

TOP most powerful free weapons in Genshin Impact

Genshin Impact is one of the best free-to-play ARPG games released for mobile phones to date, with its elaborate weapon system and crafting.

The Genshin Impact game has a lot of weapons, so if you are wondering which is a strong weapon, suitable for the character, let's find out the most powerful free weapons in Genshin Impact below.

TOP strongest free swords

Amenoma Kageuchi

This sword has a good skill on its attack secondary stat. This skill allows the player to generate a buff every time they use their skill. If they use the explosion, the buffs will be converted to energy. This is great for characters who have short skill cooldowns and want explosive spam.

The player can craft this weapon at a smithy after receiving the schematic from the Inazuma Farmer's Treasure quest.

Prototype Rancour

This is the only alternative weapon for Aquila Favonia in physical builds. This weapon increases the user's attack and defense when they perform basic attacks and charged attacks. Unfortunately, there is currently no perfect match for this weapon.

Players can receive Prototype Rancour as a reward for reaching Adventure Rank 10.

Iron Sting

A great sword with Elemental proficiency secondary stat. Its skill increases all damage after dealing elemental damage, is super versatile and can be used on most characters. Players can craft Iron Sting without any schematics.

TOP strongest free swords

Archaic Prototype

Prototype Archaic is well-suited for Attack-based main DPS characters, due to its high base attack and secondary attack stats. Its ability allows the character to deal AOE damage with basic and charged attacks. The player can craft this weapon at any time without a diagram.

Whiteblind

This is the best sword based on DEF in Genshin Impact, perfect for Noelle. Besides its DEF sub-stat, the player can also gain additional attack and defense by normal attack and charged attack. The player can craft a Whiteblind at the beginning of the game.

Snow-Tombed Starsilver

Besides being similar to Prototype Archaic in terms of its high base attack stats, Snow-Tombed Starsilver is also more prone to physical damage.

Its skills enhance basic attacks and charged attacks, even dealing more damage if the target is affected by Cryo. This makes Snow-Tombed Starsilver perfect for combining Eula if you don't have any 5-star swords. The player can forge this weapon after solving the Dragonspine's Glacial Secret puzzle.

Katsuragikiri Nagamasa

This is a special weapon that increases Elemental Skill damage by eating away a portion of the player's mana. It is perfect for characters whose damage comes from skills.

The Katsuragikiri Nagamasa map can be obtained from the Luxurious chest in The Arsenal (after completing the Tatara Tales Inazuma quest).

TOP strongest free spear

The Catch

The Catcher is the best free weapon in the game, rivaling all other 5 star weapons. It's perfect for blast-based Polearm characters like Raiden or Zhongli, whose skills greatly increase the damage and crit of elemental explosions.

The player can trade it at the Inazuma Fishing Association, for a fish selection.

Prototype Starglitter

If you are looking for a generic DPS spear, Prototype Starglitter can solve the problem. Its skill increases normal attack damage and charged attack after using elemental skills. Players can craft this weapon without a diagram.
