TOP of the top graphics mods for GTA 5, Grand Theft Auto V has been out for 9 years and its graphics may not satisfy gamers. TOP top graphics mods for GTA 5

Although it has been released for 9 years, the content in GTA 5 has never made gamers boring. However, in terms of graphics, it can be inferior to many games with super terrible graphics, and it is difficult to satisfy players with that old design.

Fortunately, GTA's modder community is still working hard to improve the shortcomings and the graphics are one of them. In this article, let's explore the TOP 5 mods that help bring the graphics of Grand Theft Auto V to a new level.

## VisualVanilla

VisualVanilla is a mod that subtly improves the graphics without changing Rockstar Games' original idea of ?? how the game's setting should be.

This mod changes and improves a lot of things while keeping the original character and appeal. One of the biggest changes to this mod is the removal of annoying chromatic aberrations and an overhaul of the underwater environment.

VisualV's stunning tweaks to areas and interiors, improved colors, fixed render code, and more, all weather has been reworked to match Rockstar Games' design as much as possible. .

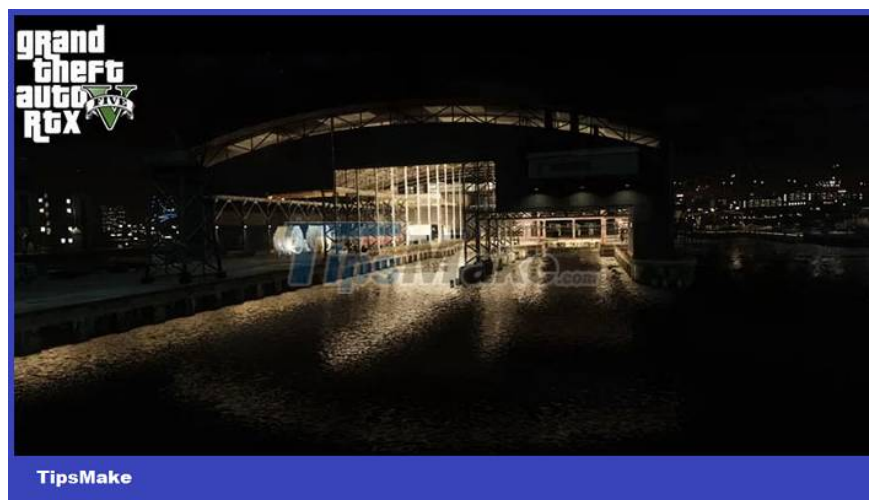

## VisualV

VisualV is a major graphical revision to Grand Theft Auto V, giving the game completely reworked weather effects. Also included are tweaks to areas, interiors, improved color correction, and more. These changes bring Los Santos and Blaine County to life, making these areas look much more alive. .

The mod also fixes the rendering code of the game, so the gameplay experience will be smoother and more beautiful. Similar to VisualVanilla, VisualV also changed all weather effects in GTA 5.

## RTX-V Alter Graphics

RTX-V is a special mod that improves all the lighting effects, making the GTA V world look a lot more real. This mod is definitely on par with some paid ENB graphics mods like NaturalVision Evolved (NVE).

## Old Gen Visual

This mod restores various graphic elements from the PS3/X360 version of the game to the PC version. Contrary to popular belief, this does not reduce the graphics quality of the PC version at all. Old Gen Visual offers a nostalgic feel of the games released in the 2010s, which some gamers will love.

Old Gen Visual changes many things, from timecycles, flashes, lightning, lights, clouds and more. Modder has also added some optional tweaks, such as alternate flare and the ability to remove fog mass and NGCoronas.

## PRSA - PhotoRealistic San Andreas ENB

PRSA ENB is a sophisticated all-in-one image enhancement tool that is compatible with all weather and lighting modes. It uses a set of custom shaders to bring out the most realistic and natural images possible, thereby serving as the basis for simulating various cinematic effects.

PhotoRealistic San Andreas ENB makes GTA V look stunning in screenshots. Players can try out a variety of styles, simulating camera effects, film, color grading, and post-processing.
