

Top scientific applications for children on Android

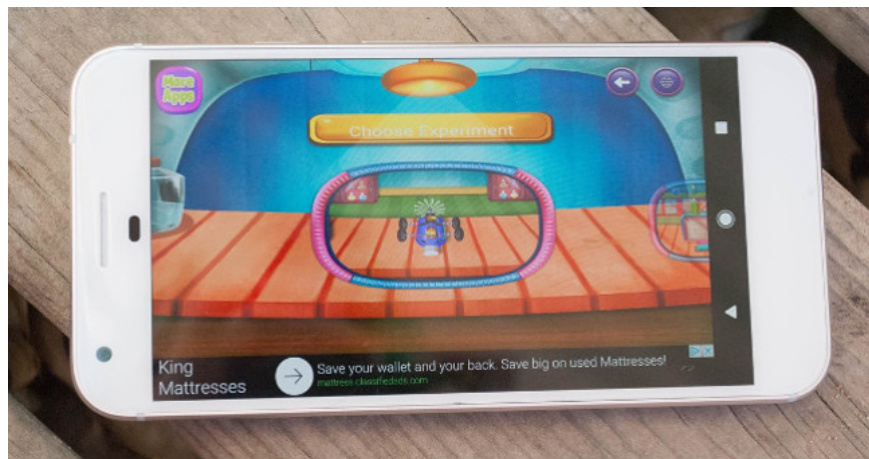

Want children to get used to science quickly and easily. Refer to 3 scientific applications for children on Android: Kid Science Amazing Experiments, Alchemy - Genetics, Animal Kingdom Science for Kids.

It can be said that children are able to learn almost everything in the world most quickly. The living environment and behavior of parents will significantly impact the awareness and learning ability of young children. So why don't you show them the magic of science and make them interested in science fields from an early age? There are many ways to make children interested and interested in science, but one thing you should remember, children will learn faster when they are interested. Therefore, mobile phone applications that are both learning and playing will be a bad choice for parents who want to introduce the vast scientific world to your children. The following article will introduce to parents the top 3 science applications for children on Android.

1. Kid Science Amazing Experiments

One of the easiest ways for your child to be curious about the vast scientific world is to show them interesting experiments. This is exactly the purpose of this application. Kid Science Amazing Experiments allows young children to be able to perform experiments on mobile screens. The application will guide children step by step to do an experiment. After the experiment is completed, the next experiment will appear.

A special feature of this application is that parents can completely rely on the application to help children perform those experiments in real life because these are absolutely interesting and safe experiments for young children. Some children tend to learn through action, so by encouraging them to do the experiments themselves will help them see how things work. And surely the happy, surprised and amused expressions of children after successful experiments themselves will certainly be an interesting experience that you witnessed. Kid Science Amazing Experiments is being downloaded for free on Google Play.

2. Alchemy - Genetics

Making children excited about learning will make them learn new things very quickly. The Alchemy series has a fairly simple way of playing that is to combine this with one or more objects to create something completely new. Alchemy Genetics also has a similar play but instead of combining animals you will have to combine animals to turn them into another animal with more than 500 species to explore for children. Children will have to think of different combinations if they want to discover all animals. Of course these are real animals in real life and this application is based on the same characteristics of animals to combine.

Maybe Alchemy - Genetics is quite difficult to start playing, but it will become more interesting and easier to play when the child is familiar with the rules. In addition, children can learn more about new animals as well as their English names. Alchemy - Genetics is a completely free game but if your child is bored with the game, you can buy the full version for \$ 0.99.

3. Animal Kingdom Science for Kids

There are many animals around us, and each species has its own characteristics. They are examples of the fun of science. If your child is interested in animals and often asks questions about them, Animal Kingdom Science for Kids will be a perfect app for children.

Children will have to answer questions to rescue animals. Those are the kinds of questions like where the crocodile moves the fastest? Which part does the fish use to breathe? . and must respond in multiple choice. After completing the quiz, the child will rescue one of the animals present in the flock of the application. That animal will appear on the screen. There are a total of 12 animals and the difficulty and the number of questions will increase. This application will be suitable for children of primary level.
