

# Top most unreliable technology companies in 2018, Facebook tops the list

Toluna conducted a survey of technology companies that are not trusted by most users, and ranked first with overwhelming votes is Facebook, the world's largest social network. now on.

Toluna conducted a survey of technology companies that are not trusted by most users, and ranked first with overwhelming votes is Facebook, the world's largest social network. now on.

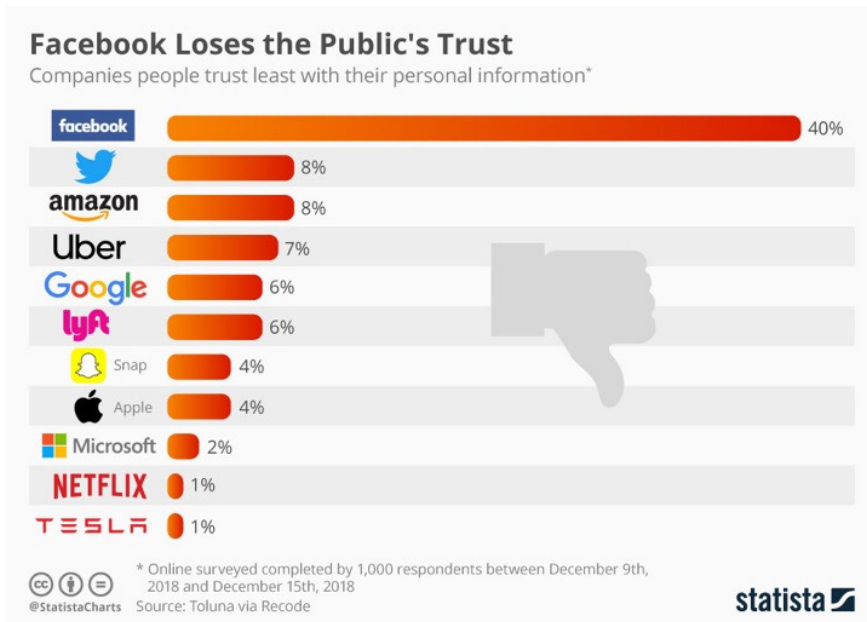

Toluna's survey was carried out earlier this month on 1000 different people, 40% of them chose Facebook when asked about untrustworthy technology firms to provide the most personal data.

According to PCMag, users of this poll not only came from data leaks, but also based on how to deal with them by technology CEO CEOs like Mark Zuckerberg or Sheryl Sandberg.

2018 was a bad year for Facebook when there were consecutive problems related to leaking user information. From the Cambridge Analytica scandal, to reveal the private image of 6.8 million users to third parties, or most recently, allowing more than 150 companies to access user data. How many times Facebook made users lose confidence and concerns about its security.

In addition to Facebook, many other large technology firms also beat the users' confidence in the past year, including Twitter and Amazon (with 8%), Uber (7%), Lyft (6%), .

In the past year, Google also had problems with privacy concerns, the protests of employees and CEO Sundar Pichai had to hear before the US Congress. This makes Google also listed on the most unreliable technology companies with 6% of respondents.

Snap, Apple, Microsoft, Netflix and Tesla are the remaining names on this list.
