

Top of the best selling stainless steel welding machines today

Refer to the most popular models of BT BTEC, Hong Ky and Classic welding machines for fast, durable and beautiful stainless steel welding!

In this article, TipsMake.com will introduce you to the best stainless steel welding welding models today!

At mechanical workshops, **TIG welding machines** also known as **stainless steel welding machines** with the ability to weld both stainless steel is a very popular tool. When using this product, welders can weld at high speed with many types of metals and their alloys as well as alloy steels without firing a lot of welding sparks. During welding, the welds can be easily adjusted so that there is almost no need for additional machining and very strong, solid welds.

Let's learn about the hottest stainless steel welding machines on the market today!

Top of the best selling stainless steel welding machines today

1. Inverter welding machine Btec TIG / MMA 215 Pro
2. Hong TIG HK TIG 200E electronic welding machine
3. The TIG 200A Hong Ky electronic welding machine
4. Classic TIG / ARC 200C Inverter welding machine

Inverter Btec TIG / MMA 215 Pro - Price VND 2,350,000 (VAT included)

The Inverter Btec TIG / MMA 215 Pro welding machine from BTEC brand, Japan is the first choice for today's professional welders. The machine ensures insulation and safe insulation according to ISO: 9001. Welding machines are on most metal and alloy materials.

The welding rod diameter is 3.2 mm to ensure accurate welding of the smallest details. The arc line of this stainless steel welding machine is also stable, providing optimum welding results for each weld. Applying Inverter technology, the machine ensures optimal energy saving and still has quality welds.

The device is compact, weighing 11.4 kg, very easy to move and store.

Hong TIG HK TIG 200E electronic welding machine - Price 3,750,000 VND (including VAT)

Picture 2 of Top of the best selling stainless steel welding machines today

Hong TIG HK TIG 200E electronic welding machine is a hot selling stainless steel welding machine from Hong Ky welding machine brand.

The biggest advantage of this product is the extremely compact design with a weight of only 6 kg, so it is convenient for the welder to carry when needing to work directly at the construction site, at the customer's house .

It works well when the power is low and can automatically disconnect when overloaded, overheated or too unstable power supply.

It also has a 7 KVA output power, 20 - 200 A welding range adjustment range, up to 60% working efficiency and is applied energy saving inverter technology. It can both weld Argon gas, can weld chopsticks with welding

rod size of 1.6 - 3.2 mm and welding pliers size is 1.6 - 2.4 mm, ensuring high accuracy for each Weld.

Hong Ky TIG 200A electronic welding machine - Price 3,990,000 VND (VAT included)

The TIG 200A Hong Ky electronic welding machine is both a rod welding machine and a TIG welding machine. The welding rod size is 1.6 - 3.2 mm, ensuring precise welding of all details and matching 7 KVA output power. The average working efficiency of the machine reaches 60%, and is applied with energy-saving Inverter technology, so it is a very economical electronic welding machine product.

The machine works stably even when the power is low. If the machine is overheated, overloaded or the power is too flickering, the machine may stop operating itself to prevent damage and ensure safety for the electrical system and the welder.

It has a compact, rugged design, weighs only 8.5 kg, so it is very convenient to move during work as well as easy to store and preserve the machine.

Classic TIG / ARC 200C Inverter welding machine - Price VND 4,120,000 (VAT included)

Classic TIG / ARC 200C Inverter welding machine comes from Classic welding machine brand, famous for modern welding machine products of Japan.

The machine can both weld rods and TIG welding. Due to the application of Inverter technology, the machine can save 50-60% of the electricity compared to the traditional rod welding machine.

The welding current adjustment range is in the range of 20A - 200A, so it is easy to bait the arc, increase the quality of the weld. It also welds a variety of metals and alloys, ensures less sparks, so it is safe for fire protection and labor safety for welders better.

It also has a digital welding display clock for the welder to monitor the parameters during welding. It weighs 14.7 kg, making it convenient to move to different work locations.

If you need to buy stainless steel welding machines or other good, cheap and good quality electronic welding machines, you can visit **META.vn** website to order online or contact **Hanoi** hotline number **024.35.68.69. 69 - TP. HCM 028.38.33.33.66** for assistance with the fastest purchase!
