches per second, suitable for high-speed gaming.

But even with all of those technologies, the Logitech G Pro Hero weighs less than 100g, making it comfortable to use for all hand sizes, but not so light that it's easy to lose control. The ergonomic shape of the mouse makes it extremely comfortable during long-term gaming tests, but due to adjustments to the overall shape of the mouse, dirt easily accumulates over time.

If you don't like anything about the mapping button that comes with the mouse, there's always full support for Logitech programming software, so you can remap any of the 8 G Pro buttons to do it. The commands are as expected. You can also adjust the polling speed and RGB lighting of the G-Pro logo, then save it all to the memory on the mouse for use with a variety of systems.

## **Best mobile mouse: Logitech MX Anywhere 2S**

Reference price: \$ 55 (VND 1,270,000)

Logitech has done its best to bring these great functions into this compact wireless mouse, making it suitable for users' hands as well as speed mice. Although it is a little difficult to see from the illustration, there are two buttons on the left that are well suited to the thumb, as well as a clickable button behind the scroll wheel, bringing the total number of usable buttons. to number 7.

That scroll wheel is very durable and is specially designed to be fast, although you can also click the wheel and switch to click-to-click mode to work more accurately. Great feature allows you to use a special mode for long PDF files and move to another mode to control the click and drag correctly.

A 4,000 dpi sensor means you can run mice on almost any surface. The mouse runs on a rechargeable battery, so sometimes you need to charge it with the included microUSB cable. The battery can last up to 70 days on a

single charge, which is not bad at all, though the biggest plus is that you don't have to replace the mouse battery.

You can connect to your PC in a variety of ways - via the USB cable, the Bluetooth feature provided, or by using the included Logitech Unifying Receiver (2.4GHz wireless) device. The mouse supports the Logitech Easy Switch platform, meaning you can pair up to 3 compatible computers and switch between them, at the touch of a simple button at the bottom of this peripheral. Mouse works with Windows (requires Windows 10 for all features), macOS and Linux.

## **Best handy mouse: Logitech MX Vertical**

Reference price: \$ 84 (1,942,000 VND)

If you spend a lot of time working with computers and are looking to minimize long-term effects like carpal tunnel syndrome, a lightweight mouse is the best option.

MX Vertical's design is one step above any competition with a cloud-like appearance that is sculpted, perfect and suitable for the user's hand. This design reduces pressure on the hands, potentially reducing fatigue and the risk of developing carpal tunnel syndrome.

The unique design of this mouse will take some time to get used to, but once adapted, the MX Vertical will be one of the most intuitive and comfortable mice you'll ever use. The mouse's natural wrist positioning forces you to place your hand in a more convenient position to ensure long-term wrist health. All this in an attractive device that sits neatly on a table.

## **Best cheap mouse: Microsoft Wireless Mobile Mouse 1850**

Reference price: \$ 14 (324,000 VND)

The Microsoft Wireless Mobile Mouse 1850 is an economical wireless mouse, with a no-frills appearance. It doesn't impress with its superior features, but if you need a wireless mouse and want to spend just under \$ 20, this is the best option.

The beautiful, symmetrical design makes the Mobile Mouse 1850 perfect for both left and right-handed users, and its compact design makes it a great choice for people on the go, need a wireless mouse to take with you. The device's nano transceiver is also very compact, making it easy to slip inside a mouse or even leave it on your laptop - just make sure you don't lose it!

This Microsoft mouse uses AA batteries, which can last up to 6 months on a single charge (this is a welcome feature). The mouse also comes with a 3-year warranty, so if you encounter any problems during this period, you won't need to worry.

Above is **TipsMake.com** 's suggestion about some of the best wireless mouse models. Hopefully the information mentioned in this article will help you make your choice easier!
